The Leap Of Faith

How do laws resemble rules of games, moral rules, personal rules, rules found in religious teachings, school rules, and so on? Are laws rules at all? Are they all made by human beings? And if so how should we go about interpreting them? How are they organized into systems, and what does it mean for these systems to 'constitutions'? Should everyone want to live under a system of law? Is there a special kind of 'legal justice'? Does it consist simply in applying the law of the system? And how does it relate to the ideal of 'the rule of law'?

These and other classic questions in the philosophy of law form the subject-matter of *Law as a Leap of Faith*. In this book John Gardner collects, revisits, and supplements fifteen years of celebrated writings on general questions about law and legal systems - writings in which he attempts, without loss of philosophical finesse or insight, to cut through some of the technicalities with which the subject has become encrusted in the late twentieth century. Taking his agenda broadly from H.L.A. Hart's *The Concept of Law* (1961), Gardner shows how the key ideas in that work live on, and how they have been and can still be

improved in modest ways to meet important criticisms in some cases by concession, in some cases by circumvention, and in some cases by restatement. In the process Gardner engages with key ideas of other modern giants of the subject including Kelsen, Holmes, Raz, and Dworkin. Most importantly he presents the main elements of his own unique and refreshingly direct way of thinking about law, brought together in one place for the first time.

Skateboarding is both a sport and a way of life. Creative, physical, graphic, urban and controversial, it is full of contradictions – a billion-dollar global industry which still retains its vibrant, counter-cultural heart. Skateboarding and the City presents the only complete history of the sport, exploring the story of skate culture from the surf-beaches of '60s California to the latest developments in street-skating today. Written by a life-long skater who also happens to be an architectural historian, and packed through with full-colour images – of skaters, boards, moves, graphics, and film-stills – this passionate, readable and rigorously-researched book explores the history of skateboarding and reveals a vivid understanding of how skateboarders, through their actions, experience the city and its architecture in a unique way.

America today is faced with a great number of concerns. One of the larger ones is the role of religious thought and practices in our everyday lives. Issues such as abortion, Intelligent Design, and the moral and ethical impact of technology on its citizens weigh heavily on almost all of us. These issues predominate both the front pages and the op-ed pages of our newspapers. They fill the news media on both television and the net. They created heated arguments in almost every community in our world, often leading to open conflicts between friends and even family members. Religion and faith are in conflict within the hearts and minds of educated people exposed to more and more information. Science has marched directly into realms covered by faith, leading to great angst within people who try and balance their "Church" mind with the

secular world. Nowhere is this conflict more apparent than in the issues generated in the reconciliation of theology and modern science. As cosmology crossed over into the sacred ground of the Creation with the discovery of the Big Bang, scientists themselves discovered that they had come face to face with the questions around the existence of God, the Creator, and his role in Creation. While most of the general population believes that scientists are atheists, and that the basic tenets of theology and science are antithetical, the opposite is actually closer to the truth. There is a ground where science and theology can, and must, share thoughts. Scientists like Einstein and Hawking speak of trying to "understand the mind of God" and make bold conjectures as to whether or not God had any choices in his design of the Universe. This book

Charles Darwin published *The Origin of Species*, his revolutionary tract on evolution and the fundamental ideas involved, in 1859. Nearly 150 years later, the theory of evolution continues to create tension between the scientific and religious communities. Challenges about teaching the theory of evolution in schools occur annually all over the country. This same debate raged within Darwin himself, and played an important part in his marriage: his wife, Emma, was quite religious, and her faith gave Charles a lot to think about as he worked on a theory that continues to spark intense debates. Deborah Heiligman's new biography of Charles Darwin is a

The dramatic insider account of why we invaded Iraq, the motivations that drove it, and the frustrations of those who tried and failed to stop it, leading to the most costly misadventure in US history. A single disastrous choice in the wake of 9/11-the decision to use force to remove Saddam Hussein from power-did enormous damage to the wealth, well-being, and reputation of the United States. mythology. To this day, even the principal architects of the war cannot agree on it. Michael Mazarr has interviewed dozens of players involved in the deliberations about the invasion of Iraq and has reviewed all the documents so far declassified. He paints a devastating portrait of an administration fueled by righteous conviction yet undercut by chaotic processes, rivalrous agencies, and competing egos. But more than the product of one bungling administration, the invasion of Iraq emerges here as a tragically typical example of modern U.S. foreign policy fiascos. Leap of Faith asks profound questions about the limits of US power and the accountability for its use. It offers lessons urgently relevant to stave off similar disasters today and in the future.

A Great Leap of Faith

American Democracy: A Great Leap of Faith is the companion volume to an exhibition at the Smithsonian National Museum of American History that celebrates the bold and radical experiment to test a wholly new form of government. Democracy is still a work in progress, but it is at the core of our nation's political, economic, and social life. This lavishly illustrated book explores democracy from the Revolution to the present using objects from the museum's collection, such as the portable writing box that Thomas Jefferson used while composing the

Why are citizens in some countries more willing to pay taxes than in other countries? This book examines the history of the relationship between citizens and their states in five countries, (Sweden, Britain, Italy, Romania, and the United States), and demonstrates how and why people in some countries have come to trust the government with their money while in other countries they do not. The book explores the

In 1935, at the age of fifteen, Shona Dunlop left Dunedin and sailed to Europe with her family to see the 'cultural capitals of the world'. Their captivating adventures are a vignette of a Europe that would soon be lost forever. After two years studying expressive dance in Vienna, Shona's new life ended with the invasion of Hitler's troops. A dance tour of South America offered many of the predominantly Jewish company escape from certain death, and further adventures for the 'English' girl in their number. A return to NZ, the setting up of a modern dance company in Sydney and a coming of age for the dancer followed, before Shona met and married Canadian missionary Donald MacTavish within the space of five weeks. A new phase in her life had begun, taking the young couple to China amidst the ructions of the Communist revolution, and

on to South Africa, where they fought the pernicious advance of apartheid. There tragedy struck. Donald died of cancer, leaving Shona widowed with three small children. She returned to Dunedin. It was 1950. Pulling her life back together was a long hard struggle, but Shona managed to make ends meet by setting up her own modern dance studio - the first in NZ. Soon she made a name for herself as a choreographer and teacher of national significance. She also became controversial for her promotion of dance in the church. She travelled widely, studying the dance of indigenous people, especially in Asia. She has created dances with tribespeople, parishioners, prisoners, the Hell's Angels and the Archbishop of Canterbury. 'Leap of Faith' is an extraordinary mix of drama, upheaval and the overcoming

In the spring of 1935 it did not seem exorbitant to hope that it might be ready for the printer by the end of that year. For in March I learned from Professor Swenson that he had years before "done about two thirds of a rough translation." In 1937/38 he took a sabbatical leave from his university for the sake of finishing this work. Yet after a year it was not finished- partly because Professor Swenson was already incapacitated by the illness which eventually resulted in his death but also because he aimed at a degree of perfection which hardly can be reached by a translator. At one time he expressed to me a suspicion that perhaps, as in the translation of Kant's philosophy might require the cooperation of many scholars during several generations before the translation of Kierkegaard's terminology
