In a time of increasing disconnection and uncertainty, Leading with Joy shows how leaders can reclaim their mission and embrace joy in service of social transformation. Leadership that connects people and centers compassion and trust instead of competition and disconnection is needed more than ever before. This book promotes a joyful and courageous approach to leadership that can sustain purposeful action and social change. Leading with Joy demonstrates how leaders can create conditions of abundance and well-being, which are necessary for long-term social transformation. It also draws on the authors' lived experiences as leaders, including their encounters with oppression and their wisdom in principled leadership. The book takes the form of a series of vignettes about the authors' experiences, with reflection questions at the end of each one. The stories are varied but resonant, touching on everything from near-death experiences to family relationships to workplace encounters and triumphs. The authors illuminate different aspects of leadership, such as humility, forgiveness, and kindness, and invite leaders to respond to the current

In this brilliant new edition Andy Field has introduced important new introductory material on statistics that the student will need and was missing at least in the first edition. This book is the best blend that I know of a textbook in statistics and a manual on SPSS. It is a balanced composite of both topics, using SPSS to illustrate important statistical material and, through graphics, to make visible important approaches to data analysis. There are many places in the book where I had to laugh, and that's saying a lot for a book on statistics. His excellent style engages the reader and makes reading about statistics fun". David C Howell, Professor Emeritus, University of Vermont USA This award-winning text, now fully updated with SPSS Statistics, is the only book on statistics that you will need! Fully revised and restructured, this new edition is even more accessible as it now takes students through from introductory to advanced level concepts, all the while grounding knowledge through the use of SPSS Statistics. Andy Field's humorous and self-deprecating style and the book's host of characters make the journey entertaining as well as educational. Well still providing a very comprehensive collection of statistical methods, tests and procedures, and packed with examples and self-assessment tests to reinforce knowledge, the new edition now also offers: - a more gentle introduction to basic-level concepts and methods for beginners - new textbook features to make the book more user-friendly for those learning about more advanced concepts, encouraging 'critical thinking' - a brand new, full-colour design, making it easy for students to navigate between topics, and to understand how to use the latest version of SPSS Statistics - both 'real world' (the bizarre and the wonderful!) and invented examples illustrate the concepts and make the techniques come alive for students - an additional chapter on multilevel modelling for advanced-level students - reinforced binding to make the book easier to handle at a computer workstation. The book also includes access to a brand new and improved companion Website, bursting with features including: - animated 'SPSS walk-through' videos clearly demonstrating how to use the latest SPSS Statistics modules - self-marking multiple choice questions - data sets for psychology, business and management and health sciences - a flash-card glossary for testing knowledge of key concepts - access to support material from SAGE study skills books. Statistics lecturers are also provided with a whole range of resources and teaching aids, including: - the test bank - over 300 multiple-choice questions ready to upload to WebCT, Blackboard or other virtual learning environments - charts and diagrams in electronic format for inclusion in lecture slides - PowerPoint slides written by the author to accompany chapters of the text.

The Tech Entrepreneur's Survival Guide: How to Bootstrap Your Startup, Lead Through Tough Times, and Cash In for Success

The daughter of an eccentric, sporadically employed mother recounts her experiences with temporary housing and shelters, her acceptance into Harvard, and her efforts to make sense of a world vastly different from the one she grew up in.

Most technology startups never make it to the funding stage, and only a small percentage of those that are venture-backed generate a positive return for their investors. An even smaller number of startup founders enjoy a truly prosperous exit. Bernd Schoner cofounded his tech startup during the dot-com bust, navigated it through market crises and internal turmoil, brought it through the global financial meltdown intact, and eventually sold it to a multibillion-dollar, multinational public technology company. In The Tech Entrepreneur's Survival Guide, Bernd shares what he learned and what he wished he knew at the time. He explains the major phases in a technology company's life cycle, helping entrepreneurs avoid common pitfalls and survive crises when they strike. He guides readers from the initial bootstrapping process through venture-capital financing and provides valuable advice on how to sell a technology company profitably—even in a challenging economic environment. Every chapter presents solutions to realworld issues that could otherwise have fatal consequences for a tech venture. Aspiring tech entrepreneurs will learn to: Set up shop: build the team, assemble necessary startup assets (including technology and intellectual property), get legal and financial affairs in order Secure capital: ask for money, nail the term sheet, ask the right people to sell, who to sell to, and how to make it a happy exit for all stakeholders, including the employees Written with deep insight, refreshing candor, and a dash of humor, this comprehensive guide to the often harsh realities of startup life is indispensable for entrepreneurs at any stage. PRAISE FOR THE TECH ENTREPRENEUR'S SURVIVAL GUIDE: "A genuine narrative from the field, with battle scars and self-reflection. Reading this book will help you avoid many major pitfalls, professor at the Massachusetts Institute of Technology Media Lab "There's a lot of great insights and practical advice for the entrepreneur in this book, stuff you normally won't read or hear unless you buy some hard-bitten company founder a few drinks. If you are launching a technology startup, reading this book is the thing you should do first." -- Mark Roberti, founder and editor in chief of RFID Journal "I wish I had read Bernd's book when we founded The Echo Nest. Bernd touches on all the major issues in the initial formation stages of a tech company and many of the problems that come up when a company matures. If you are thinking of founding your own tech startup, read this book first." -- Tristan Jehan, cofounder of The Echo Nest "A visceral, behind-the-scenes guide to technology entrepreneurship. Bernd tells it like it is and presents a universe of solutions to tricky startup situations that can significantly improve the odds of success. Indispensable." -- Larry Begley, cofounder and managing director at 406 Ventures "The best-laid business plans never survive contact with reality. Bernd has provided a comprehensive guide to anticipating the unexpected in the life of a startup." -- Neil Gershenefeld, professor and director of the Massachusetts Institute of Technology Center for Bits and Atoms

Goliah, an oversized Doberman pincher, and his owner working on construction need to find a place to live in Long Island. This would not be an easy task considering the dog's fierce and vicious appearance, not too many people were willing to rent their apartments out to a man with a dog like that. Throughout their journey the pair meet different people who all had the same answer-no. Finally, a ray of hope was found in a little Puerto Rican lady from suburban Port Jefferson, Long Island who agrees to take Goliah in also in exchange for some help on her aging house that was in dire need of repair. With their newly found ray of hope, they knew little of the never ending, twisting, and turning road into a deeper madness awaiting them.

Years ago Angelina Hunter fell in love--only to have her heart broken. Now she runs her father's ranch, all businesslike and severe ... until a cattle drive brings back the man responsible for her hopes. Will Angelina's heart be softened? Will she learn to hope again? Will her long-lost dreams become a blessed reality?

Written by leading experts in the field, this edited volume brings together the latest findings in the area of nonparametric, robust and multivariate statistical methods. The individual contributions cover a wide variety of topics ranging from univariate nonparametric methods to robust methods for complex data structures. Some examples from statistical signal processing are also given. The volume is dedicated to Hannu Oja on the occasion of his 65th birthday and is intended for researchers as well as PhD students with a good knowledge of statistics.

Spinoza's Ethics, and its project of proving ethical truths through the geometric method, have attracted and challenged readers for more than three hundred years. In Spinoza and the Cunning of Imagination, Eugene Garver uses the imagination as a guiding thread to this work. Other readers have looked at the imagination to account for Spinoza's understanding of politics and religion, but this is the first inquiry to see it as central to the Ethics as a whole--imagination as a quality to be cultivated, and not simply overcome. Spinoza initially presents imagination as an inadequate and confused way of thinking, always inferior to ideas that adequately represent things as they are. It would seem to follow that one ought to purge the mind of imaginative ideas and replace them with rational ideas as soon as possible, but as Garver shows, the Ethics don't allow for this ultimate ethical act until one has cultivated a powerful imagination. This is, for Garver, "the cunning of imagination." The simple plot of progress becomes, because of the imagination, a complex journey full of reversals and discoveries. For Garver, the "cunning" of the imagination resides in our ability to use imagination to rise above it.

"As always, [Stephen] Baxter plays with space and time with consummate skill. . . . He continues to be one of the leading writers of hard science fiction, and one of the most thought-provoking as well."--Science Fiction Chronicle The year is 2020. Fueled by an insatiable curiosity, Reid Malenfant ventures to the far edge of the solar system, where he discovers a strange artifact left behind by an alien civilization: A gateway that functions as a kind of quantum transporter, allowing virtually instantaneous travel over the vast distances of interstellar space. What lies on the other side of the gateway? Malenfant decides to find out. Yet he will soon be faced with an impossible choice that will push him beyond terror, beyond sanity, beyond humanity itself. Meanwhile on Earth the Japanese scientist Nemoto fears her worst nightmares are coming true. Startling discoveries reveal that the Moon, Venus, even Mars once thrived with life--life that was snuffed out not just once but many times, in cycles of birth and destruction. And the next chilling cycle is set to begin again. . . . "When the travel bug bites and usual planets don't excite, perhaps it's time to burst the bounds of this old solar system and really see the sights. . . . Baxter's expansive new novel is just the ticket."--The Washington Times "Breathtaking in its originality and scope."--The Washington Post

The book is about the foundation of the bootstrap, a powerful tool in signal processing, and its properties, strengths, and limitations. Focused on bootstrap signal detection in Gaussian and non-Gaussian interference as well as bootstrap model selection, the theory developed by the authors is supported by practical examples written in MATLAB. Aimed at graduate students and engineers, the book includes applications to problems in radar and sonar, biomedical engineering, and automotive engineering.

"When writer Tracey M. Lewis-Giggett wrote a piece for The Washington Post ('My daughter reminded me that Black Joy is a form of resistance'), she had no idea just how much or how widely it would resonate with parents across America. As a Professor of English and Race Studies, and a writer whose work focuses on the intersection of race, trauma, and healing, she knew that Black Joy is truly a weapon of resistance, a tool for resilience. In the outpouring for more on the subject, Tracey saw there was a need for something longer than a thousand words on the subject."

In this innovative Daily God Book, Skip Heitzig gives you unique insights, points to ponder, and most important, a convenient daily system for reading through the Bible in one year. Recent best sellers reflect a renewed interest in the Bible and what it says. Skip Heitzig highlights the key stories and chapters throughout the Bible so you can get a handle on them.

The authors of this casebook are committed to reflect fully the dynamism, controversy, and excitement that characterize contemporary Constitutional Law. While generally striving for brevity, the authors lightly edit cases where the Court appears to be embarking on a new doctrinal course so that sharply different constitutional philosophies are fully and fairly presented. Features of the new Eighth Edition include:

- *Hamdan v. Rumsfeld* -- the legality of the use of military commissions by the Executive Branch.
- *Boumediene v. Bush* -- alien enemy combatants detained at Guantanamo and "the constitutional privilege of habeas corpus."
- *District of Columbia v. Heller* and *McDonald v. City of Chicago* -- the personal right to keep and bear arms vis-a-vis federal and state governments.
- *Gonzales v. Carhart* -- limiting the abortion right.
- *United Haulers Association, Inc. v. Oneida-Herkimer Solid Waste Management Authority* -- state regulation of solid waste and the dormant Commerce Clause
- *Parents Involved in Community Schools v. Seattle School District No. 1* -- affirmative action in the public schools. In the area of free expression, among the many cases featured are:
 - *Holder v. Humanitarian Law Project* -- national security v. political advocacy.
 - *Snyder v. Phelps* -- offensive speech and funeral picketing.
 - *Morse v. Frederick* -- student speech in the high schools.
 - *Garrett v. CABL* -- free expression rights of government employees.
 - *United States v. Stevens* -- animal cruelty and the limits of freedom of expression.
 - *Brown v. Entertainment Merchants Association* -- protecting children from violent video games.
 - *Citizens United v. Federal Elections Commission* -- unleashing campaign spending by corporations and unions.

The new 8th edition includes some of the latest law review literature as well as the leading constitutional cases covered in the previous editions. Constitutional Law: Principles and Policies is updated annually with a supplement addressing recent developments in the area of Constitutional Law.
