Trusts and Equity provides a detailed and conceptual analysis of an area of law that students sometimes find difficult. Watt concentrates on those areas of the subject that are most relevant in the contemporary arena, such as the commercial context. The author utilises his expertise in teaching, writing and researching to enliven the text with helpful analogies and memorable references to extra-legal sources such as history, literature and film. History has largely forgotten the writings, both public and private, of early nineteenth-century America's legal scholars. However, Ellen Holmes Pearson argues that the observers from this era had a unique perspective on the young nation and the directions in which its legal culture might go. Remaking Custom draws on the law lectures, treatises, speeches, and papers of the early republic's legal scholars to examine the critical role that they played in the formation of American identities. As intermediaries between the founders of America's newly independent politics and the next generation of legal practitioners and political leaders, the nation's law educators expressed pride in the retention of the "republican parts" of England's common law while at the same time identifying some of the central features that distinguished American law from that of Britain. From their perspective, the new nation's blending of tradition and innovation produced a superior national character. Because American law educators interpreted both local and national legal trends, Remaking Custom reveals how national identities developed through Americans' articulation of their local customs and identities. Pearson examines the innovations that legists could celebrate, such as constitutional changes that placed the people at the center of their governments and more egalitarian property laws that accompanied America's abundant supply of land. The book also deals with innovations that presented uncomfortable challenges to law educators as they sought creative ways to justify the legal cultures that grew up around slavery and Anglo-Americans' hunger for land occupied by Native Americans.

"Are you looking for great ways to include more water in your diet?" "What about fantastic homemade fruit infused waters that take only 5 minutes to make, and are chock full of easy to absorb vitamins and minerals?" Did you know a handful of blueberries a day can not only aid in reducing belly fat, lower blood pressure, protect the heart and brain, boost memory but also act as a natural anti-depressant? They also contain the highest antioxidant capacity of all fruit – which has been found to stifle aging and free radical damage. Making your own fruit infused waters at home allows you to receive the full benefits of each fruit and herb ingredient, as well as the added benefit of knowing exactly what you are consuming. Commercial Vitamin Waters commonly seen in stores and vending machines contain a lot of nasty ingredients (artificial and 'natural' flavourings, artificial colours, artificial sweeteners, synthetic vitamins and preservatives). Each generation of lawyers in common law systems faces an important question: what is the nature of equity as developed in English law and inherited by other common law jurisdictions? While some traditional explanations of equity remain useful - including the understanding of equity as a system that qualifies the legal rights people ordinarily have under judge-made law and under legislation - other common explanations are unhelpful or misleading. This volume considers a distinct and little noticed view of equity. By examining the ways in which courts of equity have addressed a range of practical problems regarding the administration of deliberately created schemes for the management of others' affairs, modern equity can be seen to have a strongly facilitative character. The extent and limits on this characterisation of equity are explored in chapters covering equity's attitude to administration in various public and private settings in common law systems.
