***This is a largely autobiographical account of a young woman's battle with self-harm. It explores the complex nature of her relationship with the therapist, her initial resistance to recovery and her progression towards self-knowledge and taking responsibility for her own actions.***

***This book provides an introduction to the history of medieval Wales, with particular emphasis on political developments. It traces the growth of Welsh princely power, and the invasion and settlement of Welsh territories by Norman adventurers which resulted in the creation of the marcher lordships and the steady erosion of Welsh princely authority in the south. The subsequent development of a powerful Welsh state under the leadership of the princes of Gwynedd was checked by Edward I in 1277, and thereafter the principality was deliberately overrun and destroyed: the Edwardian castles are symbols of conquest. Despite valiant attempts by local leaders in the thirteenth century, and by a national leader Owain Glyn Dwr early in the fifteenth, the English domination of Wales persisted, even beyond the advent of the Tudor dynasty. This is the first comprehensive short textbook on medieval Wales to be written for school and university students. It will also attract anyone with a general interest in Celtic studies or in the centuries which played such a formative role in the development of the Welsh national***

***This detailed exposition gives background and context to how modern biogeography has got to where it is now. For biogeographers and other researchers interested in biodiversity and the evolution of life on islands, Biogeology: Evolution in a Changing Landscape provides an overview of a large swathe of the globe encompassing Wallacea and the western Pacific. The book contains the full text of the original article explored in each chapter, presented as it appeared on publication. Key features: Holistic treatment, collecting together a series of important biogeographical papers into a single volume Authored by an expert who has spent nearly three decades actively involved in biogeography Describes and interprets a region of exceptional biodiversity and extreme endemism The only book to provide an integrated treatment of Wallacea, Melanesia, New Zealand, the New Zealand Subantarctic Islands and Antarctica Offers a critique of fashionable neo-dispersalist arguments, showing how these still suffer from the same weaknesses of the original Darwinian formulation. *None could go against the king of England ... not overtly, anyway. April 1284. As a newly widowed lady-in-waiting to the very pregnant Queen Eleanor of England, Catrin never expected to return to Wales again. She was definitely unprepared to be confronted with murder when she got there--or to find herself face-to-face with Rhys, the childhood friend she lost twenty years before. Rhys had never intended to return home either, but a lifetime of war has deposited him right back where he started--impoverished and owing service to Catrin's older brother. With Wales fallen irrevocably to England and not knowing whom else they can trust, Catrin and Rhys join forces against the treachery and intrigue rife within the half-built Caernarfon Castle. And when the killer strikes again, this time within the royal court, the pair race to uncover his identity before he touches the king himself--or his infant son. However, the decision is extremely complex and remains unsatisfactorily interpreted. In particular, it has been impossible to illuminate the creativity requirement. The book gives an account of the decision's conceptual structure, focusing on its full delineation of the opposite to creativity. In a radical and unprecedented innovation, it is correlated with an automatic computational process. Creativity itself is understood as non-computational or directly human activity concerned with meaning. Determining the presence of creativity is reduced to a four-stage test. Raptors are by nature scarce and extremely elusive. Of Pandionidae (osprey), Accipitridae (broad-winged harrier, eagle, buzzard, red kite) and Falconidae (peregrine, sparrowhawk etc.) only widespread buzzards, kestrels and kites are easily seen. diplomat and theologian, Gerald of Wales was one of the most fascinating figures of the Middle Ages and *The Journey Through Wales* describes his eventful tour of the country as a missionary in 1188. In a style reminiscent of a diary, Gerald records the day-to-day events of the mission, alongside lively accounts of local miracles, folklore and religious relics such as Saint Patrick's Horn, and eloquent descriptions of natural scenery that includes the rugged promontory of St David's and the vast snow-covered panoramas of Snowdonia. The landscape is evoked in further detail in *The Description*, which chronicles the everyday lives of the Welsh people with skill and affection. Witty and gently humorous throughout, these works provide a unique view into the medieval world.

Jasper Rees has always wanted to be Welsh. But despite Welsh grandparents (and a Welsh surname) he is an Englishman: by birth, upbringing and temperament. In this singular, hilarious love letter to a glorious country so often misunderstood, Rees sets out to achieve his goal of becoming a Welshman by learning to sing, play, work, worship, think - and above all, speak - like one. On the way he meets monks, tenors and politicians, and tries his hand at rugby and lambing - all the while weaving together his personal story with Wales's rich history. Culminating in a nail-biting test of Rees's Welsh-speaking skill at the National Eisteddfod, this exuberant

An eye-opening exploration of blood, the lifegiving substance with the power of taboo, the value of diamonds and the promise of breakthrough science Blood carries life, yet the sight of it makes people faint. It is a waste product and a commodity pricier than oil. It can save lives and transmit deadly infections. Each one of us has roughly nine pints of it, yet many don't even know their own blood type. And for all its ubiquitousness, the few tablespoons of blood discharged by 800 million women are still regarded as taboo: menstruation is perhaps the single most demonized biological event. Rose George, author of *The Big Necessity*, is renowned for her intrepid work on topics that are invisible but vitally important. In *Nine*

She introduces Janet Vaughan, who set up the world's first system of mass blood donation during the Blitz, and Arunachalam Muruganatham, known as "Menstrual Man" for his work on sanitary pads for developing countries. She probes the lucrative business of plasma transfusions, in which the US is known as the "OPEC of plasma." And she looks to the future, as researchers seek to bring synthetic blood to a hospital near you. Spanning science and politics, stories and global epidemics, *Nine Pints* reveals our life's blood in an entirely new light. *Nine Pints* was named one of Bill Gates recommended summer reading titles for 2019.

analysis describes how researchers can conceptualize, develop, mix, and intersect diverse approaches, concepts, and tools. In doing so, they can improve their understanding and insights into the complex change processes in social networks. Section 1 includes eight chapters that reflect on "Why should we do MMSNA?", providing a clear map of MMSNA research to date and why to consider MMSNA. In Section 2 the remaining 11 chapters are dedicated to the question "How do I do MMSNA?", illustrating how concentric circles, learning analytics, qualitative structured approaches, relational event modeling, and other approaches can empower researchers. This book shows that mixing qualitative and quantitative approaches to social network analysis can empower people to understand the complexities of change in networks and relations between people. It shows how mixed analysis can be applied to a wide range of data generated by diverse global communities: American school children, Belgian teachers, Dutch medical professionals, Finnish consultants, French school children, and Swedish right-wing social media users, amongst others. Gerald of Wales was among the most dynamic and fascinating churchmen of the twelfth century. A member of one of the leading Norman families involved in the invasion of Ireland, he first visited there in 1183 and later returned in the entourage of Henry II. The resulting *Topographia Hiberniae* is an extraordinary account of his travels. Here he describes landscapes, fish, birds and animals; recounts the history of Ireland's rulers; and tells fantastical stories of magic wells and deadly whirlpools, strange creatures and evil spirits. Written from the point of view of an invader and reformer, this work has been rightly criticized for its portrait of a primitive land, yet it is also one of the most important sources for what is known of Ireland during the Middle Ages.

*Deep Country is Neil Ansell's account of five years spent alone in a hillside cottage in Wales. 'I lived alone in this cottage for five years, summer and winter, with no transport, no phone. This is the story of those five years, where I lived and how I lived. It is the story of what it means to live in a place so remote that you may not see another soul for weeks on end. And it is the story of the hidden places that I came to call my own, and the wild creatures that became my society.'* Neil Ansell immerses himself in the rugged British landscape, exploring nature's unspoilt wilderness and man's relationship with it. *Deep Country is a celebration of rural life and the perfect read*
