

there. A breast, nipples, a tattoo. The killer was cutting his victims to pieces. . . "At that point, I pretty much went for the head." For ten years in Baton Rouge, Louisiana, the killings went on. Women of slight stature were hunted down, bludgeoned and strangled. And what the killer did with their bodies in the privacy of his car, his home, his kitchen, and his shower-was beyond anything police could imagine. "I was pure evil." When investigators finally caught mild-mannered, Star Trek fan Sean Vincent Gillis, he couldn't wait to tell his story. In the presence of shocked veteran detectives, Sean told them every detail of his killings, everything he did with the bodies. . . . And he smiled the whole time. . . . Includes 16 pages of shocking photographs Warning: Contains Graphic Details From venomous snakes to great white sharks to poison arrow frogs. Everything you need to know about animals that bite, sting, chomp and poison. Learn about - How to understand the "LD50" test that measures venom potency Why the world's most venomous creature isn't a snake, spider or jellyfish How the Komodo dragon is able to kill prey with one bite (Hint - it's not just its poor oral hygiene) Whether the Sydney Funnel-Web or the Brazilian Wandering Spider is the world's deadliest. Oh, and don't forget the Six-Eyed Sand Spider... How the world's most venomous snake has never killed anyone, yet a much less potent snake kills tens of thousands of people every year. And even this doesn't come close to the creature that kills more than a million people each and every year. This is not another serious encyclopedic reference to deadly animals (there are enough of those already!). Peter Elliott and his team of lowly paid researchers have spent months trawling through research papers and expert interviews to distill everything down to the most interesting and entertaining facts. Peter has spent almost every waking hour researching the animals in this books, to the extent that his dreams are now filled with Funnel-Web Spiders and a recurring nightmare where he is a Cape Fur Seal swimming in False Bay of the South African coast (This may be due to the fact that the author has a body fat percentage roughly approximating an adult seal). While Peter wakes up in a cold sweat each night, sure that Funnel-Web spiderlings have made a nest in his mouth while he slept, you can profit from his suffering with the most entertaining book on dangerous animals you are likely to read. The book covers only the most interesting and toxic snakes, spiders, scorpions, sharks, crocodiles, lizards and the dizzying array of things that will kill you if you dare to go into the water off Australia. Plus a clear explanation of the LD50 system for measuring how potent a particular venom is.

Stewart decided to search for his biological father at the age of thirty-nine, he never imagined his quest would lead him to a horrifying truth and force him to reconsider everything he thought he knew about himself. Written with award-winning author and journalist Susan Mustafa, The Most Dangerous Animal of All tells the story of Stewart's decade-long hunt. While combing through government records and news reports and tracking down relatives and friends, Stewart turns up a host of clues—including forensic evidence—that conclusively identifies his father as the Zodiac Killer, one of the most notorious and elusive serial murderers in history. At last, all the questions that have surrounded the case for almost fifty years are answered in this riveting narrative—a singular work of true crime at its finest as well as a sensational and powerful memoir.
