In 1880 the continent of Africa was largely unexplored by Europeans. Less than thirty years later, only Liberia and Ethiopia remained unconquered by them. The rest - 10 million square miles with 110 million bewildered new subjects - had been carved up by five European powers (and one extraordinary individual) in the name of Commerce, Christianity, 'Civilization' and Conquest. The Scramble for Africa is the first full-scale study of that extraordinary episode in history.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some

Perceptions of Africa have changed dramatically. Viewed as a continent of wars, famines and entrenched poverty in the late 1990s, there is now a focus on

“ Africa rising † ? and an “ African 21st century. † ? Two decades of unprecedented economic growth in Africa should have brought substantial improvements in well-being. Whether or not they did, remains unclear given the poor quality of the data, the nature of the growth process (especially the role of natural resources), conflicts that affect part of the region, and high population growth. Poverty in a Rising Africa documents the data challenges and systematically reviews the evidence on poverty from monetary and nonmonetary perspectives, as well as a focus on dimensions of inequality. Chapter 1 maps out the availability and quality of the data needed to track monetary poverty, reflects on the governance and political processes that underpin the current situation with respect to data production, and describes some approaches to addressing the data gaps. Chapter 2 evaluates the robustness of the estimates of poverty in Africa. It concludes that poverty reduction in Africa may be slightly greater than traditional estimates suggest,

although even the most optimistic estimates of poverty reduction imply that more people lived in poverty in 2012 than in 1990. A broad-stroke profile of poverty and trends in poverty in the region is presented. Chapter 3 broadens the view of poverty by considering nonmonetary dimensions of well-being, such as education, health, and freedom, using Sen's (1985) capabilities and functioning approach. While progress has been made in a number of these areas, levels remain stubbornly low. Chapter 4 reviews the evidence on inequality in Africa. It looks not only at patterns of monetary inequality in Africa but also other dimensions, including inequality of opportunity, intergenerational mobility in occupation and education, and extreme wealth in Africa.

By the time the "Scramble for Africa" among European colonial powers began in the late nineteenth century, Africa had already been globally connected for centuries. Its gold had fueled the economies of Europe and the Islamic world for nearly a millennium, and the sophisticated kingdoms spanning its west coast had traded with Europeans since the fifteenth century. Until at least 1650, this was a trade of equals, using a variety of currencies—most importantly, cowrie shells imported from the Maldives and nzimbu shells imported from Brazil. But, as the slave trade grew, African kingdoms began to lose prominence in the growing global economy. We have been living with the effects of this shift ever since. With A Fistful of Shells, Toby Green transforms our view of West and West-Central Africa by reconstructing the world of these kingdoms, which revolved around trade, diplomacy, complex religious beliefs, and the production of art. Green shows how the slave trade led to economic disparities that

caused African kingdoms to lose relative political and economic power. The concentration of money in the hands of Atlantic elites in and outside these kingdoms brought about a revolutionary nineteenth century in Africa, parallel to the upheavals then taking place in Europe and America. Yet political fragmentation following the fall of African aristocracies produced radically different results as European colonization took hold. Drawing not just on written histories, but on archival research in nine countries, art, oral history, archaeology, and letters, Green lays bare the transformations that have shaped world politics and the global economy since the fifteenth century and paints a new and masterful portrait of West Africa, past and present. Africa has been coveted for its riches ever since the era of the Pharoahs. In past centuries, it was the lure of gold, ivory and slaves that drew fortune-seekers, merchant-adventurers and conquerors from afar. In modern times, the focus of attention is on oil, diamonds and other valuable minerals. Land was another prize. The Romans relied on their colonies in north Africa for vital grain shipments to feed the population of Rome. Arab invaders followed in their wake, eventually colonising the entire region. In modern times, foreign corporations

have acquired huge tracts of land to secure food supplies needed abroad, just as the Romans did. In this vast and vivid panorama of history, Martin Meredith follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonisation. He examines too the fate of modern African states and concludes with a glimpse of their future. His cast of characters includes religious leaders, mining magnates, warlords, dictators and many other legendary figures, among them Mansa Musa, ruler of the medieval Mali empire, said to be the richest man the world has ever known. Making Africa Work

Africa's New Oil

Poverty in a Rising Africa

From New York Times bestselling author and economics columnist Robert Frank, a compelling book that explains why the rich underestimate the importance of luck in their success, why that hurts everyone, and what we can do about it How important is luck in economic success? No question more reliably divides conservatives from liberals. As conservatives correctly observe, people who amass great fortunes are almost always talented and hardworking. But liberals are also correct to note that countless others have those same qualities yet never earn much. In recent years, social scientists have discovered that chance plays a much larger role in important life outcomes than most people imagine. In *Success and Luck*, bestselling author and New York Times economics columnist Robert Frank explores the surprising implications of those findings to show why the rich underestimate the importance of luck in success—and why that hurts everyone, even the wealthy. Frank describes how, in a world increasingly dominated by

winner-take-all markets, chance opportunities and trivial initial advantages often translate into much larger ones—and enormous income differences—over time; how false beliefs about luck persist, despite compelling evidence against them; and how myths about personal success and luck shape individual and political choices in harmful ways. But, Frank argues, we could decrease the inequality driven by sheer luck by adopting simple, unintrusive policies that would free up trillions of dollars each year—more than enough to fix our crumbling infrastructure, expand healthcare coverage, fight global warming, and reduce poverty, all without requiring painful sacrifices from anyone. If this sounds implausible, you'll be surprised to discover that the solution requires only a few, noncontroversial steps. Compellingly readable, *Success and Luck* shows how a more accurate understanding of the role of chance in life could lead to better, richer, and fairer economies and societies.

Intended for those interested in the African continent and the diversity of human history, this work looks at Africa's past and reflects on the changing ways it has been imagined and represented. It illustrates key themes in modern thinking about Africa's history with a range of historical examples.

Figures Between the years of 1830 and 1927, as the last generation of blacks born into slavery was reaching maturity, a small group of industrious, tenacious, and daring men and women broke new ground to attain the highest levels of financial success. Mary Ellen Pleasant, used her Gold Rush wealth to further the cause of abolitionist John Brown. Robert Reed Church, became the largest landowner in Tennessee. Hannah Elias, the mistress of a New York City millionaire, used the land her lover gave her to build an empire in Harlem. Orphan and self-taught chemist Annie Turnbo-Malone, developed the first national brand of hair care products. Mississippi school teacher O. W. Gurley, developed a piece of Tulsa, Oklahoma, into a “town” for wealthy black professionals and craftsmen that would become known as “the Black Wall Street.” Although Madam C. J Walker was given the title of America’s first female black millionaire, she was not. She was the first, however, to flaunt and openly claim her wealth—a dangerous and revolutionary act. Nearly all the unforgettable personalities in this amazing collection were often attacked, demonized, or swindled out of their wealth. Black Fortunes illuminates as never before the birth of the black business titan.

Africa does not give up its secrets easily. Buried there lie answers about the origins of humankind and the dawn of civilisation. Through a century of archaeological investigation, scientists have transformed our understanding of the beginnings of human life, although vital clues still remain hidden. In Born in Africa, Martin Meredith follows the trail of discoveries about our human origins made by scientists over the last hundred years, as well as describing the history of scholarship in this incredibly exciting field. He relates the intense rivalries, personal feuds and fierce controversies that shaped the study and perception of Africa, and recounts the feats of skill and endurance that have illuminated thousands of years of human evolution. The results have been momentous. Scientists have identified more than twenty species of extinct humans and firmly established Africa as the birthplace not only of humankind, but also of our own species: homo sapiens, the modern human. Scientific study has revealed how early technology, language ability and artistic endeavour all originated in Africa, and

scientists have shown how, in an exodus sixty thousand years ago, small groups of Africans left their birthplace to populate the rest of the world. We all have an African legacy, and in this fascinating and informative book Martin Meredith leads us back to the place where we have rediscovered our common human heritage.

In this vast and vivid panorama of history, Martin Meredith, bestselling author of The State of Africa, follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonisation. This book showcases new research by emerging and established scholars on white workers and the white poor in Southern Africa. Rethinking White Societies in Southern Africa challenges the geographical and chronological limitations of existing scholarship by presenting case studies from Angola, Mozambique, South Africa, Zambia and Zimbabwe that track the fortunes of nonhegemonic whites during the era of white minority rule. Arguing against prevalent understandings of white society as uniformly wealthy or culturally homogeneous during

this period, it demonstrates that social class remained a salient element throughout the twentieth century, how Southern Africa's white societies were often divided and riven with tension and how the resulting social, political and economic complexities animated white minority regimes in the region. Addressing themes such as the class-based disruption of racial norms and practices, state surveillance and interventions – and their failures – towards nonhegemonic whites, and the opportunities and limitations of physical and social mobility, the book mounts a forceful argument for the regional consideration of white societies in this historical context. Centrally, it extends the path-breaking insights emanating from scholarship on racialized class identities from North America to the African context to argue that race and class cannot be considered independently in Southern Africa. This book will be of interest to scholars and students of southern African studies, African history, and the history of race.

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, How Europe Underdeveloped Africa, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

AFRICA IS FAILING. AFRICA IS SUCCEEDING. Africa is betraying its citizens. Africa is a place of starvation, corruption, disease. African economies are soaring faster than any on earth. Africa is squandering its bountiful resources. Africa is a roadmap for global development. Africa is turbulent. Africa is stabilising. Africa is doomed. Africa is the future. All of these pronouncements prove equally true and false, as South African journalists Richard Poplak and Kevin Bloom discover on their 9-year roadtrip through the paradoxical continent they call home. From pillaged mines in Zimbabwe to the creation of an economic marketplace in Ethiopia; from Namibia's middle class to the technological challenges facing Nollywood in the 21st Century; from China's investment in Botswana to the rush for resources in the Congo; and from the birth of Africa's newest country, South Sudan, to the worsening conflict in CAR, here are eight adventures on the trail of a new Africa. Part detective story, part report from this economic frontier, Continental Shift follows the money as it flows through Chinese coffers to international conglomerates, to heads of state, to ordinary African citizens, all of whom are intent on defining a metamorphosing continent. psychic makes a startling prediction about their lives. Everyone in Orange County's Little Saigon knew that the Duong sisters were cursed. It started with their ancestor, Oanh, who dared to leave her marriage for true love—so a fearsome Vietnamese witch cursed Oanh and her descendants so that they would never find love or happiness, and the Duong women would give birth to daughters, never sons. Oanh's current descendant Mai Nguyen knows this curse well. She's divorced, and after an explosive disagreement a decade ago, she's estranged from her younger sisters, Minh Pham (the middle and the mediator) and Khuyen Lam (the youngest who swears she just runs humble coffee shops and nail salons, not Little Saigon's underground). Though Mai's three adult daughters, Priscilla, Thuy, and Thao, are successful in their careers (one of them is John Cho's dermatologist!), the same can't be said for their love lives. Mai is convinced they might drive her to an early grave. Desperate for guidance, she consults Auntie Hua, her trusted psychic in Hawaii, who delivers an unexpected prediction: this year, her family will witness a marriage, a funeral, and the birth of a son. This prophecy will reunite estranged mothers, daughters, aunts, and cousins—for better or for worse. A multi-narrative novel brimming with levity and candor, The Fortunes of Jaded Women is about mourning, meddling, celebrating, and healing together as a family. It shows how Vietnamese women emerge victorious, even if the world is against them.

For too long Africa's mineral fortune has been lamented as a resource curse that has led to conflict rather than development for much of the continent. Yet times are changing and the opportunities to bring technical expertise on modern mining alongside appropriate governance mechanisms for social development are becoming more accessible in Africa. This book synthesizes perspectives from multiple disciplines to address Africa ' s development goals in relation to its mineral resources. The authors cover ways of addressing a range of policy challenges, environmental concerns, and public health impacts and also consider the role of globalization within the extractive industries. Academic research is coupled with key field vignettes from practitioners exemplifying case studies throughout. The book summarizes the challenges of natural resource governance, suggesting ways in which mining can be more effectively managed in Africa. By providing an analytical framework it highlights the essential intersection between natural and social sciences, central to efficient and effective

This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "Eloise." The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Gruelle.

The Next Africa, an Axiom Best Business Book Award winner, will change the way people think about the continent. The old

narrative of an Africa disconnected from the global economy, depicted by conflict or corruption, and heavily dependent on outside donors is fading. A wave of transformation driven by business, modernization, and a new cadre of remarkably talented Africans is thrusting the continent from the world's margins to the global mainstream. In the coming decades the magnitude of Africa's markets and rising influence of its people will intersect with other key trends to shape a new era, one in which Africa's progress finally overshadows its challenges, transforming an emerging continent into a global powerhouse. The Next Africa captures this story. Authors Jake Bright and Aubrey Hruby pair their collective decades of Africa experience with several years of direct research and interviews. Packed with profiles; personal stories, research and analysis, The Next Africa is a paradigm-shifting guide to the events, trends, and people reshaping Africa's relationship to the world. Bright and Hruby detail the cross-cutting trends prompting Silicon Valley venture capital funds and firms like GE, IBM, and Proctor & Gamble to make major investments in African economies, while

describing how Africans are stimulating Milan runways, Hollywood studios, and London pop charts. The Next Africa introduces readers to the continent's burgeoning technology movement, rising entrepreneurs, groundbreaking philanthropists, and cultural innovators making an impact in music, fashion, and film. Bright and Hruby also connect Africa's transformation to its contemporary immigrant diaspora, illustrating how this increasingly affluent group will serve as the thread that pulls the continent's success together. Finally, The Next Africa suggests a fresh framework for global citizens, public policy-makers, and CEOs to approach Africa. It will no longer be "The Hopeless Continent", nor will it become an overnight utopia. Bright and Hruby offer a more nuanced, net-sum, and data-rich approach to analyzing an increasingly complex continent, reconciling its continued challenges with rapid progress. The Next Africa describes a future of a more globally-connected Africa where its leaders and citizens wield significant economic, cultural, and political power--a future in which Americans will be more likely to own African stocks,

work for companies doing business in Africa, buy African hits from iTunes, see Nigerian actors win Oscars, and learn new African names connected to tech moguls and billionaires. The development of Africa's oil has greatly accelerated in recent years, with some countries looking at the prospect of almost unimaginable flows of money into their national budgets. But the story of African oil has usually been associated with conflict, corruption and disaster, with older producers such as Nigeria having little to show for the many billions of dollars they've earned. In this eye-opening book, former BBC correspondent Celeste Hicks questions the inevitability of the so-called resource curse, revealing what the discovery of oil means for ordinary Africans, and how China's involvement could mean a profound change in Africa's relationship with the West. A much-needed account of an issue that will likely transform the fortunes of a number of African countries - for better or for worse. This fourth edition of this best-selling core history textbook offers a richly illustrated, single volume, narrative introduction

to African history, from a hugely respected authority in the field. The market-leading range of illustrated material from prior editions is now further improved, featuring not only additional and redrawn maps and a refreshed selection of photographs, but the addition of full colour to make these even more instructive, evocative and attractive. Already hugely popular on introductory African History courses, the book has been widely praised for its engaging and readable style, and is unrivalled in scope, both geographically and chronologically - while many competitors limit themselves to certain regions or eras, Shillington chronicles the entire continent, from prehistory right up to the present day. For this new edition, both content and layout have been thoroughly refreshed and restructured to make this wealth of material easily navigable, and even more appealing to students unfamiliar with the subject. New to this Edition: - Now in full colour with fresh new design - Part structure and part intros added to help navigation - New and improved online resources include a new testbank, interactive timelines, lecturer slides, debates In African history,

Africa is forever on our TV screens, but the bad-news stories (famine, genocide, corruption) massively outweigh the good (South Africa). Ever since the process of decolonialisation began in the mid-1950s, and arguably before, the continent has appeared to be stuck in a process of irreversible decline. Constant war, improper use of natural resources and misappropriation of revenues and aid monies contribute to an impression of a continent beyond hope. How did we get here? What, if anything, is to be done? Weaving together the key stories and characters of the last fifty years into a stunningly compelling and coherent narrative, Martin Meredith has produced the definitive history of how European ideas of how to organise 10,000 different ethnic groups has led to what Tony Blair described as the 'scar on the conscience of the world'. According to the federal Office of Minority Health, African Americans “ are affected by serious diseases and health conditions at far greater rates than other Americans. ” In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. Reclaiming Our Health begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. In Zimbabwe, Darling and her friends steal guavas, try to get the baby out of young Chipo's belly, and grasp at memories of Before. Before their homes were destroyed by paramilitary policemen, before the school closed, before the fathers left for dangerous jobs abroad. But Darling has a chance to escape: she has an aunt in America. She travels to this new land in search of America's famous abundance only to find that her options as an immigrant are perilously few. No Violet Bulawayo's debut calls to mind the great storytellers of displacement and arrival who have come before her--from Junot Diaz to Zadie Smith to J.M. Coetzee--while she tells a vivid, raw story all her own.

Shapiro, the author of "Black Wealth/White Wealth, " blends personal stories, interviews, empirical data, and analysis to illuminate how family assets produce dramatic consequences in the everyday lives of ordinary citizens.

The life of the eighteenth-century African prince who, after being captured by slave traders, was brought to Massachusetts where he was a slave until he was able to buy his freedom at the age of sixty.

An investigative journey into the ways the resource trade wreaks havoc on Africa. 'The Looting Machine' sheds light on the shadowy networks that connect Goldman Sachs, BP, the Hong Kong underworld and the murderous cabals that rule some oil states.

Sub-Saharan Africa faces three big inter-related challenges over the next generation. It will double its population to two billion by 2045. By then more than half of Africans will be living in cities. And this group of mostly young people will be connected with each other and the world through mobile devices. Properly harnessed and planned for, this is a tremendously positive force for change. Without economic growth and jobs, it could prove a political and social catastrophe. Old systems of patronage and of muddling through will no longer work because of these population increases. Instead, if leaders want to continue

Africa has been coveted for its riches ever since the era of the Pharaohs. In past centuries, it was the lure of gold, ivory, and slaves that drew fortune-seekers, merchant-adventurers, and conquerors from afar. In modern times, the focus of attention is on oil, diamonds, and other valuable minerals. Land was another prize. The Romans relied on their

colonies in northern Africa for vital grain shipments to feed the population of Rome. Arab invaders followed in their wake, eventually colonizing the entire region. More recently, foreign corporations have acquired huge tracts of land to secure food supplies needed abroad, just as the Romans did. In this vast and vivid panorama of history, Martin Meredith follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonization. He examines, too, the fate of modern African states and concludes with a glimpse of their future. His cast of characters includes religious leaders, mining magnates, warlords, dictators, and many other legendary figures--among them Mansa Musa, ruler of the medieval Mali empire, said to be the richest man the world has ever known. "I speak of Africa," Shakespeare wrote, "and of golden joys." This is history on an epic

scale.

A member of the unique generation of African writers and intellectuals who came of age in the last days of colonialism, Wole Soyinka has witnessed the promise of independence and lived through postcolonial failure. He deeply comprehends the pressing problems of Africa, and, an irrepressible essayist and a staunch critic of the oppressive boot, he unhesitatingly speaks out. In this magnificent new work, Soyinka offers a wide-ranging inquiry into Africa's culture, religion, history, imagination, and identity. He seeks to understand how the continent's history is entwined with the histories of others, while exploring Africa's truest assets: "its humanity, the quality and valuation of its own existence, and modes of managing its environment—both physical and intangible (which includes the spiritual)." Fully grasping the extent of Africa's most challenging issues, Soyinka nevertheless refuses defeatism. With eloquence he analyzes problems ranging from the meaning of the past to the threat of theocracy. He asks hard

questions about racial attitudes, inter-ethnic and religious violence, the viability of nations whose boundaries were laid out by outsiders, African identity on the continent and among displaced Africans, and more. Soyinka's exploration of Africa relocates the continent in the reader's imagination and maps a course toward an African future of peace and affirmation.

Presents a narrative of the last fifty years of African history, analyzing the factors which account for the political chaos, financial troubles, and civil wars which prevail in many African countries today.
