"A surgeon can kill you...and you'll sleep right through it." The most dramatic—and seemingly glamorous—of medical fields, surgery captivates the public's imagination. Written for inquisitive laymen as well as anyone in the medical profession, this fascinating first-person account documents the career of one of America's top surgeons. Readers accompany Sidney Schwab through medical school at Case Western Reserve University; an internship; junior and senior residencies (with a detour to Vietnam, where he won a Purple Heart); and finally his chief residency years in San Francisco. With humor and poignancy—and sometimes graphic detail—Schwab recalls memorable surgeries, surgeons, and patients. He takes care to explain, in understandable and interesting fashion, a variety of diseases, medical issues, and surgical techniques. More than just a memoir, *Cutting Remarks* offers a compelling look at how trauma and surgery are handled at a major hospital, and provides valuable insight into a surgeon's relationship with both peers and patients.

Primary care medicine is the new frontier in medicine. Every nation in the world has recognized the necessity to deliver personal and primary care to its people. This includes first-contact care, care based in a positive and caring personal relationship, care by a single healthcare provider for the majority of the patient's problems, coordination of all care by the patient's personal provider, advocacy for the patient by the provider, the provision of preventive care and psychosocial care, as well as care for episodes of acute and chronic illness. These facets of care work most effectively when they are embedded in a coherent integrated approach. The support for primary care derives from several significant trends. First, technologically based care costs have rocketed beyond reason or availability, occurring in the face of exploding populations and diminishing real resources in many parts of the world, even in the wealthier nations. Simultaneously, the primary care disciplines—general internal medicine and pediatrics and family medicine—have matured significantly.

"Ace Your Medical School Interview gives advice on all aspects of interview preparation and contains many of the questions you could be asked and the answers the med schools want to hear." -- cover, page [4]

Based on the PBS documentary by Ken Burns, Erik Ewers, and Christopher Loren Ewers. On September 30, 1889, W.W. Mayo and his sons Will and Charlie performed the very first operation at a brand-new Catholic hospital in Rochester, Minnesota. It was called Saint Marys. The hospital arose out of the devastation of a tornado that had struck the town six years earlier. After the storm, Mother Alfred Moes of the Sisters of Saint Francis told the Mayos that she had a vision of building a hospital that would "become world renowned for its medical arts." Based on the film by acclaimed documentary filmmaker Ken Burns, *The Mayo Clinic: Faith, Hope, Science* chronicles the history of this unique organization, from its roots as an unlikely partnership between a country doctor and a Franciscan order of nuns to its position today as a worldwide model for patient care, research, and education.

Featuring more than 400 compelling archival and modern images, as well as the complete script from the film, the book demonstrates how the institution's remarkable 150-year history continues to inspire the way medicine is practiced there today. In addition, a series of case studies reveals patients, doctors, and nurses in their most private moments as together they face difficult diagnoses and embark on uncertain treatments. The film and this companion book tell the story of an organization that has managed to stay true to its primary value—the needs of the patient come first. Together, they make an important contribution to the critical discussions about the delivery of health care today in America ... and the world.

When a career-ending injury left elite athlete and professional football player Lewis Howes out of work and living on his sister's couch, he decided he needed to make a change for the better. He started by reaching out to people he admired, searching for mentors, and applying his past coaches' advice from sports to life off the field. Lewis did more than bounce back: He built a multimillion-dollar online business and is now a sought-after business coach, speaker, and podcast host. In the New York Times bestseller The School of Greatness, Howes shares the essential tips and habits he gathered in interviewing "the greats" on his wildly popular podcast of the same name. In discussion with people like Olympic gold medalist Shawn Johnson and Pencils of Promise CEO Adam Braun, Howes figured out that greatness is unearthed and cultivated from within. The masters of greatness are not successful because they got lucky or are innately more talented, but because they applied specific habits and tools to embrace and overcome adversity in their lives. A framework for personal development, The School of Greatness gives you the tools, knowledge, and actionable resources you need to reach your potential. Howes anchors each chapter with a specific lesson he culled from his greatness "professors" and his own experiences to teach you how to create a vision, develop hustle, and use dedication, mindfulness, joy, and love to reach goals. His lessons and practical exercises prove that anyone is capable of achieving success and that we can all strive for greatness in our everyday lives.

The Medical School Interview

After completing the medical school application comes the last, and often most challenging aspect of the school selection process; the interview. Notoriously hard to prepare for, it's difficult to know what to read, what questions might be asked and how to answer them. *How to Succeed In Your Medical School Interview* de-mystifies the interview process. It provides clear guidelines and a unique framework; giving you the relevant points to consider while crucially leaving conclusions open to express your own opinions and personality. It provides a systematic and methodical process which enables you to mine information from examiners, whilst demonstrating your academic ability. With a huge bank of questions covering all aspects of the interview spectrum, including a specific section of Oxbridge questions, you will learn how to prepare, how to present yourself and most importantly, what to say.

We all want our children to reach their fullest potential—to be smart and well adjusted, and to make a difference in the world. We wonder why, for some people, success seems to come so naturally. Could the secret be how they were parented? This book unveils how parenting helped shape some of the most fascinating people you will ever encounter, by doing things that almost any parent can do. You don't have to be wealthy or influential to ensure your child reaches their greatest potential. What you do need is commitment—and the strategies outlined in this book. In *The Formula: Unlocking the Secrets to Raising Highly Successful Children*, Harvard economist Ronald Ferguson, named in a *New York Times* profile as the foremost expert on the US educational "achievement gap," along with award-winning journalist Tatsha Robertson, reveal an intriguing blueprint for helping children from all types of backgrounds become successful adults. Informed by hundreds of interviews, the book includes never-before-published insights from the "How I was Parented Project" at Harvard University, which draws on the varying life experiences of 120 Harvard students. Ferguson and Robertson have isolated a pattern with eight roles of the "Master Parent" that make up the Formula: the Early Learning Partner, the Flight Engineer, the Fixer, the Revealer, the Philosopher, the Model, the Negotiator, and the GPS Navigational Voice. The Formula combines the latest scientific research on child development, learning, and brain growth and illustrates with life stories of extraordinary individuals—from the Harvard-educated Ghanian entrepreneur who, as the young child of a rural doctor, was welcomed in his father's secretive late-night political meetings; to the nation's youngest state-wide elected official, whose hardworking father taught him math and science during grueling days on the family farm in Kentucky; to the DREAMer immigration lawyer whose low-wage mother pawned her wedding ring to buy her academically outstanding child a special flute. The Formula reveals strategies on how you—regardless of race, class, or background—can help your children become the best they can be and shows ways to maximize their chances for happy and purposeful lives.

In the US edition of this international bestseller, Adam Kay channels Henry Marsh and David Sedaris to tell us the "darkly funny" (*The New Yorker*) -- and sometimes horrifying -- truth about life and work in a hospital. Welcome to 97-hour weeks. Welcome to life and death decisions. Welcome to a constant tsunami of bodily fluids. Welcome to earning less than the hospital parking meter. Wave goodbye to your friends and relationships. Welcome to the life of a first-year doctor. Scribbled in secret after endless days, sleepless nights and missed weekends, comedian and former medical resident Adam Kay's *This Is Going to Hurt* provides a no-holds-barred account of his time on the front lines of medicine. Hilarious, horrifying and heartbreaking by turns, this is everything you wanted to know -- and more than a few things you didn't -- about life on and off the hospital ward. And yes, it may leave a scar.

"What would you do if you were in charge of the NHS?" "What is a clinical trial?" "Why Medicine?" These are examples of Real Questions that were asked in previous medical school interviews. Stumped? You don't need to be! Published by the UK's Leading Medical School Admissions Company, the *Ultimate Medical School Interview Guide* contains 150 Medical Interview Questions that have been asked at 25 UK Universities. It provides Fully Worked Model Answers for every single question and guides you through the topics and problems that each one raises. With contributions and advice from over 30 Specialist Medical School Tutors, this is your Ultimate companion to the Medical Interview and a MUST-BUY for those who have an upcoming medical school interview.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.
