As a medical student, Samer Nashef was unofficially blacklisted when he started asking questions about the death rates of more senior surgeons. Since then, he has made his name challenging colleagues to be more open and accurate about the success of the procedures they perform. In The Naked Surgeon, Nashef unclothes his own profession, offering an unprecedented and often controversial view inside the operating

theatre. He explains how surgeons can 'game' the system to make their results appear better; why the way a surgeon ties the knot in a single stitch could make a life-or-death difference; and why patients operated on the day before a surgeon goes on holiday are twice as likely to die than those operated on during that surgeon's first day back. Full of eye-opening revelations about the cardiac surgeon's craft, The Naked Surgeon is necessary reading for anybody considering medical intervention now, or in the future.

This book is Sally Stanley's incredible journey and amazing testimony of God giving her "The Power To Go On."

Stricken with a staph infection which produced large painful sores all over her body, she was rushed into surgery, where the surgeon accidentally severed the main artery to her heart, causing blood to flood her chest cavity, which resulted with her dying on the operating table. This resulted in her "after death or out-of-body experience" and miraculous encounter with The Lord, as He spoke these marvelous words, "You have been chosen by God and your work is not finished." Upon her immediate restoration, she spent weeks on a ventilator and had several months of physical therapy. Over the next several years, Sally has

experienced and recovered from a fractured vertebrae, several strokes, and heart attacks. During this time period she also cared for her husband John, after he experienced seizures and strokes, which finally lead to his death on December 12, 2013. Then in May of 2014, while walking in a pedestrian crosswalk, she was suddenly hit by an automobile, suffering multiple injuries, including a shattered right shoulder and broken neck. Sally tells everyone that over the past 20 years, many miracles have happened in my life, but faith in Christ has given me "The Power To Go On." "I hope that everyone who reads this book will understand that with God, all things are possible. It is so great to know that we have Jesus walking with us each and every day."

Risk management is a relatively new process that can sometimes evoke feelings of suspicion among

clinicians. However, when used proactively, it offers the opportunity to act at the root cause of an incident to expose deficiencies in the system rather than in individuals. This process encourages a supportive approach to patients, relatives, and staff. The overall aim should be to learn lessons rather than to attribute blame. References 1. My Journey from Death to Recovery and the Redemptive Power of Hope

A riveting first-hand account of a physician who's suddenly a dying patient, In Shock "searches for a glimmer of hope in life's darkest moments, and finds it." –The Washington Post Dr. Rana Awdish never imagined that an emergency trip to the

hospital would result in hemorrhaging nearly all of her blood volume and losing her unborn first child. But after her first visit, Dr. Awdish spent months fighting for her life, enduring consecutive major surgeries and experiencing multiple overlapping organ failures. At each step of the recovery process, Awdish was faced with something even more unexpected: repeated cavalier behavior from her fellow physicians—indifference following human loss, disregard for anguish and suffering, and an exacting emotional distance. Hauntingly perceptive and beautifully written, *In Shock* allows the

reader to transform alongside Awdish and watch what she discovers in our carefully-cultivated, yet often misguided, standard of care. Awdish comes to understand the fatal flaws in her profession and in her own past actions as a physician while achieving, through unflinching presence, a crystalline vision of a new and better possibility for us all. As Dr. Awdish finds herself up against the same self-protective partitions she was trained to construct as a medical student and physician, she artfully illuminates the dysfunction of disconnection. Shatteringly personal, and yet wholly universal, she

offers a brave road map for anyone navigating illness while presenting physicians with a new paradigm and rationale for embracing the emotional bond between doctor and patient. It is a situation we all fear and none of us can imagine: a life-threatening diagnosis. But what if the person receiving the diagnosis--young, physically fit, poised for a bright future--is himself a doctor? At thirty-one David biro has just completed his residency and joined his father's successful dermatology practice. Struck with a rare blood disease that eventually necessitates a bone marrow transplant, Biro relates with

honesty and courage the story of his most transforming journey. He is forthright about the advantages that his status as a physician may have afforded him; and yet no such advantage can protect him from the anxiety and doubt brought on by his debilitating therapies. The pressures that Biro's wild "one hundred days" brings to bear on his heretofore well-established identity as a caregiver are enormous--as is the power of this riveting story of survival.
