the life she wants. She's come a long way from the small town where she grew up—she graduated from college, moved to Boston, and started her own business. And when she feels a spark with a gorgeous neurosurgeon named Ryle Kincaid, everything in Lily's life seems too good to be true. Ryle is assertive, stubborn, maybe even a little arrogant. He's also sensitive, brilliant, and has a total soft spot for Lily. And the way he looks in scrubs certainly doesn't hurt. Lily can't get him out of her head. Preparing the next generation to inherit the family enterprise is the single most important determinant of a successful generational handoff. It depends significantly on both the senior generation and junior generation taking active roles in the preparation process.

Specifically, what can each generation do to help develop the next generation? What does each generation want from the other throughout this journey? These and related questions have been discussed by families from around the world every year since 1997 at

the Families in Business program at Harvard Business School. Next Generation Success offers a convenient summary of these rich conversations between senior and junior generation members regarding what each generation can do to help the next generation develop as effective managers, owners and family members. The perspectives of both generations are compared over a 10 year period. Included are Professor John Davis' candid letters to both generations offering wisdom on managing the challenges-and enjoying the rewards-of successfully transitioning the family enterprise to the next generation.

An “intriguing and accessible” (Publishers Weekly)

interpretation of the life of Galileo Galilei, one of history’s greatest and most fascinating scientists, that sheds new light on his discoveries and how he was challenged by science

deniers. “We really need this story now, because we’re living through the next chapter of science denial” (Bill McKibben). Galileo’s story may be more relevant today than ever before. At present, we face enormous crises—such as minimizing the dangers of climate change—because the science behind these threats is erroneously questioned or ignored. Galileo encountered this problem 400 years ago. His discoveries, based on careful observations and ingenious experiments, contradicted conventional wisdom and the teachings of the church at the time.

Consequently, in a blatant assault on freedom of thought, his books were forbidden by church authorities.

Astrophysicist and bestselling author Mario Livio draws on his own scientific expertise and uses his “gifts as a great storyteller” (The Washington Post) to provide a “refreshing perspective” (Booklist) into how Galileo reached his bold new conclusions about the cosmos and the laws of nature. A freethinker who followed the evidence wherever it led him, Galileo was one of the most significant figures behind the scientific revolution. He believed that every educated

person should know science as well as literature, and insisted on reaching the widest audience possible, publishing his books in Italian rather than Latin. Galileo was put on trial with his life in the balance for refusing to renounce his scientific convictions. He remains a hero and inspiration to scientists and all of those who respect science—which, as Livio reminds us in this “admirably clear and concise” (The Times, London) book, remains threatened everyday. From Facebook to Talking Points Memo to the New York Times, often what looks like fact-based journalism is not.

It's advertising. Not only are ads indistinguishable from reporting, the Internet we rely on for news, opinions and even impartial sales content is now the ultimate corporate tool. Reader beware: content without a corporate sponsor lurking behind it is rare indeed. Black Ops Advertising dissects this rapid rise of "sponsored content," a strategy whereby advertisers have become publishers and publishers create advertising—all under the guise of unbiased information. Covert selling, mostly in the form of native advertising and content marketing, has so

blurred the lines between editorial content and marketing message that it is next to impossible to tell real news from paid endorsements. In the 21st century, instead of telling us to buy, buy, BUY, marketers “engage” with us so that we share, share, SHARE—the ultimate subtle sell. Why should this concern us? Because personal data, personal relationships, and our very identities are being repackaged in pursuit of corporate profits. Because tracking and manipulation of data make “likes” and tweets and followers the currency of importance, rather than

scientific achievement or artistic talent or information the electorate needs to fully function in a democracy. And because we are being manipulated to spend time with technology, to interact with “friends,” to always be on, even when it is to our physical and mental detriment. The Golden Handoff changed the real estate industry by giving agents a simple and proven method to buy or sell their business.
