Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

A no-nonsense plan that has been proven and tested by more than 300,000 people in 154 countries. Whether you want to shed 10 pounds or 100, whether you want to build muscle or just look more toned, this book is the original "bible of fitness" that shows you how to get permanent results the safe, healthy, and natural way. Do you want to shed fat and sculpt a new body shape at the same time? Do you want a program without gimmicks, hype, or quick fixes? Do you want a program guaranteed to work, no matter how old you are or what kind of shape you're in now? For twenty-five years, industry veteran and bestselling author Tom Venuto has built a reputation as one of the world's most respected fat-loss experts. In Burn the Fat, Feed the Muscle—known by fans as "the bible of fat loss"—Tom reveals the body transformation secrets of the leanest people in the world. This is not a diet and it's not just a weight-loss program; this is a breakthrough system to change your life and get you leaner, stronger, fitter, and healthier with the latest discoveries in exercise and nutrition science. Inside, you'll discover: - The simple but powerful LEAN formula, revealing the four crucial elements of body transformation success. - The New Body 28 (TNB-28): a four-week training plan for sculpting lean muscle, plus a quick start primer workout perfect for beginners - A lifestyle program that's more flexible and easier than ever to follow, even if you are busy, have dietary restrictions, or have never worked out before. - The motivation strategies it takes to stick with your plan. Burn the Fat, Feed the Muscle is not about getting as ripped as a fitness model or becoming a bodybuilder like Tom did (unless you want to); it's about using their secrets to achieve your own personal goals. You are sure to call it your fitness bible for many years to come.

What if you could lose as much weight as you wanted Without spending money on pills, powders, weird diet food, or even exercise? The Code Red Revolution is all about taking your life back by eating real food and giving your body what it needs- water, Real Food, and plenty of sleep. Maintaining a healthy weight doesn't have to be complicated. In fact, when you keep it simple and just follow a few basic rules, the weight comes off naturally (even if you have health challenges). Most weight-loss books and plans teach you one magical way to lose weight, but they don't take into account just how wonderfully individual we all are. This book shows you how to integrate the simple-but-effective program recommendations into your daily life. Stay-at-home parent cooking for fussy eaters? We gotcha covered. Travel for work and are rarely home to cook? You can absolutely learn how to eat in restaurants and still lose weight. Allergic to certain types of foods? We can work with that. Couch potato? No problem! Vegetarian (or a really-hate-vegetables-tarian)? You can do this. Thousands of people around the world have already lost 10, 50, even 100 pounds with the Code Red Lifestyle. And they've kept the weight off for Years. Isn't it time you learned the secret to lasting weight loss? Make this time the last time you have to lose weight. Book jacket.

Remember: It ' s Your Body and You Do Have Choices Beginning in 2011, journalist and health coach Laura Bond and her mother Gemma visited 60 of the world ' s foremost cancer specialists and healers who are getting remarkable results in treating cancer without radiation or chemotherapy. This book shares the most exciting discoveries they made in their travels. You ' ll read about everything from hydrogen peroxide therapies and juiced cannabis to high-dose vitamin C, coffee enemas (The Gerson Method), eliminating sugar from the diet, drinking green vegetable juices, and infrared saunas. Quick to point out that every cancer and every body is different, Bond does not offer a one-size-fits-all approach but throw the doors open wide to thinking about your treatment options—and even about cancer itself—in a whole new light. This book points the way toward making informed choices, based on information, not fear. Whether you are exploring treatment options, looking to build your body ' s own resources to heal and restore itself, hoping to find ways to supplement conventional care, or all of the above, look no further. This is the book you need.

From the physician behind the wildly popular NutritionFacts website, How Not to Die reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, How Not to Die includes Dr. Greger's Daily Dozen—a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

"The New Primal Blueprint serves as the ultimate road map for anyone wishing to make the shift from flawed conventional wisdom about diet and exercise to a healthy, happy empowering lifestyle patterned after the evolutionary-tested behaviors of our hunter-gatherer ancestors. The book details the ten immutable Primal Blueprint lifestyle laws that enable empower you to reprogram your genes to direct in the direction of weight loss, health, and longevity. The Primal Blueprint laws are validated by two million years of human evolution as well as an ever-expanding body of contemporary scientific research. Sisson's philosophy was originally met with skepticism as he aggressively challenged numerous mainstream health tenets. Eight years later, mainstream medical and health science are validating the Primal Blueprint tenets assertions that a high-carb, grain-based diet will make you fat, tired, and sick; that a consistent routine of medium-to-difficult cardiovascular workouts can actually compromise your health and longevity and increase risk of heart disease; and that consuming (whole food sources of) fat and cholesterol does not lead to heart disease as we have been led to believe, but rather offers many health benefits." -- Offers an accelerated program designed to help readers lose weight quickly and keep it off, in a guide that features menus, exercise routines, and stress reduction techniques.

How Thousands of People Are Losing Weight and Keeping It Off Without Pills, Shakes, Diet Foods, Or Exercise

We as primates have struggled mightily during the past 85 million years to find and eat enough food for survival. Fortunately, every one of your ancestors was successful so that you might succeed in that same endeavor. However, today that survival is in jeopardy. Recently and suddenly, from an evolutionary standpoint, the problem of subsistence in "civilized" countries has inverted: we have plenty of food but are not making selections that lead to long-term survival. Our plant-based ancestral diets for which we have become genetically adapted have become animal-based. For thousands of millennia, primate nutrition happened while seeking a wide variety fruits and vegetables sufficiently energy-dense to supply our needed daily calories. Today we still seek energy-dense foods, but in the form of high fat animal products or sweet processed foods. Nutrient-dense foods, formerly our staples, are tolerated as side-dishes. Taste, the most primitive of our senses, over the eons existed for our survival (as all the other senses), that is, to deselect plants sufficiently bitter as likely toxic or non-digestible. With the expansion of our brain capacity, taste was joined by higher brain regions' appreciation of flavor. The result is a demand for flavorful energy-dense foods. Every meal experience must "taste good." Dietary patterns based on such flavorful energy-dense foods has led to chronic inflammatory states with high morbidity and mortality in the Western world. This book suggests a return to our true ancestral dietary patterns, supplemented by what is known from the latest scientific research concerning nutritional health. It is clear that we have evolved to be quite versatile eaters and while we can eat a variety of foods, a whole-food varied plant-based diet is best for our long-term survival as healthy and happy primates. Following the high nutrient density to energy density ratio, we recommend a dietary emphasis on green vegetables, particularly leaves, followed by all colors of vegetables, beans/legumes, then underground storage organs followed by a modicum of grains, nuts, and seeds. Personal opinions have been kept to a minimum. Most of the information presented herein is from recent peer reviewed scientific sources. For improved readability, these have been collected at the end of the book for each chapter section and subsection.

A groundbreaking guide to your gut Most people understand the importance of a healthy gut microbiome for digestive health and overall wellbeing. But what about the mycobiome—the fungi that live inside our bodies? Here, Dr. Mahmoud Ghannoum introduces this important component of the microbiome and explains how diet affects this population and how its balance or imbalance can cause you to feel—a poor balance of fungi can lead to weight gain, pain and bloating, and low energy, and can worsen symptoms for those with IBS or Crohn's. Good news: Gut fungi respond quickly and dramatically to dietary and lifestyle changes. Within 24 hours, you can remake your mycobiome, supporting a path to weight loss, better digestion, and more energy. Alongside this accessible gut science, Ghannoum outlines fast changes for fostering healthy fungi as well as 7- and 20-day diet plans, with more than 50 dietician-tested recipes, to cultivate a thriving mycobiome and methods for tweaking your lifestyle for long-term gut health. The instant New York Times, USA Today, and Publisher's Weekly bestseller A bold new plant-based plan that challenges popular keto and paleo diets, from an award-winning gastroenterologist. The benefits of restrictive diets like paleo and keto have been touted for more than a decade, but as renowned gastroenterologist Dr. Will Bulsiewicz, or "Dr. B," illuminates in this groundbreaking book, the explosion of studies on the microbiome makes it abundantly clear that elimination diets are in fact hazardous to our health. What studies clearly now show--and what Dr. B preaches with his patients--is that gut health is the key to boosting our metabolism, balancing our hormones, and taming the inflammation that causes a host of diseases. And the scientifically proven way to fuel our guts is with dietary fiber from an abundant variety of colorful plants. Forget about the fiber your grandmother used to take--the cutting-edge science on fiber is incredibly exciting. As Dr. B explains, fiber energizes our gut microbes to create powerhouse postbiotics called short-chain fatty acids (SCFAs) that are essential to our health. SCFAs are scientifically proven to promote weight loss, repair leaky gut, strengthen the microbiome, optimize the immune system, reduce food sensitivities, lower cholesterol, reverse type 2 diabetes, improve brain function, and even prevent cancer. Restrictive fad diets starve the gut of the critical fiber we need, weaken the microbes, and make our system vulnerable. As a former junk-food junkie, Dr. B knows firsthand the power of fiber to dramatically transform our health. The good news is that our guts can be trained. Fiber-rich, real foods--with fruits, vegetables, whole grains, seeds, nuts, and legumes--start working quickly and maintain your long-term health, promote weight loss, and allow you to thrive and feel great from the inside out. With a 28-day jumpstart program with menus and more than 65 recipes, along with essential advice on food sensitivities, Fiber Fueled offers the blueprint to start turbocharging your gut for lifelong health today.

The New Mediterranean Diet Cookbook is your guidebook to the ultimate superdiet, an evidence-based keto diet that emphasizes a diversity of fish, healthy fats, and a rainbow of colorful vegetables—with 100 delicious recipes for everything from snacks to dinner. The Mediterranean diet has long been touted as one of the world's healthiest diets, renowned for its protective effects against heart disease, cancer, and other chronic illnesses. However, its heavy inclusion of grains and carbohydrates can contribute to obesity and is a drawback for many. Also shown to have many health benefits, the ketogenic diet stimulates the fat-burning and longevity-promoting state of ketosis by limiting carbs and emphasizing high-fat foods. While the keto diet is about the proportion of macronutrients (fats, protein, carbohydrates) in the food you eat, the Mediterranean diet is about specific food types: seafood, olive oil, colorful vegetables, and other anti-inflammatory foods. This book is about living and eating at the intersection of these complementary diets so you can reap the benefits of both. While both diets advocate significant amounts of healthy fats and protein, The new Mediterranean approach to keto significantly shifts the fat profile of the diet to emphasize the monounsaturated and omega-3 fats that health experts agree promote living a long disease-free life. It also includes colorful vegetables, providing a diversity of nutrients and flavor. The result is an enhanced Mediterranean diet that stokes metabolism, supports the gut and microbiome, and is anti-inflammatory, anti-aging, and nutrient-dense. Improve your overall health while enjoying delectable dishes including: Superfood Shakshuka Blender Cinnamon Pancakes with Cacao Cream Topping Green Goddess Salad Pancetta Wrapped Sea Bass Sheet Pan Crispy Salmon Piccata Fierce Meatball Zoodle Bolognese Nordic Stone Age Bread Chocolate Hazelnut "Powerhouse" Truffles With The New Mediterranean Diet Cookbook, you'll learn how to balance your macronutrients, what foods are considered the new Mediterranean superfoods, and how to make tasty dishes to keep you satisfied all day.

The New Ancestral Diet

The Blue Zones Solution

The Omni Diet

A self-published phenomenon examining the habits that kept our ancestors disease-free—now with a prescriptive plan for “The Human Diet” to help us all live long, vital, healthy lives. Physician and biochemist Cate Shanahan, M.D. examined diets around the world known to help people live longer, healthier lives—diets like the Mediterranean, Okinawa, and “Blue Zone”—and identified the four common nutritional habits, developed over millennia, that unfailingly produce strong, healthy, intelligent children, and active, vital elders, generation after generation. These four nutritional strategies—fresh food, fermented and sprouted foods, meat cooked on the bone, and organ meats—form the basis of what Dr. Cate calls “The Human Diet.” Rooted in her experience as an elite athlete who used traditional foods to cure her own debilitating injuries, and combining her research with the latest discoveries in the field of epigenetics, Dr. Cate shows how all calories are not created equal; food is information that directs our cellular growth. Our family history does not determine our destiny: what you eat and how you live can alter your DNA in ways that affect your health and the health of your future children. Deep Nutrition offers a prescriptive plan for how anyone can begin eating The Human Diet to:

- *Improve mood
- *Eliminate cravings and the need to snack
- *Boost fertility and have healthier children
- *Sharpen cognition and memory
- *Eliminate allergies and disease
- *Build stronger bones and joints
- *Get younger, smoother skin

Deep Nutrition cuts through today's culture of conflicting nutritional ideologies, showing how the habits of our ancestors can help us lead longer, healthier, more vital lives.

Easy, customizable plans (2-day, 7-day, and longer) to rid your diet of the acidic foods (sugar, dairy, gluten, excess animal proteins, processed foods) that cause inflammation and wreak havoc on your health. Let's talk about the four-letter word that's secretly destroying your health: ACID. An acidic lifestyle -- consuming foods such as sugar, grains, dairy, excess animal proteins, processed food, artificial sweeteners, along with lack of exercise and proper hydration, and stress -- causes inflammation. And inflammation is the culprit behind many of our current ailments, from weight gain to chronic disease. But there's good news: health visionary Dr. Daryl Gioffre shares his revolutionary plan to rid your diet of highly acidic foods, alkalize your body and balance your pH. With the Get Off Your Acid plan, you'll: Gain more energy Strengthen your immune system Diminish pain and reflux Improve digestion, focus, and sleep Lose excess weight and bloating, naturally With alkaline recipes for easy, delicious snacks and meals, Get Off Your Acid is a powerful guide to transform your health and energy -- in seven days.

Like most doctors, Peter Brukner was trained to believe that drugs and surgery are the answers to all medical problems – including the epidemics of obesity, diabetes and other ‘modern illnesses’ that are threatening our healthcare system and the life expectancy of future generations. For years he was dismissive of any ‘alternative’ diets or lifestyle changes. But that all changed when, facing the double threat of obesity and diabetes himself, his research led to a shocking realisation that overturned a lot of the medical ‘truth’ he’d taken for granted: our dietary guidelines and food pyramid have no scientific basis. So he switched to a low-carb, healthy fat lifestyle – and dropped 13 kilos, lowered his insulin levels and drastically improved his liver function in just three months. In A Fat Lot of Good Dr Brukner busts the dietary myths we’ve been living by for decades and gives you all the information you need, in as simple a way as possible, to live a longer, healthier and – most importantly – more enjoyable life. A Fat Lot of Good features:

- The real reasons why we’re all getting fatter and less healthy
- The lowdown on carbs, fats and proteins: what they do, which we actually need and how much
- What you need to know about insulin, inflammation and the gut microbiome
- Dr Brukner’s Five Golden Rules for a healthy lifestyle
- Tips on reading food labels, making smart choices when eating out and buying real food on a budget
- Advice on how to get the right levels of exercise, sleep and sun to boost your health
- A selection of simple low-carb, healthy fat recipes to get you started

Packed full of the latest research and countless practical tips, A Fat Lot of Good is the complete toolkit for building the healthy lifestyle that’s right for you. All author proceeds donated to SugarByHalf.

Dr. Doug Graham has taken the increasingly popular and tremendously successful low-fat, plant-based diet and turbo-charged it for unprecedented, off-the-charts results. Eclipsing even the astounding benefits so well documented by renowned health professionals who also advocate low-fat eating, Dr. Graham's plan is the first to present a low-fat diet and lifestyle program based exclusively around whole, fresh, uncooked fruits and vegetables. From effortless body weight management to unprecedented vibrant health and disease reversal to blockbuster athletic performance, The 80/10/10 Diet delivers in ways no other plan can even hope to match. But instead of reading our own tireless advocacy, here are stories of 811 success from around the world.

Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Bestselling author Dan Buettner reveals how to transform your health using smart nutrition, lifestyle, and fitness habits gleaned from longevity research on the diets, eating habits, and lifestyle practices of the communities he's identified as "Blue Zones"—those places with the world's longest-lived, and thus healthiest, people, including locations such as Okinawa, Japan; Sardinia, Italy; Costa Rica's Nicoya Peninsula; Ikaria, Greece; and Loma Linda, California. With the audacious belief that the lifestyles of the world's Blue Zones could be adapted and replicated in towns across North America, Buettner launched the largest preventive health care project in the United States, The Blue Zones City Makeovers, which has impacted the health of millions of Americans since 2009. In *The Blue Zones Solution*, readers can be inspired by the specific stories of the people, foods, and routines of our healthy elders; understand the role community, family, and naturally healthy habits can play in improving our diet and health; and learn the exact foods—including the 50 superfoods of longevity and dozens of recipes adapted for Western tastes and markets—that offer delicious ways to eat your way to optimum health. Throughout the book are lifestyle recommendations, checklists, and stories to help you create your own personal Blue Zones solution. Readers will learn and apply the 80/20 rule, the plant slant diet, social aspects of eating that lead to weight loss and great health naturally, cultivating your "tribe" of friends and family, and your greater purpose as part of your daily routine. Filled with moving personal stories, delicious recipes, checklists, and useful tips that will transform any home into a miniature blue zone, *The Blue Zones Solution* is the ultimate blueprint for a healthy, happy life.

The internationally renowned, clinically tested, revolutionary diet program to lose weight, fight disease, and live a longer, healthier life. Can what you eat determine how long, and how well, you live? The clinically proven answer is yes, and *The Longevity Diet* is easier to follow than you'd think. The culmination of 25 years of research on ageing, nutrition, and disease across the globe, this unique combination of an everyday diet and fasting-mimicking diet (FMD) to be done only 3-4 times per year lays out a simple solution to living to a healthy old age through nutrition. FMD does away with the misery and starvation most of us experience while fasting and helps you reap all the beneficial health effects of a restrictive diet while avoiding the negative stressors, like low energy and sleeplessness. Valter Longo, Director of the Longevity Institute at USC and the Program on Longevity and Cancer at IFOM in Milan, developed THE FMD after making a series of remarkable discoveries in mice and humans indicating that specific diets can activate stem cells and promote regeneration and rejuvenation in multiple organs to reduce the risk for diabetes, cancer, Alzheimer's and heart disease. Longo's simple pescatarian daily eating plan and the periodic, fasting-mimicking techniques can both yield impressive results. Low in proteins and sugars and rich in healthy fats and plant-based foods, *The Longevity Diet* is clinically proven to help you: Lose weight and reduce abdominal fat Make simple changes which can extend the healthy lifespan Prevent age-related muscle and bone loss Build your resistance to diabetes, cardiovascular disease, Alzheimer's and cancer Longo's healthy, life span-extending plan is based on an easy-to-adopt pescatarian plan along with the fasting-mimicking diet 4 times a year, and just 5 days at a time. *The Longevity Diet* is the key to living a longer, healthier, and more fulfilled life.

This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.

Eat bread and cheese, drink wine-and lose weight!The secret lies in an ancient mathematical formula now transformed into...THE DIET CODEAs a master baker and craftsman, Stephen Lanza had been applying the mathematical principles of the Golden Ratio for more than twenty years. His realization that this ancient, universal formula, used by Da Vinci and other great geniuses of the Renaissance, also held the secret to optimal nutrition and health led him to apply it to his own diet and the menu at his popular cafe. The weight loss and sense of well-being that he and his customers experienced convinced him that he had cracked the diet code, discovering a simple, natural, and nutritious approach to healthy eating that is as easy as 1, 2, 3.His revolutionary Mediterranean-style eating program uses the Golden Ratio to link the proper proportions of everyday foods to boost metabolism and spark weight loss. Combining a three-phase eating program with detailed menu plans, mouthwatering recipes, Renaissance lore, and Italian-inspired lifestyle advice, THE DIET CODE is a unique health and weight loss program from the ages for the ages.In it readers will:* Crack the diet code-discover how the Golden Ratio can work for you to boost metabolism and maximize nutrition and weight loss* Forget about the math-it's all done for you, and the net result is deliciously simple: 1 part grain carbohydrate, 2 parts protein, 3 parts vegetables at every meal* Enjoy bread again! It really is the staff of life-as long as you eat it along with the right amount of fat or protein* Experience natural weight control-choose and properly prepare healthful, readily available foods as they did during the Renaissance.THE DIET CODE is a unique approach to eating well based on a mathematical phenomenon that's been around for centuries but has never before been applied to diet. Now prepare to lose weight and get healthy by asking yourself, "What would Da Vinci eat?"

Petronella trained at the Institute for Optimum Nutrition and the Natura Foundation and she's also a Functional Medicine practitioner. She has been in private practice since 2004 and specialises in digestive, skin and weight issues. She's a firm believer in the wisdom of the body and that food and exercise is the only medicine we need. 'The people who've been to see me have taught me as much as I have taught them, not only about what works but, more importantly, about what's doable.' Chronic diseases are escalating and so are our weight problems. These lifestyle diseases involve inflammation, which is driven by refined food, overeating, stress and lack of exercise. But the inflammation, as well as our susceptibility to disease, can be extinguished by changing the way that we eat; the power is in our hands. The Human Being Diet is a blueprint for feasting and fasting your way to feeling, looking and being your best, whether you want to lose weight or not. It's a painless path to: -Boundless energy-Perfect weight-Flawless skin-Refreshing sleep-Healthy digestion-Better sexFind out when to eat, what to eat, and how much to eat, to reset your rhythm and restore your joie de vivre.

For fifty years, the medical establishment has preached the same rules for losing weight: restrict calories, eat less, and exercise more. Yet in that time, obesity in the United States has skyrocketed. So why has this prescription so clearly failed? Based on twenty years of investigative reporting and interviews with more than a hundred practicing physicians who embrace ketogenic (low-carbohydrate, high-fat) eating as the best formula for health, here bestselling author Gary Taubes puts the keto movement in the necessary historical and scientific perspective. He makes clear the vital misconceptions about obesity and diet (no, people do not become fat simply by eating too much or being sedentary; hormones play the critical role) and uses collected clinical experience from the medical community to provide much-needed practical advice on healthy eating. A groundbreaking manifesto for the fight against obesity and diabetes, in *The Case for Keto*, Taubes reveals why the established rules about eating healthfully might be the wrong approach to weight loss for most people, and how ketogenic diets can help many of us achieve and maintain a healthy weight for life.

Published on behalf of The British Dietetic Association, *Advanced Nutrition and Dietetics in Diabetes* is an exploration of the evidence and practice of nutrition in diabetes, offering a global view of the lifestyle interventions for the prevention and management of diabetes, including management of complications and special population groups.
