Paralleling the human senses, the author explores the secret lives of various plants, from the colors they see to whether or not they really like classical music to their ability to sense nearby danger. Managerial styles are influenced by habit,

familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and

Most of us are familiar with the idea of a werewolf—that someone can change, either deliberately or unwillingly, into a ravenous creature—but is there some justification for such a belief? And if so, how is it achieved—through magical potions or ointments or simply by the light of the full moon? Or is the whole thing simply a form of delusion, the product of a disturbed mind? In *Werewolves*, author Dr. Bob Curran examines the deep psychological perceptions about the

linkage of man with the natural, bestial world. Do the roots of such a belief lie in the supernatural world, or are there other explanations? How has the discovery of feral children, living in the wild, shaped our ideas of human-beasts? And what is the future of such beliefs? The book considers genetically-based speculations regarding the possible fusion of human and animal genes in order to alleviate some human diseases and suffering. Is the idea of man into beast really so far fetched? Werewolves is an essential reference book which looks, in depth, at a fascinating

This book is about organisational development from a systemic perspective. It is about systemic principles. How do they work in organisations? And how do people in those organisations experience them? This book attempts to answer this and many more questions on working with the systemic phenomenological perspective in organisations and society at large. From the same perspective, this book discusses a large amount of

issues such as fraud, success, downturn and succession. This book includes many examples of organisations and themes, including constellations in South America, Europe, Russia and the US. Together, they make this book to be a Lonely Planet in the world of working in the systemic-phenomenological way. Jan Jacob Stam, founder of the Hellinger Institute in The Netherlands, and a very welcome teacher and lecturer in more than twenty countries, has been a leader and researcher in the field of systemic work for over 15 years. This book gives you a look into Jan

For many of us, the drive to affect positive change--however vague or idiosyncratic our sense of this might be--has guided our work in higher education. We champion the pursuit of a college degree because few endeavors can match it in terms of advancing a person's economic mobility (Chetty, Friedman, Saez, Turner, and

Despite recent debates about the value of a college degree (Pew Research Center, 2017), the opportunities and financial stability awarded to those with college degrees remain apparent when they are compared to peers who have only graduated high school (Pew Research Center, 2014). And while more Americans have a college degree than ever before (Ryan and Bauman, 2016), access to a formal, post-secondary education continues to be elusive for some. Indeed, over the last ten years, analysts have projected that the cost of attending college would keep 2.4 million low-to-moderate income,

necessary for success, Still Moving weaves together the “being” and “doing” of states of leading change and emphasises the importance of a mindful stance and deep systemic perception within a leader. With the goal of collaborative, sustainable change, the book delves into a variety of important topics, including present-moment awareness, intentional response, edge and tension and emergent change. Compelling and provocative, Still Moving questions the conventional wisdom of much change theory and asks that leaders first work on their inner source in order to more effortlessly change the world

With his insightful and wide-ranging theory of recognition, Axel Honneth has decisively reshaped the Frankfurt School tradition of critical social theory. Combining insights from philosophy, sociology, psychology, history, political economy, and cultural critique, Honneth's work proposes nothing less than an account of the moral infrastructure of human sociality and its relation to the perils and promise of contemporary social life. This book provides an accessible overview of Honneth's main contributions across a variety of fields,

assessing the strengths and weaknesses of his thought. Christopher Zurn clearly explains Honneth's multi-faceted theory of recognition and its relation to diverse topics: individual identity, morality, activist movements, progress, social pathologies, capitalism, justice, freedom, and critique. In so doing, he places Honneth's theory in a broad intellectual context, encompassing classic social theorists such as Kant, Hegel, Marx, Freud, Dewey, Adorno and Habermas, as well as contemporary trends in social theory and political philosophy. Treating the full range of

McGee, James Beard Award-winning author and leading expert on the science of food and cooking, comes an extensive exploration of the long-overlooked world of smell. In Nose Dive, McGee takes us on a sensory adventure, from the sulfurous nascent earth more than four billion years ago, to the fruit-filled Tian Shan mountain range north of the Himalayas, to the keyboard of your laptop, where trace notes of phenol and formaldehyde escape between the keys. We'll sniff the ordinary (wet pavement and cut grass) and the extraordinary (ambergris and truffles), the delightful (roses and vanilla) and the

challenging (swamplands and durians). We'll smell one another. We'll smell ourselves. Through it all, McGee familiarizes us with the actual bits of matter that we breathe in—the molecules that trigger our perceptions, that prompt the citrusy smells of coriander and beer and the medicinal smells of daffodils and sea urchins. And like everything in the physical world, molecules have histories. Many of the molecules that we smell every day existed long before any creature was around to smell them—before there was even a planet for those creatures to live on. Beginning with the origins of

those molecules in interstellar space, McGee moves onward through the smells of our planet, the air and the oceans, the forest and the meadows and the city, all the way to the smells of incense, perfume, wine, and food. Here is a story of the world, of every smell under our collective nose. A work of astounding scholarship and originality, Nose Dive distills the science behind the smells and translates it, as only McGee can, into an accessible and entertaining guide. Incorporating the latest insights of biology and chemistry, and interweaving them with personal observations, he reveals how our

In this empowering book, Robert E. Quinn, author of the highly successful and influential Deep Change, gives readers the courage to use personal transformation to positively impact their home life, work life, and communities -- to be what he refers to as "inner-directed and outer-focused." We are all potential change agents, but most of us are trapped by belief that we as individuals cannot make a difference. Informed by the

offers a variety of perspectives and unparalleled experiences from practitioners and researchers who all share an interest and involvement in Organisation Development (OD). In it are multiple voices, mindsets and practices - not all of which necessarily agree with each other. Leading OD practitioners present a contemporary, practical guide that tackles the dilemmas and polarities that face anyone studying or practising within the OD arena, and encourages them to develop their own particular practice of OD in a way that is appropriate for their context, skills and preferences, while challenging them to look beyond what comes

naturally. Here are new ways to support the growth and development of an organisation from modest endeavours that are small in scale to organisation-wide change programmes. A Field Guide for Organisation Development is as comprehensive a resource to support the practice of OD as can be found anywhere. It covers issues of organisational health as well as offering tools aimed at supporting practitioners to survive in the harsh realities of organisational life. It contains chapters on the OD practitioner, on groups, on culture, on data and evaluation. It offers perspectives on change, on the relationship between OD and HR, and on the use of

How to understand a media environment in crisis, and how to make things better by approaching information ecologically. Our media environment is in crisis.

Polarization is rampant. Polluted information floods social media. Even our best efforts to help clean up can backfire, sending toxins roaring across the landscape. In You Are Here, Whitney Phillips and Ryan Milner offer strategies for navigating increasingly treacherous information flows. Using ecological metaphors, they emphasize how our individual me is entwined within a much larger we, and how everyone fits within an ever-
