My name is Betty Steinhauer. I have no address. I own very little besides what I carry with me as I roam the streets. Just stuff bundled in 9-10 suitcases parked with friends across the world. For me, being homeless is part of a bigger plan. After being hit by a car several years ago not long after retiring, I had an epiphany. I realised that I had been on my own spiritual journey since my first visit to India in 1990. Since then, I have travelled to 155 countries, sometimes as a tourist, sometimes on business, sometimes for my charity. I have made friends all over the world. But, I still had unanswered questions. So, I decided to sell everything, pack up my life and travel the world with a difference. This time I would journey not as a tourist but as a traveller wanting to learn from every wise person who crossed my path, and every challenging situation I found myself in. I would document my learning from the people I interviewed across the world. And so was born my new book, In Search of Spiritual Intelligence. Using the "Psychomatrix Spiritual Matrix" as a template, the author shows readers how to evaluate their individual spiritual needs and explains how to use one's self-knowledge to strengthen relationships, enhance communication, and live more fully. 30,000 first printing.

"When you are spiritually intelligent you become more aware of the big picture, for yourself and the universe, and your place and purpose in it."—Tony Buzan How do we develop a spiritual intelligence? How do we change ourselves so that we can live by the universal spiritual values? Seven Steps to Spiritual Intelligence tells us how to do so, while also summarizing fourteen centuries of spiritual wisdom in Islamic literature, from the great scholars and Sufis of Spain, Morocco, Turkey, and India. Musharraf Hussain, PhD, OBE, is the director of the Karimia Institute in Nottingham, United Kingdom. He has written numerous books on Islam including The Five Pillars of Islam and Seven Steps to Moral Intelligence.

In their new book Danah Zohar and Ian Marshall envisage two scenarios. The first is business as we know it today - all short-term interest, short-term gain, isolationist thinking, with the material bottom line as king. The second envisages a business culture driven by fundamental values and a deep sense of purpose in which wealth is accumulated to generate a decent profit while acting to raise the common good. The emphasis is on 'stakeholder value', where stakeholders include the human race, present and future, and the planet itself. These are the values of Spiritual Capital. The crucial question, which Zohar and Marshall address, is: How we can move from one scenario to the other? They show how we need to consider three types of capital to make the leap. Rational Intelligence (IQ) and Emotional Intelligence (EQ) are needed to diagnose the current state, and then the twelve qualities of Spiritual Intelligence (SQ) can be used to bring about the final transformation. The ultimate goal is sustainable capitalism within a framework of a more meaningful working life.

If our technological innovations have produced such advancements, why are we experiencing all-time record levels of global crises? Why has human ingenuity not sufficed? This life-changing book will test your assumptions about your spiritual aptitude and encourage you to examine your connectivity with the spiritual realm. While it's not intended to be a vehicle to make you more religious or self-righteous, it serves as a tool to enhance your spiritual intelligence. Through eye-opening analogies and practical strategies, you will come to appreciate it's not for a select group of ultra-spiritual elites but for everyday people like you and me. In an inspiring first-hand account, Denison shares a collection of detailed visions that transport others on an introspective ride through time and space as he views the future where all human minds are reprogrammed with "A New World Order" and a new thought process of "What Can I Do For You?" Human-to-human interactions are altered. Wars stop because of the new thought process. Additionally, Denison's visions take others back to a time when his deceased father-in-law appeared to him in solid form. Throughout his visions and stories, Denison asks introspective questions that encourage us to embrace the influence of visions to guide our direction in life. Visions is a collection of true stories that highlight the power of spiritual forces at work in one man's life as he learns to rely on his visions for guidance and creation of inventions.

It is all management, and management of everything and anything in business, trade, human relations, love, anger, hatred, stress, et al. S.Q. enables one to understand and perform the Real Role (ultimate purpose of human life) and the Functional Roles as father, mother, student, teacher, friend, employer, employee, etc. S.Q. does this by resolving the duality of inner and outer cosmos by proving to mankind that man is a mini universe. S.Q. is a function of faith. This book explains faith as a parameter precondition of S.Q., above intelligence, reason and science. Faith can never be blind.

From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, The Power of Now is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

Through prompt obedience, careful study of the Word, prayer, and exercising Kingdom rights, there are so many successes that can come to fruition. With God, nothing is impossible. There is nothing too hard for Him.

While there is no deficit of religious intelligence, there is a need for spiritual understanding. In essence, there is an intelligence that comprehends the divine-human connection with all of its privileges, promises, and responsibilities. This book is based upon this premise. Spiritual Intelligence is the ability to understand truths, facts, meanings, relationships, functions, and realities that are seen, unseen, heard and not heard. It is a privilege of the salvation experience that can be developed. While academic intelligence measures the ability to comprehend science, language, mathematics, and logical reasoning, it is not an adequate measurement of the capacity to understand information beyond the natural and sensory spheres. Spiritual Intelligence is an acquired sensitivity, awareness, and consciousness of the existence and integration of the divine-human connection.

First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company. In this groundbreaking book for the corporate world, government and institutions, Colin has succeeding in finding a way to present the Radical Forgiveness technology to the business community in a way that is meaningful to them, valuable and non-threatening. The sub-title of the book is: 'A Radical Approach to Increasing Productivity, Raising Morale and Preventing Conflict in the Workplace'. He claims that his technology, based on the original Radical Forgiveness technology, will enable firms to get a better return on their investment in their employees (basically by making them happier and less stressed.) He has called it the 'Quantum Energy Management System'.

At the beginning of the twentieth century psychologists discovered ways and means to measure intelligence that developed into an obsession with IQ. In the mid 1990's, Daniel Goleman popularised research into emotional intelligence, EQ, pointing out that EQ is a basic requirement for the appropriate use of IQ. In this century, there is enough

collective evidence from psychology, neurology, anthropology and cognitive science to show us that there is a third 'Q', 'SQ' or Spiritual Intelligence. SQ is uniquely human and, the authors argue, the most fundamental intelligence. SQ is what we use to develop our longing and capacity for meaning, vision and value. It allows us to dream and to strive. It underlies the things we believe in, and the role our beliefs and values play in the actions that we take and the way we shape our lives.

The Power of Creative Intelligence

Spiritual Intelligence refers to the intuitive knowledge of the self, others, situations and techniques to achieve the desired objectives. Hence it can be called the soul of all intelligences. Spiritual Intelligence enhances our power to inspire others by transforming their souls in such a way that their desires and aspirations are aligned in a single direction. Soul is beyond all reason and intellect. It is, in fact, the source of mind and intellect. One who knows his soul knows the universe, since soul is nothing but the microcosm of the universe. This book explains this body-soul continuum and suggests practical steps to evolve through the body-senses-mind-intellect to reach our soul. Welcome to this new path of spiritual evolution.

This compilation of essays by prominent thinkers in the New Thought field brings the power of meditation and prayer to readers in a very special and personal way. In addition to contributions by Jon Kabat-Zinn ("Mindfulness Meditation"), this collection includes essays by Thomas Moore, Larry Dossey, M.D., and many others.

Ray Kurzweil is the inventor of the most innovative and compelling technology of our era, an international authority on artificial intelligence, and one of our greatest living visionaries. Now he offers a framework for envisioning the twenty-first century--an age in which the marriage of human sensitivity and artificial intelligence fundamentally alters and improves the way we live. Kurzweil's prophetic blueprint for the future takes us through the advances that inexorably result in computers exceeding the memory capacity and computational ability of the human brain by the year 2020 (with human-level capabilities not far behind); in relationships with automated personalities who will be our teachers, companions, and lovers; and in information fed straight into our brains along direct neural pathways. Optimistic and challenging, thought-provoking and engaging, *The Age of Spiritual Machines* is the ultimate guide on our road into the next century.

How to Respond to Life's Toughest Issues with Spiritual Intelligence

What's Your Spiritual Quotient?

*Our brains are getting wired differently in the world of digital technology, information revolution, and in the inter-cultural world of global society. Think of the new vocabulary: Global brain, collective intelligence, global village, and cyberspace. That should tell us something about the neural rewiring that is taking place inside of our brains, whether or not we are aware of it. The fact that the human brain changes throughout a person's life in response to intellectual stimulation, physical exercise, exposure to new cultural environments, learning opportunities, and challenges is a revolutionary discovery. Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence. That is the old dogma. There is a "Second Copernican Revolution" taking place inside of our brains, writes the author, quoting Carl Zimmer. Some experts are suggesting that we are already living in what Richard Restack calls the "neurosociety." Ray Kurzweil, the futurist, is predicting that by 2045 A.D., human beings will be living in an era of "singularity," when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times. What is going to be the fate of the human spirit, human spirituality, the feeling of connection to a force and power that is greater than us (God), our ability to use spiritual imagination and our intelligence? Are we progressively moving away from religion and community-based spirituality into the "spirituality of different strokes for different folks?"
