The Magic School Bus Climate Challenge

When Liz the lizard disappears from Ms. Frizzle's classroom, her students take a trip to Herp Haven to try to find her, and discover what it is like to live like a cold-blooded animal. Ms. Frizzle takes her class back through time to the Triassic period on a dinosaur dig in search of Maiasaura eggs.

A special field trip on the magic school bus allows Ms. Frizzle's class to get a first-hand look at major parts of the body and how they work.

Oh, no! Wanda's best friend, Bella the bullfrog, is missing. The class wants to help look for her. Ms. Frizzle says, "The best way to find a frog is to be a frog!" So, the kids take a ride on the Magic School Bus. Join them as they shrink to frog size and learn all about animal habitats! Polar Bear Patrol

A Book about Warm- And Cold-Blooded Animals

A Book about Decomposition

A Book about Volcanoes

The Story of Climate Change is a wonderful way to introduce young readers to one of the most important issues facing our world today. Combining history with science, this book charts the changes in our Earth's climate, from the beginnings of the planet and its atmosphere, to the Industrial revolution and the dawn of machinery. Kids will learn all about the causes of climate change, such as factory farming $\frac{Page \ 1}{10}$

and pollution, and the effects that climate change has on humans and animals across the world. As well as discovering the causes and effects of global warming, readers will discover practical ways we can work together to solve it, from using renewable energy to swapping meat for vegetables in our diet. With fact-packed text by Catherine Barr and vibrant illustrations by Amy Husband and Mike Love, The Story of Climate Change will give kids the information they need to make a change and do their part to fight the climate emergency!

Ms. Frizzle takes her class on a fieldtrip to a beehive in her magic school bus.

On another special field trip on the magic school bus, Ms. Frizzle's class learns about the ocean and the different creatures that live there.

What's it like outside? And what are you going to do about it? Every morning, before heading to school or out to play, kids want to know what the weather is going to be like that day. Is it a day for building a snowman, constructing a sandcastle, or planting a garden? Will they be stuck inside because of rain at recess? Or stuck at home because of snow? And what about tomorrow? Explore Weather and Climate! will help kids understand the "how" and "why" behind the "what." They'll learn how wind, sun, and water combine to form the weather we experience every day. They'll find out why the weather gets extreme.

Explore Weather and Climate! offers engaging text reinforced with 25 hands on projects that include creating a storm in a bottle, touching the clouds, and eating an edible climate map, resulting in an unforgettable understanding of these forces of nature.

The Magic School Bus on the Ocean Floor

To celebrate its 20th anniversary, Scholastic is rereleasing the ten original Magic School Bus titles in
paperback. With updated scientific information, the
bestselling science series ever is back! On a most sensesational trip that takes them through an eye, an ear, a
tongue, and even a dog's nose, Ms. Frizzle's class learns
about the senses. Using their trademark sense of humor,
Joanna Cole and Bruce Degen provide facts about the senses
in both the human and animal worlds.

The Magic School Bus and the Climate ChallengeScholastic Inc.

Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! Why is it hot in one part of the world and chilly in another? Readers will learn the ins and outs of climate in this book. Accessible text and appealing photos show different climate conditions and encourage students to think about and engage with the idea of climate and what kind of climate exists where they live.

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there's something interesting about everything (...except maybe jackhammers).

Ms. Frizzle and her class visit with scientists from the past who explain their theories and

the students utilize these ideas to design their own experiments for their upcoming science fair.

Using the new C3 Framework for Social Studies Standards, these books explore environmentalism through the lenses of History, Geography, Civics, and Economics. In Climate Change, the text and photos look at the history, basic philosophies, and geography of this environmental issue. As they read, students will develop questions about the text, and use evidence from a variety of sources in order to form conclusions. Data-focused backmatter is included, as well as a bibliography, glossary, and index. Ms. Frizzle takes her class on a field trip through the town's electrical wires so they can learn how electricity is generated and how it is used.

Scholastic's The Magic School Bus Gets Eaten

Stuff You Should Know

The Magic School Bus

An Incomplete Compendium of Mostly Interesting Things

The Story of Climate Change

Introduces the environmentalist and writer, and discusses such topics as his internment in a World War II Canadian concentration camp, his successes on PBS's "The Nature of Things," and his hopes for the future.

"Is climate change putting the lives of Earth's plants and animals in jeopardy? Readers will uncover the connections between climate change

and life on Earth in this eye-opening book."--

Ms. Frizzle introduces her students to scientific facts about global warming, sharing accessible coverage of climate change and ways everyday kids can help to protect the environment.

What we eat can help decide the future. Learn how our food sources are closely linked to climate change and what we can do to help limit its affects. This title supports NGSS for Earth and Human activity.

The Magic School Bus 12

What Is Climate?

Climate Change and Life on Earth

Climate Change and Extreme Storms

A Book about Food Chains

Presents the debates in the Lower House in preparation for the impeachment proceedings against George Villiers, Duke of Buckingham and favourite of Charles I. This work is the second book of a four-volume edition of Proceedings in Parliament 1626.

This title examines how climate change affects individuals and society, investigates how people are working to respond and adapt to climate change, and analyzes the controversies and conflicting viewpoints surrounding the issue. Features include a glossary, selected bibliography, websites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. Hop aboard the Magic School Bus for a whole new adventure about glaciers that is out of this world.

Ms. Fizzle's class tours a rotten log A Book about the Water Cycle David Suzuki Climate Change and Air Quality In the Time of the Dinosaurs Explore Weather and Climate!

Ms. Frizzle introduces her students to scientific facts about global warming, sharing accessible information about climate change and ways that everyday kids can help to protect the environment.

Visits an underwater volcano that eventually creates an island

"This book covers weather and climatology, including weather-related disasters, how weather impacts us as humans, what patterns occur with weather and within different climates, and how we measure and predict those things"--Provided by publisher.

This adventure takes Ms. Frizzle and her class deep into the rainforest. Their quest to find out why the Friz's cocoa tree has stopped growing cocoa beans, and why rainforest trees have become unhealthy.
