The history of mathematics is filled with major breakthroughs resulting from solutions to recreational problems. Problems of interest to gamblers led to the modern theory of probability, for example, and surreal numbers were inspired by the game of Go. Yet even with such groundbreaking findings and a wealth of popular-level books exploring puzzles and brainteasers, research in recreational mathematics has often been neglected. The Mathematics of Various Entertaining Subjects brings together authors from a variety of specialties to present fascinating problems and solutions in recreational mathematics. Contributors to the book show how sophisticated mathematics can help construct mazes that look like famous people, how the analysis of crossword puzzles has much in common with understanding epidemics, and how the theory of electrical circuits is useful in understanding the classic Towers of Hanoi puzzle. The card game SET is related to the theory of error-correcting codes, and simple tic-tac-toe takes on a new life when played on an affine plane. Inspirations for the book's wealth of problems include board games, card tricks, fake coins, flexagons, pencil puzzles, poker, and so much more. Looking at a plethora of eclectic games and puzzles, The Mathematics of Various Entertaining Subjects is sure to entertain, challenge, and inspire academic mathematicians and avid math enthusiasts alike.

The Ultimate Guide to the World's Best-Selling Puzzle: Secrets, Stories, Solutions

Low Vision Notebook: the Cube Puzzle Cubing Composition Book

The first book by the reclusive inventor of the world's most iconic puzzle THE RUBIK'S CUBE. Erno Rubik inspires us with what he's learned in a lifetime of creating, curiosity, and discovery. Erno Rubik was a child when he first became obsessed with puzzles of all kinds. "Puzzles," he writes, "bring out important qualities in each of us: concentration, curiosity, a sense of play, the eagerness to discover a solution." To Rubik puzzles aren't just games—they're creativity machines. He encourages us to embrace our inner curiosity and find the puzzles that surround us in our everyday lives. "If you are determined, you will solve them," he writes. Rubik's own puzzle, the Cube, went on to be solved by millions worldwide for over forty years, become one of the bestselling toys of all time, and to be featured as a global symbol of intelligence and ingenuity. In Cubed, Rubik covers more than just his journey to inventing his eponymous cube. He makes a case for always being an amateur—something he has always considered himself to be. He discusses the inevitability of problems during any act of invention. He reveals what it was like to experience the astonishing worldwide success of an object he made purely for his own play. And he offers what he thinks it means to be a true creator (hint: anyone can do it). Steeped in the wisdom and also the humility of a born inventor, Cubed offers a unique look at the imperfect science of creation.

Genre: Space opera. Comparison: Veronica Roth's "Carve the Mark" meets Interstellar. For over 22 years now, since my earliest memories, I close my eyes and see the same dream over and over again. In front of me, there is a world with an endless dome sky, sprinkled with stars, gigantic green plants, and a multicolour buffet of herbs and fruit. It's a world that's warmed with the light of a golden sun, whose rays simply radiate warmth without killing anyone, almost as if from a fairytale. It's a world filled with crystal-like water and uncontaminated oxygen. My visions are so bright that they outshine reality itself. Every time as I wake up in my capsule, it's as if I return to the shadows, stepping away from that pure light. Going to a space station with the task of catching a dangerous spy, I couldn't imagine that this would be the person to reveal the truth and essence of my dreams. The pulse which the old man Iza spotted transmits the sights, music, and even the language of an unexplored yet inhabited planet, exactly identical to what I envision. I always knew that a long road was waiting for me, but what exactly awaits on the other side of this mysterious star maze? BASIC Brainteasers

"Readers who know Gerdes mainly as an excellent women's fiction author will be pleasantly surprised to find she is equally remarkable when it comes to blending the thrills and chills of a thriller with biotechnology and cyber suspense. The standard techno thriller components: a secret government conspiracy, evil masterminds are part of the plot, but Gerdes's balanced writing (which is an impressive blend of credible action and emotional depth) lifts the techno thriller elements well above the average thriller norm. Complicated technical terms and cyber space detail are plenty, but Gerdes's skillful use of accessible language while explaining complexities keeps the flow of the narrative smooth. Flawlessly blending high tension with accessible technology, Gerdes has created another winner. YA as well as mature readers of techno thrillers will be rewarded."
