The New York Times bestselling authors of Switch and Made to Stick explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his

students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world’s youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The Power of Moments shows us how to be the author of richer experiences.

“We are at a crossroads: either we can try to prop up the old, broken marketing model, or we can create a new model, one that is fit for the unique challenges of today.” —From Good Is the New Cool Marketing has an image problem. Media-savvy millennials, and their younger Gen Z counterparts, no longer trust advertising, and they demand increased social responsibility from their brands—while still insisting on cutting-edge products with

on-trend design. As always, brands need to be cool—but now they need to be good, too. It's a tall order, and with new technology empowering consumers to bypass advertisements altogether, it won't be long before the old, advertising-based marketing model goes the way of the major label. If only there was a new model, one that allowed companies to address environmental, civic, and economic issues in a way that grew their brand and business, while giving back to society, and re-branding branding as a powerful force for good. Enter Good is The New Cool, a bold new manifesto from marketing experts Afdhel Aziz and Bobby Jones. In provocative, whip-smart, and streetwise style, they take aim at conventional marketing, posing the questions few have had the vision and courage to ask: If the system is broken, how can we fix it? Rather than sinking money into advertising, why not create a new model, in which great marketing optimizes life? With seven revolutionary new principles—from “Treat People as Citizens, Not Consumers,” to “Lead with the Cool”—and insights and interviews from a new generation of marketers, social entrepreneurs, and leaders of such brands as Zappos, Citibank, The Honest Company, as well as the culture creators working with artists like Lady Gaga, Pharrell, and Justin Bieber, this rule-breaking book is the new business model for the twenty-first century, and a call to action for anyone committed to building a better tomorrow. This visionary book won't just change your business—it will change the world.

Unleash innovation potential with creative, serious play Building a Better Business Using the LEGO® SERIOUSPLAY® Method delivers a creative approach to enhancing innovation and improving business performance, with the focus on unleashing play. Written by the two original Master Trainers for LEGO SERIOUS PLAY (LSP), the book outlines how LSP can develop teams, people, relationships and business. Based on the merging of play with organizational development, systems thinking and strategy development, LSP can foster improved meetings, faster innovation processes, team growth, and better communication. The belief that everyone intends to "do good" and has the potential to do it is at the heart of LSP. The method nurtures the idea that everyone in an organization can contribute to discussions and outcomes. Building with LEGO bricks is a type of creative play that triggers a different kind of thought process, unleashing imagination and potential that is frequently untapped by

Conventional wisdom today says that to survive, companies must move beyond incremental, sustaining innovation and invest in some form of radical innovation. "Disrupt yourself or be disrupted!" is the relentless message company leaders hear. The Power of Little Ideas argues there's a "third way" that is neither sustaining nor disruptive. This low-risk, high-reward strategy is an approach to innovation that all company leaders should understand so that they recognize it when their competitors practice it, and apply it when it will give them a competitive advantage. This distinctive approach has three key elements: It consists of creating a family of complementary innovations around a product or service, all of which work together to make that product more appealing and competitive. The complementary innovations work together as a system to carry out a single strategy or purpose. Crucially, unlike disruptive or radical innovation, innovating around a key product does not change the central product in any fundamental way. In this

powerful, practical book, Wharton professor David Robertson illustrates how many well-known companies, including CarMax, GoPro, LEGO, Gatorade, Disney, USAA, Novo Nordisk, and many others, used this approach to stave off competitive threats and achieve great success. He outlines the organizational practices that unintentionally torpedo this approach to innovation in many companies and shows how organizations can overcome those challenges. Aimed at leaders seeking strategies for sustained innovation, and at the quickly growing numbers of managers involved with creating new products, *The Power of Little Ideas* provides a logical, organic, and enduring third way to innovate.

From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In New Power, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a

It will begin to impact you long before you reach the last chapter. Let Bob teach you about: CONFIDENCE PERSISTENCE GOALS SUCCESS ATTITUDE COMMUNICATION ACTION DECISION RISK RESPONSIBILITY MONEY CREATIVITY There are a few people who are truly successful and many others who work hard all of their lives attempting to be successful. As a result, the average person believes that success is hard to obtain and that those who do achieve it are either lucky or extremely brilliant. Most people are so busy attempting to make ends meet that they never take the time to really study the highly successful people. Every person who has made such a study has arrived at the same shocking conclusion: success is merely a decision. You must decide what you want and then begin moving toward it. You decide where you are, and you begin with whatever you have. That's it. - listen to what people actually care about in order to incorporate their needs into your revolutionary vision
- master the art of compromise to bring together even the most disparate groups
- recognize your allies and view your enemies as potential partners
- use humor to make yourself heard, defuse potentially violent situations, and "laugh your way to victory"

Praise for *Blueprint for Revolution* "The title is no exaggeration. Otpor's methods . . . have been adopted by democracy movements around the world. The Egyptian opposition used them to topple Hosni Mubarak. In Lebanon, the Serbs helped the Cedar Revolution extricate the country from Syrian control. In Maldives, their methods were the key to overthrowing a dictator who had held power for thirty years. In many other countries, people have used what Canvas teaches to accomplish other political goals, such as fighting corruption or protecting the environment."—The New York Times "A

clear, well-constructed, and easily applicable set of principles for any David facing any Goliath (sans slingshot, of course) . . . By the end of Blueprint, the idea that a punch is no match for a punch line feels like anything but a joke.”—The Boston Globe “An entertaining primer on the theory and practice of peaceful protest.”—The Guardian “With this wonderful book, Srdja Popovic is inspiring ordinary people facing injustice and oppression to use this tool kit to challenge their oppressors and create something much better. When I was growing up, we dreamed that young people could bring down those who misused their power and create a more just and democratic society. For Srdja Popovic, living in Belgrade in 1998, this same dream was potentially a much more dangerous idea. But with an extraordinarily courageous group of students that formed Otpor!, Srdja used imagination, invention, cunning, and lots of humor to create a movement that not only succeeded in toppling the brutal dictator Slobodan Milošević but has become a blueprint for nonviolent revolution around the world. Srdja rules!”—Peter Gabriel “Blueprint for Revolution is not only a spirited guide to changing the world but a breakthrough in the annals of advice for those who seek

If you read it together, stay positive together, and take action together you will accomplish*

amazing things TOGETHER.

A NEW YORK TIMES NOTABLE BOOK • The dramatic story of the Flint water crisis, by a relentless physician who stood up to power. “Stirring . . . [a] blueprint for all those who believe . . . that ‘the world . . . should be full of people raising their voices.’”—The New York Times “Revealing, with the gripping intrigue of a Grisham thriller.” —O: The Oprah Magazine Here is the inspiring story of how Dr. Mona Hanna-Attisha, alongside a team of researchers, parents, friends, and community leaders, discovered that the children of Flint, Michigan, were being exposed to lead in their tap water—and then battled her own government and a brutal backlash to expose that truth to the world. Paced like a scientific thriller, What the Eyes Don’t See reveals how misguided austerity policies, broken democracy, and callous bureaucratic indifference placed an entire city at risk. And at the center of the story is Dr. Mona herself—an immigrant, doctor, scientist, and mother whose family’s activist roots inspired her pursuit of justice. What the Eyes Don’t See is a riveting account of a shameful disaster that became a tale of hope, the story of a city on the ropes that came together to fight for justice, self-determination, and the right to build a better world for their—and all of our—children. Praise for What the Eyes Don’t See “It is one thing to point out a problem. It is another thing altogether to step up and work to fix it. Mona Hanna-Attisha is a true American hero.”—Erin Brockovich “A clarion call to live a life of purpose.”—The Washington Post “Gripping . . . entertaining . . . Her book has power precisely because she takes the events she recounts so personally. . . .

Moral outrage present on every page.”—The New York Times Book Review
“Personal and emotional. . . She vividly describes the effects of lead poisoning on her young patients. . . . She is at her best when recounting the detective work she undertook after a tip-off about lead levels from a friend. . . . ‘Flint will not be defined by this crisis,’ vows Ms. Hanna-Attisha.”—The Economist
“Flint is a public health disaster. But it was Dr. Mona, this caring, tough pediatrican turned detective, who cracked the case.”—Rachel Maddow
