

The Down To Earth Guide Global Warming

Travel to space and back with astronaut Chris Hadfield's "enthrralling" bestseller as your eye-opening guide (Slate). Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting a plane, and been temporarily blinded while clinging to the exterior of an orbiting spacecraft. The secret to Col. Hadfield's success-and survival-is an unconventional philosophy he learned at NASA: prepare for the worst- and enjoy every moment of it. In An Astronaut's Guide to Life on Earth, Col. Hadfield takes readers deep into his years of training and space exploration to show how to make the impossible possible. Through eye-opening, entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement — and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't visualize success, do care what others think, and always sweat the small stuff. You might never be able to build a robot, pilot a spacecraft, make a music video or perform basic surgery in zero gravity like Col. Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut, and will change, completely, the way you view life on Earth — especially your own. "Hadfield proves himself to be not only a fierce explorer of the universe, but also a deeply thoughtful explorer of the human condition." —Maria Popova, Brain Pickings

Most people consider happiness the most important pursuit in life, yet few seem to find it. Women, in particular, face a constant internal battle between finding their own happiness and ensuring the happiness of others. Debbie Gissoni, aka "The Goddess of Happiness," shows that happiness is a choice that anyone can make, anytime and anywhere. In 44 dynamic entries the author shares her stories, insights, humor, and simple suggestions to bring out the radiant Goddess in every woman. Each entry includes meditations and journaling ideas to help readers transform the pursuit of happiness into a tangible, everyday practice. Gissoni teaches that all women are goddesses — they just need to tap their innate power and reacquaint themselves with their own magic; and that life is meant to be enjoyable — not to be taken so seriously or made too complicated. Each of these chapters ends with five simple ways to have an easier and happier life.

Isaac Asimov's Guide to Earth and Space

A thrilling nonfiction tour of the cosmos that brings the universe down to Earth, from one of the all-time masters of science fiction. No one makes sense out of science like Isaac Asimov. Are you puzzled by pulsars? Baffled by black holes? Bewildered by the big bang? If so, here are succinct, crystal-clear answers to more than one hundred of the most significant questions about the essential nature of the universe—questions that have fired the imagination since the beginning of history. Over the course of this fantastic voyage, the origins, the discoveries, and the stunning achievements of astronomy will unfold before your eyes. You will experience close encounters with giant planets, exploding stars, distant galaxies, and more. For anyone who has ever asked the ultimate questions, who has ever looked up at the sky and asked What in heaven is going on?, Isaac Asimov’s unique vision, skill, and authority will bring the big picture into focus. “A fine introduction to modern astronomical theory.”—Library Journal

From award-winning author Paul Yoon comes a “spellbinding” (The Washington Post) novel about three kids orphaned in 1960s Laos—and how their destinies are entwined across decades, anointed by Hernan Diaz as “one of those rare novels that stays with us to become a standard with which we measure other books.” Alisak, Prany, and Noi—three orphans united by devastating loss—must do what is necessary to survive the perilous landscape of 1960s Laos. When they take shelter in a bombed out field hospital, they meet Vang, a doctor dedicated to helping the wounded at all costs. Soon the teens are serving as motorcycle couriers, delicately navigating their bikes across the fields filled with unexploded bombs, beneath the indiscriminate barrage from the sky. In a world where the landscape and the roads have turned into an ocean of bombs, we follow their grueling days of rescuing civilians and searching for medical supplies, until Vang secures their evacuation on the last helicopters leaving the country. It’s a move with irrevocable consequences—and sets them on disparate and treacherous paths across the world. Spanning decades, this “richly layered” (The New York Times Book Review, Editors’ Choice) book weaves together storylines laced with beauty and cruelty. Paul Yoon’s “greatest skill lies in crafting subtle moments that underline the strange and specific sadness inherent to trauma” (Time) and this book is a breathtaking historical feat and a fierce study of the powers of hope, perseverance, and grace.

I was pulled into simple living before I knew what it was. It crept up on me using the smallest of steps and didn't reveal its true beauty and real power until I was totally hooked. I was searching for a way to live well while spending very little money. What I found was a way of life that also gave me independence, opportunity and freedom.' Rhonda Hetzel gently encourages readers to find the pleasure and meaning in a simpler life, sharing all the practical information she has gathered on her own journey. Whether you want to learn how to grow tomatoes, bake bread, make your own soap and preserve fruit, or just be inspired to slow down and live more sustainably, Down to Earth will be your guide.

A fun and fascinating way to learn about the book of Revelation. The Bible's final book, Revelation, can seem intimidating or downright impossible to comprehend, even for serious students of the Scriptures. Filled with complex imagery, vivid depictions of violence, and challenging spiritual references, Revelation is often set aside by readers in favor of more straightforward, easier-to-digest biblical material. Yet the capstone of the canon need not remain a mystery. In this refreshingly accessible book, Bible scholar and best-selling author Tim LaHaye (originator of the Left Behind series) and renowned puzzle master Timothy E.

Parker (editor of the USA Today Crossword, and founder of The Universal Crossword, King James Games, and Master Puzzles) demystify Revelation for your benefit. Absorb this book and discover afresh—or for the first time—the richness of Revelation and its God-breathed, life-changing power to deepen your walk of faith.

How was the world as we know it created? What does it mean to be a hero? Where do we go when we die? Why are flood myths so ubiquitous? Anyone who has pondered these and other questions about humanity’s ancient beliefs will be fascinated by The Friendly Guide to Mythology. Focusing on Greek and Roman mythology but including myths from Africa, Asia, Australia, northern Europe, and the Americas, The Friendly Guide to Mythology is filled with compelling stories of gods, goddesses, mortals, and monsters. Beautifully ornamented with photos, line drawings, and quotes, this entertaining guide also includes an A-to-Z listing of the world’s most captivating goddesses: profiles of famous writers, collectors, and interpreters of myths; and engaging sidebars. Featuring myths of love, wisdom, and adventure as well as those of violence, jealousy, and pure folly, this accessible collection offers fascinating insight into the human psyche and brings our rich mythological heritage delightfully into focus.

A uniquely compelling, refreshingly practical and unimpeachably informed how-to guide for aspiring and published nature writers.

Easy, do-able, down to earth ideas and suggestions for everyone to help save the planet. If you want to save the planet, but your to-do list is already pretty long and remembering your re-usable coffee cup feels like a Herculean task, then this is the book for you. Covering every aspect of our lives from the stuff we buy and the food we eat, to how we travel, work, and celebrate. This book provides stacks of practical, down to earth ideas to slot into your daily life, alongside a gentle kick up the butt to put your newfound knowledge into action. Practical tips include unsubscribing from all the tempting emails that drop into your inbox with details of the newest clothing range or the latest sale, and keeping a mug next to your kettle to work out how much water you actually need to boil each time, as over filling kettles costs British households £68 million on energy bills each year. Find out how to fit "sustainable living" into your life, in a way that works for you. Change your impact without radically changing your life and figure out the small steps you can make that will add up to make a big difference (halo not included).

Nothing in all the vast, created universe could prepare us for God coming down as a helpless infant, or for Jesus the son of God intentionally positioning himself as a mere servant, identifying with the lowest of lows. It's enough to confound the mind, to make the heart contrite. This Advent, God's great surprise changes everything.

The designer and author of Habitat “shares how she imbues any space with warmth and energy” in this elevated yet accessible follow-up (MarthaStewart.com). Down to Earth picks up right where Lauren Liess’s critically acclaimed Habitat left off. While Habitat walked readers through the decorating process step-by-step, Liess’s latest title takes a step beyond the basics and invites readers to incorporate the main components of her familiar design aesthetic: nature, easy living, and approachability. With evocative photos and substantive design advice, Down to Earth focuses on creating a lifestyle that inspires creativity and functionality. Throughout the book, Liess shows readers how to incorporate six guiding principles in six unique homes: a new farmhouse, a classic American historical home, a lakeside contemporary house, a modern villa, a turn-of-the-century American Foursquare, and a cedar and glass house on a bluff. While each home has a different architectural style, fingerprints of Liess’s down-to-earth style are evident throughout. “Full of the stunning images you would expect. They will spark your creativity and inspire your own designs. However, the real beauty comes from Lauren showing readers how to create ease in their own homes.” —Ariadne Shoppe “Her style embraces lived-in, vintage-inspired interiors . . . Her philosophy is that if your home is relaxed, then you’re relaxed.” —One Kings Lane

An engaging, accessible guide to personal empowerment. The phenomenal success of The Secret points to the great hunger for answers, hope, and change. But what if books like that seem a little too 'out there' for you? Enter Deanna Davis, whose down-to-earth approach stems from her own change of heart (it happened at the Olive Garden). In this fun, quirky, and decidedly straightforward guide, Deanna shares the science, strategy, and stories of how to create your ideal life using a universal key to success called the Law of Attraction, whether you seek health, wealth, happiness, success, or anything else, large or small. The book blends cutting-edge research, practical techniques, and a conversational, light, funny tone to make the information both meaningful and memorable. Like a talk by your favorite college professor, it provides brilliant concepts in a downto- earth manner-an uncommon blend of wisdom, creativity, inspiration, and practical strategies that work.

To the beginner, the star-filled night sky can seem mysterious and unfathomable. But with this book as a guide the awesome nature of the Cosmos is brought down to Earth. Over the course of twelve chapters Mark Thompson, one of the presenters on BBC One's Stargazing Live and the resident astronomer on ITV's The Alan Titchmarsh Show, will take you on a journey through space, tackling the key concepts of astronomy and unlocking the secrets of the sky. From the origins of our Universe to the ever evolving techniques used to explore deep space, A Down to Earth Guide to the Cosmos traces the journey of galactic discovery that has obsessed mankind for thousands of years. Accompanying the narrative, a series of monthly sky guides focus on the astronomical highlights visible at each given time of year, with handy charts to show you exactly what to look for and how to navigate around the sky at night. As fascinating as it is accessible, A Down to Earth Guide to the Cosmos is a must for anyone who gazes up and wishes they knew more about the final frontier...

Lauren Liess, an interior designer and founder of the popular blog Pure Style Home, fuses her love of design and the great outdoors into all her work. In Habitat: The Field Guide to Decorating, her first book, Lauren invites readers to bring nature inside by mixing the textures of natural elements such as wood and stone with eclectic groupings of modern and quirky vintage pieces. Readers will be inspired by the unique style of these rooms, which include lovely framed botanical prints and Liess's own textile patterns inspired by wildflowers and weeds. The book is divided into three sections: Part I focuses on the fundamental elements of design, with each chapter devoted to a particular element, such as color, lighting, and furniture; Part II addresses the intangibles of designing a space, such as aesthetics and creating a mood; and Part III tackles unique room-specific challenges in every part of the house.

If you want methods that won't break your back, are good for the environment, and create high-yielding, beautiful gardens of all shapes and sizes, this is the book for you!

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.
