

## The New Frontier Guided Reading

Michael Pasquier examines the ‘lived’ religion of French missionaries in their daily encounters with anti-Catholic Protestants and anti-clerical Catholics on the American frontier.

Meet Miradero’s best PALS, Lucky, Pru and Abigail, in the first leveled reader from DreamWorks Animation’s Spirit Riding Free! Alongside their horses, Spirit, Chica Linda, and Boomerang, the PALS go on adventures while exploring their frontier town, Passport to Reading Level 2 DreamWorks Spirit Riding Free © 2019 DreamWorks Animation LLC. All Rights Reserved.

Ape Man, Space Man Earth’s colonists have spread throughout the cosmos, and have almost divided into two separate species. One is the Swimmers, who have adapted to living in zero-gravity, and regard themselves as the next step in evolution, and those who prefer to live on the surface of a planet as little better than apes. The latter group, the Walkers, are not about to say farewell to the planets they grew up on, and think the Swimmers are not so much advanced as deranged. Crowell, born a Swimmer but now a Walker by choice, is caught in the middle as the two sides seem headed for war. Then he discovers the true cause of the altercation: a hidden alien race moving behind the scenes to provoke a war so that they can pick up the pieces after the two sides have obliterated each other. And if Crowell cannot head off the war and convince both sides of the existence of the real enemy, both branches of the human race may be headed for untimely extinction. This full-length novel and much more. Fill a huge volume from the master of science fiction adventure. At the publisher’s request, this title is sold without DRM (Digital Rights Management).

“Much has been made of the ‘sense of wonder’ that science fiction evokes, and believe me, there was nothing to evoke that sense quite like the worlds of James Schmitz. . . . Thank you, James Schmitz, wherever you are. And thank you, Eric Flint and Jim Baen, for bringing his Right Stuff back again.” %Mercedes Lackey “Take my advice and buy TWO copies of this book! You’ll want to lend it to friends and (trust me on this: I have years of experience to back up the observation) once people get their hands on a Schmitz book, they don’t let go!” % Janet Kagan, Hugo-winner and author of Uhura’s Song

This influential report described science as “a largely unexplored hinterland” that would provide the “essential key” to the economic prosperity of the post World War II years.

How America ’ s Schools Can Get Better at Getting Better

*Set in the post-Civil War Arizona “An Apache Princess” tells the tale of the frontier and the life of Native Americans. It follows the story of two young girls, one being the daughter of the Captain in Arizona fort, the other being the Apache girl, as they go through numerous adventures in the Wild West.*

*This book presents current evidence in an Enhanced Recovery Programme context, and provides a common sense approach to using the array of available analgesia techniques appropriately in major abdominal surgery. Current pain relief options are discussed, many of which have been described only in the last ten years. Topics covered range from the now widespread use of portable ultrasound machines to an appreciation of the value of some older drugs in a new context. Analgesia for Major Abdominal Surgery is aimed at anaesthetists, acute pain teams, and acute pain nurses, as well as colorectal, hepatobiliary, urological and gynaecological surgeons.*

*Catch this action-packed adventure about Ash, Pikachu, and their friends! This chapter book features classic characters featured on Netflix and in Pokémon Go! Trouble seems to be following Ash and his team around! A Quagsire takes the GS Ball. A young boy at a Pokémon Trainer school tries to catch Pikachu. And Team Rocket is up to their usual troublesome tricks. How will Ash ever get it together to go for his first Johto League badge? This chapter book is based on a thrilling storyline from the top-rated animated series now on Netflix. Black-and-white illustrations throughout.*

*This hugely influential work marked a turning point in US history and culture, arguing that the nation’s expansion into the Great West was directly linked to its unique spirit: a rugged individualism forged at the juncture between civilization and wilderness, which – for better or worse – lies at the heart of American identity today. Throughout history, some books have changed the world. They have transformed the way we see ourselves – and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives – and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.*

Iroquois Diplomacy on the Early American Frontier

**“A picaresque adventure and spiritual coming-of-age tale — On the Road crossed with Henderson the Rain King... Deeply affecting.” —Michiko Kakutani, The New York Times** Longlisted for an Andrew Carnegie Medal for Excellence in Fiction A captivating, often hilarious novel of family and wilderness from the bestselling author of *The Circle*, this is a fun for it, examining our contemporary life and a rousing story of adventure. Josie and her children’s father have split up, she’s been sued by a former patient and lost her dental practice, and she’s grieving the death of a young man senselessly killed. When her ex asks to take the children to meet his new fiancée’s family, Josie makes a run for it, figuring Alaska is about as far as she can get without a passport. Josie and her kids, Paul and Ana, rent a rattling old RV named the Chateau, and at first their trip feels like a vacation: They see bears and bison, they eat hot dogs cooked on a bonfire, and they spend nights parked along icy cold rivers in dark forests. But as they drive, pushed north by the ubiquitous wildfires, Josie is chased by enemies both real and imagined, past mistakes pursuing her tiny family, even to the very edge of civilization. A tremendous new novel from the best-selling author of *The Circle*, *Heroes of the Frontier* is the darkly comic story of a mother and her two young children on a journey through an Alaskan wilderness plagued by wildfires and a uniquely American madness.

Johnny Appleseed was an important historical figure, well known for planting apple orchards across the new frontier. But he was also a master storyteller! In his own folksy voice, Johnny Appleseed tells his story to a couple of entranced children in this fictionalized Step 2 title. Readers learn how he started planting apple trees—and about some of the myths and true stories of his life.

First there was downtown. Then there were suburbs. Then there were malls. Then Americans launched the most sweeping change in 100 years in how they live, work, and play. The Edge City.

Addressing important extensions of the relational database model, including deductive, temporal, and object-oriented databases, this book provides an overview of database modeling with the Entity-Relationship (ER) model and the relational model. The book focuses on the primary achievements in relational database theory, including query languages, integrity constraints, database design, computable queries, and concurrency control. This reference will shed light on the ideas underlying relational database systems and the problems that confront database designers and researchers.

The Boundaries of the New Frontier

**As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In *Learning to Improve*, the authors argue for a new approach. Rather than “implementing fast and learning slow,” they believe educators should adopt a more rigorous approach to improvement that allows the field to “learn fast to implement well.” Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how “networked improvement communities” can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. *Learning to Improve* offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation’s schools and colleges.**

**From his 1776 Pennsylvania homestead, thirteen-year-old Samuel, who is a highly-skilled woodsman, sets out toward New York City to rescue his parents from the band of British soldiers and Indians who kidnapped them after slaughtering most of their community. Includes historical notes.**

**Winner of the 2016 Pulitzer Prize for History** From the winner of two Pulitzer Prizes and a National Book Award, a brilliant biography of Gen. George Armstrong Custer that radically changes our view of the man and his turbulent times. In this magisterial biography, T. J. Stiles paints a portrait of Custer both deeply personal and sweeping in scope, proving how much of Custer’s legacy has been ignored. He demolishes Custer’s historical caricature, revealing a volatile, contradictory, intense person—capable yet insecure, intelligent yet bigoted, passionate yet self-destructive, a romantic individualist at odds with the institution of the military (he was court-martialed twice in six years). The key to understanding Custer, Stiles writes, is keeping in mind that he lived on a frontier in time. In the Civil War, the West, and many areas overlooked in previous biographies, Custer helped to create modern America, but he could never adapt to it. He freed countless slaves yet rejected new civil rights laws. He proved his heroism but missed the dark reality of war for so many others. A talented combat leader, he struggled as a manager in the West. He tried to make a fortune on Wall Street yet never connected with the new corporate economy. Native Americans fascinated him, but he could not see them as fully human. A popular writer, he remained apart from Ambrose Bierce, Mark Twain, and other rising intellectuals.

**During Custer’s lifetime, Americans saw their world remade. His admirers saw him as the embodiment of the nation’s gallant youth, of all that they were losing; his detractors despised him for resisting a more complex and promising future. Intimate, dramatic, and provocative, this biography captures the larger story of the changing nation in Custer’s tumultuous marriage to his highly educated wife, Libbie; their complicated relationship with Eliza Brown, the forceful black woman who ran their household; as well as his battles and expeditions. It casts surprising new light on a near-mythic American figure, a man both widely known and little understood.**

**Unrivaled by any other state for sheer size, Alaska is a land of mystery and wonder to many Americans. Bordered by water on three sides, it remains a remote and last frontier...until now. L is for Last Frontier: an alphabet book written by Carol Crane, takes readers on an informative adventure through the “land of the midnight sun.” Lecturer and book reviewer Carol Crane was recently described as “A walking, talking bibliography of children’s books.” Her twenty-five years in children’s literature supply the essential experience to bring Alaska’s vast wildlife and culture to children. Alaska’s sheer size lends to its diversity, but Carol Crane employs a two-tiered approach and produces a seamless sampling of the state’s culture and wildlife. Each letter of the alphabet is represented by a rhyme for younger readers: T is for Tundra, a treeless arctic plain. Short warm summers, in winter, a frozen terrain. On the same page, older students can read the sidebar text to gain a richer understanding of the same topic. About the Author: Carol Crane advocates education through reading. She travels extensively and speaks at state reading conventions across the United States. Her thematic approach to learning has been widely accepted and successfully used by many reading teachers. Eight years ago, she founded “Bed, Breakfast and Books,” a summer institute for teachers and media specialists across the country. L is for Last Frontier is Carol’s 4th book with Sleeping Bear Press. She lives with her husband, Conrad, in Bradenton, Florida. About the Illustrator: Renowned wildlife artist Michael Monroe was the winner of the 1997 Michigan Duck Stamp award.**

**The Literacy Triangle**

**A fresh history of the West grounded in the lives of mixed-descent Native families who first bridged and then collided with racial boundaries. Often overlooked, there is mixed blood at the heart of America. And at the heart of Native life for centuries there were complex households using intermarriage to link disparate communities and create protective clintons of kin. Beginning in the seventeenth century, Native peoples—Ojibwes, Ojotas, Cayennes, Chinooks, and others—formed new families with young French, English, Canadian, and American fur traders who spent months in smoky winter lodges or at boisterous summer rendezvous. These families built cosmopolitan trade centers from Michilimackinac on the Great Lakes to Bellevue on the Missouri River, Bent’s Fort in the southern Plains, and Fort Vancouver in the Pacific Northwest. Their family names are often imprinted on the landscape, but their voices have long been muted in our histories. Anne F. Hyde’s pathbreaking history restores them in full. Vividly combining the panoramic and the particular, *Born of Lakes and Plains* follows five mixed-descent families whose lives intertwined major events: imperial battles over the fur trade; the first extensions of American authority west of the Appalachians; the ravages of imported disease; the violence of Indian removal; encroaching American settlement; and, following the Civil War, the disasters of Indian war, reservations policy, and allotment. During the pivotal nineteenth century, mixed-descent people who had once occupied a middle ground became a racial problem drawing hostility from all sides. Their identities were challenged by the pseudo-science of blood quantum—the instrument of allotment policy—and their traditions by the Indian schools established to erase Native ways. As Anne F. Hyde shows, they navigated the hard choices they faced as they had for centuries: by relying on the rich resources of family and kin. Here is an indelible western history with a new human face.**

**Was Abe Lincoln absent-minded? Indeed! President Lincoln came up with a trick involving his stovepipe hat to nudge his memory! Fascinating anecdotes and historical context enrich this expanded biographical picture book that brings to life one of our nation’s most revered presidents. Long before he became the 16th president, Abe Lincoln started out as a frontier lawyer. He resorted to sticking letters and notes deep inside his hat so they stayed handy. Adapted from the Step into Reading leveled reader of the same name, author Martha Brenner has revised and enriched her original text to include more historical material and resources for those who want to explore this captivating figure further. Illustrator Brooke Smart’s clever art makes history more appealing than ever. Including both humor and painful, hard-hitting American history, this new edition traces Lincoln’s evolution into a compelling commander-in-chief during a contentious time in our nation’s history. Young readers will be intrigued!**

**This is a rhetorical case study in the evolving presentation of science to the public. Ploeger examines the communicative practices of the Fermi National Accelerator Laboratory in Chicago to show how the rhetoric of science functions as an indicator of the intellectual and political interests of scientific institutions.**

**With their rakish characters, sensationalist plots, improbable adventures and objectionable language (like swell and golly), dime novels in their heyday were widely considered a threat to the morals of impressionable youth. Roundly criticized by church leaders and educators of the time, these short, quick-moving, pocket-sized publications were also, inevitably, wildly popular with readers of all ages. This work looks at the evolution of the dime novel and at the authors, publishers, illustrators, and subject matter of the genre. Also discussed are related types of children’s literature, such as story papers, chapbooks, broadsides, serial books, pulp magazines, comic books and today’s paperback books. The author shows how these works reveal much about early American life and thought and how they reflect cultural nationalism through their ideological teachings in personal morality and ethics, humanitarian reform and political thought. Overall, this book is a thoughtful consideration of the dime novel’s contribution to the genre of children’s literature. Eight appendices provide a wealth of information, offering an annotated bibliography of dime novels and listing series books, story paper periodicals, characters, authors and their pseudonyms, and more. A reference section, index and illustrations are all included.**

**Why has the flow of big, world-changing ideas slowed down? A provocative look at what happens next at the frontiers of human knowledge. The history of humanity is the history of big ideas that expand our frontiers—from the wheel to space flight, cave painting to the massively multiplayer game, monotheistic religion to quantum theory. And yet for the past few decades, apart from a rush of new gadgets and the explosion of digital technology, world-changing ideas have been harder to come by. Since the 1970s, big ideas have happened incrementally—recycled, focused in narrow bands of innovation. In this provocative book, Michael Bhaskar looks at why the flow of big, world-changing ideas has slowed, and what this means for the future. Bhaskar argues that the challenge at the frontiers of knowledge has arisen not because we are unimaginative and bad at realizing big ideas but because we have already pushed so far. If we compare the world of our great-great-great-grandparents to ours today, we can see how a series of transformative ideas revolutionized almost everything in just a century and a half. But recently, because of short-termism, risk aversion, and fractious decision making, we have built a cautious, unimaginative world. Bhaskar shows**

**how we can start to expand the frontier again by thinking big—embarking on the next Universal Declaration of Human Rights or Apollo mission—and embracing change.**

**Accelerate learning with high-impact strategies. Beginning and veteran teachers alike will find insights and practices they can use immediately. The authors distill their proven instructional process of chunk, chew, check, change with before-, during-, and after-reading strategies in this must-have guide for powerful literacy instruction. No matter what content area you teach, this book will help you develop the strategic reader in every student. K-8 teachers who are interested in high-impact teaching strategies will: Learn how to incorporate the literacy triangle’s three points—reading, discussing, and writing—into instruction for any subject Cut through the conflict caused by the reading wars and gain clarity on the science behind effective, well-rounded literacy instruction Help students enjoy reading, gain comprehension, and build reading stamina Get differentiation ideas for scaffolding and enriching each strategy using best practices in literacy instruction Discover how to engage students in opportunities for making meaning, choosing texts, and leading discussions Understand how setting a student’s purpose for reading can encourage focus, engagement, deeper conversations, and a motivation to keep reading with literacy strategies Contents: Introduction Part 1: Planning for Quality Literacy Instruction Chapter 1: Teaching Literacy Effectively Chapter 2: Choosing the “Right” Text Chapter 3: Using the Literacy Triangle to Drastically Improve Literacy Part 2: Implementing Quality Literacy Instruction Chapter 4: Preparing for Success--Before Reading Chapter 5: Staying Focused on the Goal--During Reading Chapter 6: Consolidating With Discussion and Writing--After Reading Chapter 7: Bringing It All Together Conclusion References and Resources Index**

**This book appears at a time when the crisis rhetoric about schools, teaching, and learning to read is extremely high. There is a rising call within the profession for a balanced perspective on reading. *Balancing Principles for Teaching Elementary Reading* aspires to help set the agenda for improving the quality of literacy instruction in the United States--by recentering the debate from "What's better, "whole language" or "phonics"?" to "What can we do in reading instruction to prepare all children for the literacy demands of the next century?" The authors, all members of the professional community of reading educators, work on a daily basis with teachers in classrooms, prospective teachers, clinicians, and tutors. Their goal for this book is to represent what they have learned about effective teaching and learning as members of this community. It is written with four purposes in mind: \* to offer a principled conception of reading and learning to read that is considerate of both the personal dimensions of literacy acquisition as well as the changes that are taking place in society, \* to summarize key findings from the research that relate specifically to effective teaching practices, \* to describe current practices in reading instruction with specific comparisons to the principles of effective practices that are identified, and \* to suggest an action agenda that is school-based and designed to promote positive changes in the quality of instruction. This text offers a perspective for teaching that provokes members of the reading education community to think about their underlying beliefs about teaching and their shared commitment to making schools more effective for the students they serve. It is envisioned as a resource to be used in building a community of learners--to be read with professional colleagues in a course of study, in a teacher-researcher book club, or in some type of in-service setting. Readers are encouraged to debate the ideas presented, to challenge the authors' conceptions with their own reality, to make sense within a community about what action is desirable. Some specific suggestions and strategies are provided as springboards for further exploration and action.**

Joined by Gemma, a girl from Topsiside, Ty ventures into the frontier’s rough underworld and discovers some dark secrets to Dark Life. Secrets that threaten to destroy everything.

The Quiet PlaceSimon and Schuster

From Cicero to Snooki, the cultural influences on our American presidents are powerful and plentiful. Thomas Jefferson famously said “I cannot live without books.” and his library backed up the claim, later becoming the backbone of the new Library of Congress. Jimmy Carter watched hundreds of movies in his White House, while Ronald Reagan starred in a few in his own time. Lincoln was a theater-goer, while Obama kicked back at home to a few episodes of HBO’s “The Wire.” America is a country built by thinkers on a foundation of ideas. Alongside classic works of philosophy and ethics, however, our presidents have been influenced by the books, movies, TV shows, viral videos, and social media sensations of their day. In What Jefferson Read, Ike Watched, and Obama Tweeted: 200 Years of Popular Culture in the White House presidential scholar and former White House aide Tevi Troy combines research with witty observation to tell the story of how our presidents have been shaped by popular culture.
