

The Race For Perfect Inside The Quest To Design The Ultimate Portable Computer

Get Off the Sidelines and Run the Exhilarating Race of Your Life Do you feel sidelined or lacking in clarity and yet still pressured to succeed? You want a life that matters, but have you figured out what that looks like and how to get there? Billy Epperhart, entrepreneurial consultant and CEO of Andrew Wommack Ministries and Charis Bible College, has helped young and old alike get on track with God's will for their lives, and now, he's ready to coach you. In Run Your Race, Billy points out that all too often people's lives become a race full of hurry, comparison, and aimlessness—destined for nowhere. But God offers you a different race that's uniquely yours, marked by peace and clarity of purpose. Equipping you with vision and practical tools, Billy covers the three facets of your race: A deep dive into exploring your identity and calling that answers, "What is God's unique will for my life?" Follow God's roadmap, even through the day-to-day grind and nitty gritty of life from jobs to finances. Discover the picture of what success will look like when you fulfill God's plan for you. What are you waiting for? The starting gun has fired, and you're in the race of your life. Let Run Your Race coach you to your destiny! Personal computing has reshaped economies and industries, and is transforming how we express ourselves and relate to one another. The most personal of personal computers are the portables. We carry these gadgets with us wherever we go, whether they're laptops, smartphones, or the coolest new Web-surfing devices. The Race for Perfect tells the story of two generations of entrepreneurs, designers, and engineers as they have struggled to make ever-better portables. Steve Hamm takes the reader into a world where inspration, design, engineering, and marketing come together to produce wave upon wave of the innovative products that we love to talk about and use. From the earliest days of portable computing, 40 years ago, entrepreneurs and designers have pushed forward relentlessly in a quest to create the perfect device. Their efforts have produced a few fabulous successes and many failures. But they never give up. They're driven by the basic rule of the tech industry: innovate or die. In addition to a fascinating read, The Race for Perfect offers valuable lessons for business people in any industry, revealing how they must INNOVATE constantly to differentiate their products CREATE design principles that are timeless INTEGRATE design and engineering so products are both useful and fun to use IMPROVE quality and convenience without compromise TAP social networks to turn customers into fans At the center of this tale is the story of a single product, Lenovo's ThinkPad X300 laptop. Lenovo, the first Chinese company to seek to establish a global consumer brand, bought IBM's PC division in 2005 primarily to get the company's storied ThinkPad laptops. The X300 was conceived as a "halo" product that would draw customers to Lenovo's entire line. Woven through The Race for Perfect is a case study of how this ambitious company, with teams in Japan, the United States, and China, marshaled its resources to pursue laptop perfection. As X300 came close to the finish line, it collded head-on with Apple's super-slim MacBook Air—with surprising results.

An electrifying memoir of one woman's extraordinary effort to save her husband's life-and the discovery of a forgotten cure that has the potential to save millions more. "A memoir that reads like a thriller." -New York Times Book Review "A fascinating and terrifying peek into the devastating outcomes of antibiotic misuse-and what happens when standard health care falls short." -Scientific American Epidemiologist Stefanie Strathee and her husband, psychologist Tom Patterson, were vacationing in Egypt when Tom came down with a stomach bug. What at first seemed like a case of food poisoning quickly turned critical, and by the time Tom had been transferred via emergency medevac to the world-class medical center at UC San Diego, where both he and Stefanie worked, blood work revealed why modern medicine was failing: Tom was fighting one of the most dangerous, antibiotic-resistant bacteria in the world. Frantic, Stefanie combed through research old and new and came across phage therapy: the idea that the right virus, aka "the perfect predator," can kill even the most lethal bacteria. Phage treatment had fallen out of favor almost 100 years ago, after antibiotic use went mainstream. Now, with time running out, Stefanie appealed to phage researchers all over the world for help. She found allies at the FDA, researchers from Texas A&M, and a clandestine Navy biomedical center -- and together they resurrected a forgotten cure. A nail-biting medical mystery, The Perfect Predator is a story of love and survival against all odds, and the (re)discovery of a powerful new weapon in the global superbug crisis.

The famous playwright's enlightening and provocative criticism surveys the four Wagner operas known as The Ring. Shaw explores the works' philosophic and social ideology as well as Wagner's life, music drama versus grand opera, the role of the Leitmotif in unifying the cycle, Siegfried's character, and many other fascinating subjects.

The Index ... A Weekly Paper

A collection of new essays exploring the complex and unstable articulations of race and religion. Drawing on original research, the authors investigate how race and religion have defined global relations, shaped the everyday lives of individuals and communities and how communities use religion to contest the power of racism.

Vols. 39-214 (1874/75-1921/22) have a section 2 containing "Other selected papers"; issued separately, 1923-35, as the institution's Selected engineering papers.

This is the incredible story of the scientists who created a coronavirus vaccine in record time. In Longshot, investigative journalist David Heath takes readers inside the small group of scientists whose groundbreaking work was once largely dismissed but whose feat will now eclipse the importance of Jonas Salk's polio vaccine in medical history. With never-before-reported details, Heath reveals how these scientists overcame countless obstacles to give the world an unprecedented head start when we needed a COVID-19 vaccine. The story really begins in the 1990s, with a series of discoveries that were timed perfectly to prepare us for the worst pandemic since 1918. Readers will meet Katalin Karikó, who made it possible to use messenger RNA in vaccines but struggled for years just to hang on to her job. There's also Derrick Rossi, who leveraged Karikó's work to found Moderna but was eventually expelled from his company. And then there's Barney Graham at the National Institutes of Health, who had a career-long obsession with solving the riddle of why two toddlers died in a vaccine trial in 1966, a tragedy that ultimately led to a critical breakthrough in vaccine science. With both foresight and luck, Graham and these other crucial scientists set the course for a coronavirus vaccine years before COVID-19 emerged in Wuhan, China. The author draws on hundreds of hours of interviews with key players to tell the definitive story about how the race to create the vaccine sparked a revolution in medical science.

For the first time ever, the world's most respected names in the medical and scientific communities speak through trance-medium Elwood Babbitt addressing health and lifestyle issues critical to today's society. Dr. Wilhelm Reich, Einstein, Dr. Royal Rife, and Dr. Seymore Weiss, who previously worked through Edgar Cayce and other entities, offer their expert opinion on topics including AIDS, abortion, dieting, homosexuality, nutrition, religion and the purpose of life.

NOW AN HBO® DOCUMENTARY FROM AWARD-WINNING DIRECTOR JOHN MCGGIO • An important—and deeply sobering—new book about cyberwarfare” (Nicholas Kristof, New York Times), now updated with a new chapter. The Perfect Weapon is the startling inside story of how the rise of cyberweapons transformed geopolitics like nothing since the invention of the atomic bomb. Cheap to acquire, easy to deny, and usable for a variety of malicious purposes, cyber is now the weapon of choice for democracies, dictators, and terrorists. Two presidents—Bush and Obama—drew first blood with Operation Olympic Games, which used malicious code to blow up Iran’s nuclear centrifuges, and yet America proved remarkably unprepared when its own weapons were stolen from its arsenal and, during President Trump’s first year, turned back on the United States and its allies. And if Obama would begin his presidency by helping to launch the new era of cyberwar, he would end it struggling unsuccessfully to defend the 2016 U.S. election from interference by Russia, with Vladimir Putin drawing on the same playbook he used to destabilize Ukraine. Moving from the White House Situation Room to the dens of Chinese government hackers to the boardrooms of Silicon Valley, New York Times national security correspondent David Sanger reveals a world coming face-to-face with the perils of technological revolution, where everyone is a target. “Timely and bracing . . . With the deep knowledge and bright clarity that have long characterized his work, Sanger recounts the cunning and dangerous development of cyberspace into the global battlefield of the twenty-first century.”—Washington Post

The Inside Story of the Race for a COVID-19 Vaccine

A provocative case for integration as the single most radical, discomfiting idea in America, yet the only enduring solution to the racism that threatens our democracy. Americans have prided ourselves on how far we've come from slavery, lynching, and legal segregation-measuring ourselves by incremental progress instead of by how far we have to go. But fifty years after the last meaningful effort toward civil rights, the US remains overwhelmingly segregated and unjust. Our current solutions -- diversity, representation, and desegregation -- are not enough. As acclaimed writer Calvin Baker argues in this bracing, necessary book, we first need to envision a society no longer defined by the structures of race in order to create one. The only meaningful remedy is integration: the full self-determination and participation of all African-Americans, and all other oppressed groups, in every facet of national life. This is the deepest threat to the racial order and the real goal of civil rights. At once a profound, masterful reading of US history from the colonial era forward and a trenchant critique of the obstacles in our current political and cultural moment, A More Perfect Reunion is also a call to action. As Baker reminds us, we live in a revolutionary democracy. We are one of the best-positioned generations in history to finish that revolution.
