

The Great Debaters Discussion Questions Answers

In an era increasingly marked by polarized and unproductive political debates, this volume makes the case for a renewed emphasis on teaching speech and debate, both in and outside of the classroom. Speech and debate education leads students to better understand their First Amendment rights and the power of speaking. It teaches them to work together collaboratively to solve problems, and it encourages critical thinking, reasoned and fact-based argumentation, and respect for differing viewpoints in our increasingly diverse and global society. Highlighting the need for more emphasis on the ethics and skills of democratic deliberation, the contributors to this volume—leading scholars, teachers, and coaches in speech and debate programs around the country—offer new ideas for reinvigorating curricular and co-curricular speech and debate by recovering and reinventing their historical mission as civic education. Combining historical case studies, theoretical reflections, and reports on programs that utilize rhetorical pedagogies to educate for citizenship, *Speech and Debate as Civic Education* is a first-of-its-kind collection of the best ideas for reinventing and revitalizing the civic mission of speech and debate for new generation of students. Leonard Moore has been teaching Black history for twenty-five years, mostly to white people. Drawing on decades of experience in the classroom and on college campuses throughout the South, as well as on his own personal history, Moore illustrates how an understanding of Black history is necessary for everyone. With *Teaching Black History to White People*, which is “part memoir, part Black history, part pedagogy, and part how-to guide,” Moore delivers an accessible and engaging primer on the Black experience in America. He poses provocative questions, such as “Why is the teaching of Black history so controversial?” and “What came first:

Moore includes a syllabus and other tools for actionable steps that white people can take to move beyond performative justice and toward racial reparations, healing, and reconciliation.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873) After challenging the multicultural effort to "provincialize" the history of Western civilization, this book argues that the roots of the West's exceptional creativity should be traced back to the uniquely aristocratic warlike culture of Indo-European speakers.

In the vein of *The Glass Castle*, *Breaking Night* is the stunning memoir of a young woman who at age fifteen was living on the streets, and who eventually made it into Harvard. Liz Murray was born to loving but drug-addicted parents in the Bronx. In school she was taunted for her dirty clothing and lice-infested hair, eventually skipping so many classes that she was put into a girls' home. At age fifteen, Liz found herself on the streets. She learned to scrape by, foraging for food and riding subways all night to have a warm place to sleep. When Liz's mother died of AIDS, she decided to take control of her own destiny and go back to high school, often completing her assignments in the hallways and subway stations where she slept. Liz squeezed four years of high school into two, while homeless; won a New York Times scholarship; and made it into the Ivy League. *Breaking Night* is an unforgettable and beautifully written story of one young woman's indomitable spirit to survive and prevail, against all odds.

February 15, 2016 was the beginning of a debate on man-made climate change between two well-known experts in the field, Dr. William Happer and Dr. David Karoly, hosted by James Barham and his team at TheBestSchools.org. Both have been heavily involved in atmospheric research since the 1980s. Happer believes that burning fossil fuels will have a minimal effect on climate but a large benefit to plant life and humanity. Karoly believes the opposite. How certain is the conclusion by some scientists that burning fossil fuels will lead to a climate disaster? Only debates can ferret out their certainty or lack of it. Burning fossil fuels may cause some harm, but if we stop burning them, we will face certain harm. Which is worse? Debates educate the public, they are necessary. This is an in-depth look at both sides of the debate between two prominent experts.

Buddhist debate are to defeat your own and others' misconceptions, to establish your own correct view, and to clear away objections to your view. It is like the approach of a physician—to remove what does not belong and to strengthen what does. Thus, for Buddhists, reasoning and debate are not ends in themselves or idle intellectual speculation. Rather, they are used as one path to spiritual wellness, taking practitioners closer to the health of liberation through these efforts to remove mistaken views and to understand and strengthen correct ones. Reading and memorization are not enough. Students must be able to verbalize their understanding and defend it under the pressure of cross-examination. This book teaches the basic analytical skills and procedures used in Buddhist debate. It is based on the author's own practice and experiences gained in the debating courtyards of Tibetan monasteries in India and matured through years of leading popular university courses on the subject. Sample debate exchanges show readers how to get started with the Buddhist style of analytical thinking to challenge and defend assertions. Learning is supported by guided reflections, practical advice, and verbal exercises to be completed in

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton.

Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was

previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution.

Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804)

was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances.

His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The perceived lack of understanding of cultural diversity in the American learning community has led instructors to challenge assumptions and stereotypes while addressing misconceptions. Teachers of foreign languages and cultural studies, in particular, feel the need to redesign curricula and lesson plans to better serve the learning community of the twenty-first century.

The common starting point resides in the paradox that exists in today's connected world; while global access to information makes learners aware of the infinite variety of cultural diversity, it does not, however, make them critical thinkers. For this reason, there is opportunity to reshape critical thinking within a more global perspective, while enhancing the tools to identify, interpret, and compare the different cultural models that learners encounter. The book demonstrates the theories and practical applications by which instructors use contemporary film to provide insightful readings on diverse local communities, communities that form the basis of global culture. This collection of essays will serve as a pedagogical tool and resource, offering methods and examples of a communicative approach to analyze and integrate cultural diversities, similarities, and problems in the second language curricula, methods that expose students to different cultural models while scaffolding their critical approach to multiple layers of common and specific values. This work will encourage a dialogue and long-lasting conversation on methodologies and teaching strategies rethought, reapplied, and remolded to the new learning environments.
