

### The Latin Kingdom Of Jerusalem 1099 To 1291 Ad

This volume is a collection of all-new original essays covering everything from feminist to postcolonial readings of the play as well as source queries and analyses of historical performances of the play. The Merchant of Venice is a collection of seventeen new essays that explore the concepts of anti-Semitism, the work of Christopher Marlowe, the politics of commerce and making the play palatable to a modern audience. The characters, Portia and Shylock, are examined in fascinating detail. With in-depth analyses of the text, the play in performance and individual characters, this book promises to be the essential resource on the play for all Shakespeare enthusiasts.

Excerpt from The Crusades: The Story of the Latin Kingdom of Jerusalem The present volume bears the sub-title, "The Story of the Latin Kingdom of Jerusalem," in order to make it clear at the outset that we are here concerned only with the Crusades which are Crusades in the proper sense of the word. With the Fourth Crusade, the Latin Empire of Constantinople, and still more with those developments, or perversions of the Crusading idea, which led to the so-called Crusades against the Albigensians and the Emperor Frederick, we have nothing to do. In making the story of the Latin Kingdom of Jerusalem the main thread of the narrative, stress has intentionally been laid on an important if comparatively unfamiliar side of Crusading history. The romance and glamour of Crusading expeditions has often caused the practical achievements of Crusaders in the East to be overlooked, or underrated. Yet it is through the history of the Kingdom of Jerusalem, that the true character and importance of the Crusades can alone be discerned. A History of the Latin Kingdom of Jerusalem

Crusades

The Fall of the Latin Kingdom of Jerusalem

First published in 2006, The Latin Kingdom of Jerusalem was the great lost realm of chivalry. Created by leaders of the First Crusade at the start of the 12th Century, it was a feudal state comprised of Antioch, Edessa, Tripoli, Jerusalem, Jaffa, Ashkelon Krak, Montreal, Sidin and Galilee that lasted for two hundred years, surrounded by the Muslims of Palestine and Syria. This classic volume presents a picture of the curious social conditions which resulted from the establishment of a feudal society amid Oriental surroundings and traces a growth of civilization and prosperity during the two centuries of Latin rule.

Naming Patterns in the Latin Kingdom of Jerusalem

This Is A New Release Of The Original 1904 Edition.

This is the story of the Jewish community in Palestine from the Crusader conquest in 1099 until the fall of the Latin Kingdom in 1291. Drawing on a wealth of documentation, much of it largely unknown to western scholars, Professor Prower examines the working of the community's internal organization within the framework of the Crusader Kingdom's institutions; their attitude to the Crusader conquerors, as well as to the neighboring Muslim rulers; contacts between the rulers and members of the community; and in rare instances, cases of interfaith relationships.

**Anthroponymy, or the study of personal names, is used here to investigate the extent to which Frankish settlers in the Latin kingdom of Jerusalem assimilated the practices and traditions of their hosts. Data from legal and commercial documents has been used to create a database of 6,200 individual names from the years 1099 to 1291 which the author analyses for any trends and patterns that may relate to social change. Comparing evidence with contemporary Catholic Europe, Shagrir finds that the Franks neither adopted local ways nor maintained their own traditions, but changes in naming reflected a unique set of characteristics influenced by eastern contacts, cults and customs and a greater awareness of religious fervour. This fascinating study deals with one of the first points of direct and personal contact between Europeans and Muslims during the Crusades: the ransoming of captives. It traces the changes in European mentality and the laws of warfare.**

**The shifting balance of power between the monarchy and the nobility within the Latin Kingdom of Jerusalem has been the subject of much scholarly debate. Tibble here demonstrates for the first time the unprecedented strategic and economic influence wielded by the Knights Templar and the Knights of St. John in determining the political future of the region. Drawing extensively on chronicles of the twelfth and thirteenth centuries, he shows that secular power as a whole was on the wane much earlier than has previously been imagined, and that by the end of the thirteenth century the true struggle was between the secular authorities and the Military Orders.**

**In the present volume, the third selection of his articles to be published, Professor Mayer deals with questions of royal authority and power in the Crusader kingdom of Jerusalem. He first examines the relationship between the monarchy and the Church, questions of royal succession, and aspects of the royal chancery, but is also concerned to trace the king's efforts to create a new clientele of loyal vassals. The second group of studies reverses the perspective, and looks at the origins and development of the lordships of the kingdom, notably at the important county of Jaffa and at the role of the Ibelin, the most significant family in the land.**

**The reign of King Baldwin I (1100-1118) has thus far received little noteworthy attention by historians as the important pivotal period following the First Crusade conquest of Jerusalem in 1099. The two decades of his rule marked the extension of Latin conquests in the east, most notably by the conquest of the important coastal cities of Arsulf, Acre, Caesarea, Beirut and Sidon. These vital ports for the early Latin Kingdom of Jerusalem provided outlets to the sea for commerce, as well as safe harbors for incoming assistance from the west. Further, Baldwin led in the establishment of strong secular control over ecclesiastical authorities, and provided a model of administration for subsequent monarchs to follow until the loss of the kingdom in 1187. Baldwin's contributions to these developments are presented here in a bibliographical framework to illustrate both his important place in crusader historiography, as well as to gauge the significance of his memory in contemporary literature as a second Joshua archetype. The conquest of Jerusalem and the decades that followed were extraordinarily perilous for the western "colonial" transplants, and thus a Biblical precedent was sought as an explanation to the success of the crusaders. This thesis argues that Fulcher of Chartres, the chaplain and primary contemporary biographer of Baldwin I, saw a parallel with the Biblical figure of Joshua as beneficial to posterity. By the establishment of Baldwin's memory in such a context, Fulcher of Chartres encouraged further western support for the Latin Kingdom, and reveals the important trials that faced Jerusalem's first Latin king.**

Excerpt from The Latin Kingdom of Jerusalem: 1099 to 1291 A. D The sources on which we depend for history of the time of the great Crusades, and which have been used by Gibbon and Michaud, are well known and accessible. They include the Chronicles of Foucher of Chartres, who accompanied Robert of Normandy (1095 - 1124 A.D.), and of Raymond d'Agiles, who was also present at the conquest of Antioch, with that of Albert of Aix, and the great history of William, Archbishop of Tyre, which was begun in 1182 and closes in 1184. These I have read in the great collection of Bongar's Gesta Dei Per Francos (Hanover, 1611), which also includes the important description of later events by Jacques de Vitry, Bishop of Acre, written about 1220 A.D. The Moslem accounts include Baha ed Din's life of his master Saladin about 1200 A.D., and the later works of Kemal ed Din, Mejr ed Din, Abu el Fecla, and Makrizi, with El Edrizi's geography about 1150 A.D.
