The sixth gripping thriller in the No.1 bestselling crime series from the award-winning Stuart MacBride. Scotland's finest see first-hand how starting again can be murder... 'MacBride is a damned fine writer' Peter James

By Canada's premier, bestselling crime fiction writer, the twenty-first book in the much-loved Inspector Banks series, now a television series on PBS, for readers of Ian Rankin and Michael Connelly. A disgraced college lecturer is found murdered with £5,000 in his pocket on a disused railway line near his home.

Since being dismissed from his job for sexual misconduct four years previously, he has been living a poverty-stricken and hermi-like existence in this isolated spot. There are many suspects, mostly at the college where he used to teach, but Banks, much to the chagrin of Detective Chief Superintendent Gervaise, soon becomes fixated on Lady Veronica Chalmers, who appears to have links with the victim going back to the early '70s at the University of Essex, then a hotbed of political activism. When Banks suspects that Lady Chalmers is not telling him the whole truth and pushes his inquiries a bit too far, he is brought on the carpet and warned to lay off. He must continue to conduct his investigation surreptitiously, under the radar, with the help of new DC Geraldine Masterson, while DI Annie Cabbot and DS Winsome Jackman continue to rattle skeletons at Eastvale College. When the breakthroughs come, they are not the ones that Banks and his team expected, and everything turns in a different direction, and moves into higher gear.

Provides the final report of the 9/11 Commission detailing their findings on the September 11 terrorist attacks.

WHEN DI SKELGILL IS CALLED to an isolated maximum-security hospital, he catches the eye of a notorious female serial killer. Is this the trigger that turns a routine investigation into a rollercoaster of murder, mayhem, escapes and hostage taking? Are these events purely coincidental, or is some conspiracy afoot? And if so, is it blackmail, corruption, a power struggle... or something altogether more sinister? In this, the sixth stand-alone Inspector Skelgill mystery, while search teams comb the moorland for clues, the maverick Cumbrian detective finds his mental sinews stretched to the limit as he strives to solve the case.

Great Britain is going through austerity. Those affected worst are the poorest and most vulnerable people in society. People who have nothing, are having the tiny amount of money they receive in benefits taken away by a spiteful government hell bent on protecting the very wealthiest, and savagely attacking the very poorest. But the problem is being ignored, or overlooked by the British public, largely due to a corrupt system where most of the media is controlled by the same wealthy people that the government pander to. In Manchester, it seems that one man is determined to put this issue right in the spotlight. His methods are met with disgust and outrage by the population, as he attacks DWP staff from behind as they leave their work, causing them life-changing injuries which shock and upset the entire nation. The DWP workers refuse to show up for work, and the whole British welfare system is thrown into chaos. Pensions and benefit payments aren't being processed and this looks like the biggest crisis to hit the blundering, incompetent government, since the last one. DCI Andy Miller is handed an open cheque-book, and all the resources that he needs to bring this shocking crime-wave to a swift conclusion. The government announce that extra officers are being used. But in austerity Britain, there are no extra officers. Only tired, under-paid and frustrated ones who hate the government just as much as the attacker seems to. Miller and his team are going to have to dig deep and come up with something extra special in order to put a stop to this madness. THE FINAL CUT, the 5th DCI Miller adventure. In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped ("poorly wired") to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.
