From the 1940s to the 1960s, Elizabeth Bowen took an active role in spoken media and radio in particular by writing essays for broadcast, improvising interviews on the air and giving public lectures. During her lifetime, she published few of her broadcasts. Listening In brings together a substantial number of her ungathered and unknown works for the first time. Bowen was known as a public intellectual capable of talking on numerous subjects with wit and general insight. Invited to university campuses in the UK and US, she delivered important lectures on language, the 'fear of pleasure', character in fiction, the idea of American homes and other topics. Her first efforts for radio were adaptations of her own short stories and dramatizations of literary subjects. She quickly turned to commentary on culture, such as the beginning of the BBC Third Programme and the atmosphere in postwar Czechoslovakia. She documented her love of cinema in the 1930s and the making of Lawrence of Arabia in the 1960s, and broadcast on Queen Elizabeth II, Katherine Mansfield, Frances Burney and Jane Austen.

Three battles that changed the course of WWII and echo through world history to the present day. Three renowned experts each take up one of these crucial engagements. Iwo Jima 1945 Operation Detachment, the invasion of Iwo Jima, on February 19, 1945, was the first campaign on Japanese soil, and it resulted in some of the fiercest fighting of the Pacific campaign. El Alamein 1942 El Alamein saw two of the greatest generals of the war pitted against each other: Rommel and Montgomery. Arnhem 1944 When we think of Arnhem, we think of a bridge too far and a sky full of parachutes dropping the Allies into the Netherlands. It was one of the most complex and strategically important operations of the war.

*Desert Rat Scrapbook* was first published in 1946 by Harry Oliver, a lifelong desert rat, Oscar nominated artist, and humorist. It's a collection of humor fact, and tall tales collected from the lives of him and others in the southwestern United States. Oliver eventually handed the reigns over to Bill Powers, who published the final issues. In its hey-day the paper was mailed all over the United States and several foreign countries. Although the volumes have been collected piecemeal in print over the years, they're rare to find. Desert Historian Bill Oakes managed to compile an entire collection and digitize them for posterity. Without his assistance, it's likely many of these issues would have never been seen again. **SINGLE ISSUE NOTICE-** This is a single issue of *The Desert Rat Scrapbook*. Since the turn of the 20th century, Southern California's Coachella Valley has embraced a unique crop: the date. As success with the fruit grew, so too did regional celebrations of it. Beginning in 1921, the City of Indio hosted a Festival of Dates, an event that became the annual National Date Festival in 1947. The area linked itself to the date's birthplace, the Greater Middle East, in multiple ways, but the festival drew national attention to Indio's use of these Arabian fantasies. Attendees celebrated the fair's camel races, Arabian Nights musical pageant, Middle Eastern architecture, Queen Scheherazade pageant, and the costumes worn by boosters and visitors alike. While the United States' political and pop-cultural relationship to the region changed over time, the Eastern Coachella Valley continued to embrace fantasies of the Middle East at its fair.

Death Valley, its harsh and rugged landscape established a national monument in 1933 and named a national park in 1994, has long held a fascination for visitors, even before it became tourist friendly. Shortly after the first visit of nonnative inhabitants, a party of forty-niners looking for a shortcut to the goldfields of California crossed this land with tragic results, inadvertently giving the valley its moniker. Despite the immense suffering in their midst, prospectors began exploring the area looking for mineral wealth. Boomtowns formed, prospered, and died all within a few years, most disappearing completely into the desert. Adding to Death Valley's mystique was the shameless self-promotion of Death Valley Scotty, which lasted for a period spanning more than 50 years.

**Scotty's Castle is a study in contrasts, much like its setting in Death Valley. While the castle is known worldwide and has been visited by hundreds of thousands of tourists, many myths persist. It is not a castle, nor was it owned by Walter E. Scott, known as "Death Valley Scotty." But the Spanish-style hacienda, also known as Death Valley Ranch, has always been linked to Scott. This book explores the fascinating history of Death Valley Scotty, Albert and Bessie Johnson (the true owners and builders of the castle), and the castle itself from construction to private living quarters to a tourist facility owned and operated by the National Park Service. This volume is a combination guidebook/journal to the desert regions of California. Filled with historical notes and details of the culture, it provides practical travel information and insight into the area's past, the legends, and the myths that survive today. The author provides information on sacred places and their mysteries. This work includes directions, places to stay and eat, plus advice on safe passage in this harsh but beautiful terrain.**

In this story about the perils of popularity, the courage of nonconformity, and the thrill of first love, an eccentric student nar changes Mica High School forever.

The author Bill Little introduces the reader to the seven divisions of the Sonoran Desert in Arizona, Sonora and Baja California, takes you on a tour to discover desert plants from Nogales to Kino Bay with side trips to Puerto Libertad and Tastiota - all in Sonora. Along the way you'll see the weird, the exotic, the rare, and many other beautiful plants of this unique piece of the Sonoran Desert. Written in an easy-to-understand manner, the Sonoran Desert Scrapbook has close-up and general view color photos for each

complete description, including flowering time, and a location where each plant can be seen. Sonora is also the ancient homeland of the Seri Indians, and this book covers the ethnobotany and supernatural beliefs of the Seri for many of the plants they used. The photography in this book will be enjoyed by tourists as well as the more serious native plant enthusiast. William J. Little has a Ph.D. in Forest-Range Management from Colorado State University. During a thirty year career with the U.S. Forest Service, he worked in Idaho, and Utah, serving as either a forester, forest ranger, or range specialist. After retiring from the Forest Service, he was an environmental consultant. Bill has now turned his attention to one of the more fascinating desert areas of the world and has spent fifteen years roaming the Sonoran Desert in Arizona, Sonora, and Baja California to study and photograph its unique variety of plants. The result is this guide to some of the most interesting and unusual plants found in the deserts lining the Sea of Cortes near Kino, Mexico.

*The Second Battle of El Alamein marked a major turning point in the Western Desert Campaign of the Second World War. El Alamein saw two of the greatest generals of the war pitted against each other: Rommel and Montgomery. Through key profiles and a chapter devoted to 'The Armies' Battle Story: El Alamein explores what made these men inspired leaders and what led to their respective defeat and victory. Montgomery's success ensured that the Axis army was unable to occupy Egypt and therefore gain control of the Suez Canal or the Middle Eastern oil fields, thereby preventing a major source of income and power for them. The background and impact of the battle are explored in separate chapters, so offering the reader a clear insight into why what happened in this remote part of Egypt was so central to the Allied cause. *This large, easy-to-use volume lists the works of more than eleven hundred different authors, covering thousands of stories of lost mines and buried treasures supposedly located in fifteen Western and Southwestern states and in Mexico. In addition to being a boon to those adventurers who are tempted to search for lost mines and buried treasures, it will be an important basic research tool for historians, geologists, geographers, anthropologists, archaeologists, and folklorists, and it will be useful in identifying the man treasure hoards and mining claims all the way from the Lost Adams Diggings in Arizona to the Stagecoach in Wyoming. The information given in this important bibliography was acquired through perusal of an unusually large number of books, newspapers, magazines, unpublished manuscripts, deposits in private and public libraries, holdings of various historical foundations, and governmental records and archives. The task took Mr. Probert three full years of steady, patient work. Many of these stories of lost mines and buried treasures have resulted in the discovery of some that are rarely acknowledged, largely because, as Mr. Probert points out, "those who have been so fortunate as to find the pot of gold at the end of the rainbow have deemed it wiser and much safer to keep their own counsel" -- Book jacket.*
