The Essential Jung Selected Writings

This book is about the individual's journey to psychological wholeness, known in analytical psychology as the process of individuation. Edward Edinger traces the stages in this process and relates them to the search for meaning through encounters with symbolism in religion, myth, dreams, and art. For contemporary men and women, Edinger believes, the encounter with the self is equivalent to the discovery of

God. The result of the dialogue between the ego and the archetypal image of God is an experience that dramatically changes the individual's worldview and makes possible a new and more meaningful way of life.

This volume presents the essentials of Jung's thought in his own words. To familiarize readers with the ideas for which Jung is best known, the British psychiatrist and writer Anthony Storr has selected extracts from Jung's writings that pinpoint his many original contributions and relate the development of his thought to his biography. Dr. Storr has

These notes link the extracts, and with Dr. Storr's introduction, they show the progress and coherence of Jung's ideas, including such concepts as the collective unconscious, the archetypes, introversion and extroversion, individuation, and Jung's view of integration as the goal of the development of the personality.

Addressing this topic from a variety of perspectives and disciplines and with an eye to contemporary social, political, and environmental crises, the contributors aim to clarify some of the epistemological and ethical issues surrounding attempts, such as those of Jung and Deleuze, to think in terms of the whole, whether the whole in question is a particular bounded system (such as an organism, person, society, or ecosystem) or, most broadly, reality as a whole. Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life's work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of

the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, *Man and His Symbols* is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable

insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, *Man and His Symbols* proves to be—decades after its conception—a revelatory, absorbing, and relevant experience. In *Jungian Literary Criticism: the essential guide*, Susan Rowland demonstrates how ideas such as archetypes, the anima and animus, the unconscious and

synchronicity can be applied to the analysis of literature. Jung's emphasis on creativity was central to his own work, and here Rowland illustrates how his concepts can be applied to novels, poetry, myth and epic, allowing a reader to see their personal, psychological and historical contribution. This multidisciplinary and transdisciplinary approach challenges the notion that Jungian ideas cannot be applied to literary studies, exploring Jungian themes in canonical texts by authors including Shakespeare, Jane Austen and W. B. Yeats as well as works by twenty-

first century writers, such as in digital literary art. Rowland argues that Jung's works encapsulate realities beyond narrow definitions of what a single academic discipline ought to do, and through using case studies alongside Jung's work she demonstrates how both disciplines find a home in one another. Interweaving Jungian analysis with literature, Jungian Literary Criticism explores concepts from the shadow to contemporary issues of ecocriticism and climate change in relation to literary works, and emphasises the importance of a reciprocal relationship.

Each chapter concludes with key definitions, themes and further reading, and the book encourages the reader to examine how worldviews change when disciplines combine. The accessible approach of *Jungian Literary Criticism: the essential guide* will appeal to academics and students of literary studies, Jungian and post-Jungian studies, literary theory, environmental humanities and ecocentrism. It will also be of interest to Jungian analysts and therapists in training and in practice. The publication in 2009 of C. G. Jung's *The Red Book: Liber Novus* has initiated a

broad reassessment of Jung's place in cultural history. Among many revelations, the visionary events recorded in the Red Book reveal the foundation of Jung's complex association with the Western tradition of Gnosis. In *The Search for Roots*, Alfred Ribi closely examines Jung's life-long association with Gnostic tradition. Dr. Ribi knows C. G. Jung and his tradition from the ground up. He began his analytical training with Marie-Louise von Franz in 1963, and continued working closely with Dr. von Franz for the next 30 years. examiner of the C. G. Jung Institute in Zurich, where he also served as the Director of Studies. But even more importantly, early in his studies Dr. Ribí noted Jung's underlying roots in Gnostic tradition, and he carefully followed those roots to their source. Alfred Ribí is unique in the Jungian analytical community for the careful scholarship and intellectual rigor he has brought to the study of Gnosticism. In *The Search for Roots*, Ribí shows how a dialogue between Jungian and Gnostic studies can open new perspectives on the experiential nature of Gnosis, both ancient and

modern. Creative engagement with Gnostic tradition broadens the imaginative scope of modern depth psychology and adds an essential context for understanding the voice of the soul emerging in our modern age. A Foreword by Lance Owens supplements this volume with a discussion of Jung's encounter with Gnostic tradition while composing his Red Book (Liber Novus). Dr. Owens delivers a fascinating and historically well-documented account of how Gnostic mythology entered into Jung's personal mythology in the Red Book. Gnostic mythology thereafter became

for Jung a prototypical image of his individuation. Owens offers this conclusion: "In 1916 Jung had seemingly found the root of his myth and it was the myth of Gnosis. I see no evidence that this ever changed. Over the next forty years, he would proceed to construct an interpretive reading of the Gnostic tradition's occult course across the Christian aeon: in Hermeticism, alchemy, Kabbalah, and Christian mysticism. In this vast hermeneutic enterprise, Jung was building a bridge across time, leading back to the foundation stone of classical Gnosticism. The

bridge that led forward toward a new and coming aeon was footed on the stone rejected by the builders two thousand years ago." Alfred Ribi's examination of Jung's relationship with Gnostic tradition comes at an important time. Initially authored prior to the publication of Jung's Red Book, current release of this English edition offers a bridge between the past and the forthcoming understanding of Jung's Gnostic roots.

Memories, Dreams, Reflections is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII Sermones ad Mortuos.
