Children and young people in care rarely match the academic achievements of their peers and policy and procedures to address this inequality have not yet remedied the problem.

Drawing on ideas from social pedagogy, the authors present a new approach - learning placements and caring schools. They show that education and care must be considered integral to both out of home placements and schools. Packed with practice examples, it includes chapters on early childhood education and care, as well as alternatives to school and higher education, covering everything from birth up to the age of 25. It highlights the potential benefits of a range of learning opportunities, from drama and outdoor

activities, to bedtime stories and mentoring as well as providing support for teachers in their role as carer. Chapters include key points, case studies, practice points and useful resources. This is a unique evidence-informed practical guide for students and professionals in the fields of social work, social care, psychology and education. Recalling Tocqueville's exhortation for the French to "look to America" for a better understanding of their own government, John Rohr returns the favor by revealing how much we can learn about American constitutionalism from a close study of French governance. The French and American republics both emerged from the same revolutionary era and share a common commitment to separation of powers, rule of law, and republicanism. Even so, the two constitutional traditions are quite different. France, after all, has replaced its constitution at least thirteen times since 1789, while the American constitution has endured essentially intact. Yet, as Rohr shows, French constitutionalism merits our careful attention. Focusing

upon the founding of the French Fifth Republic and the drafting of its constitution, Rohr compares the nations' divergent approaches to executive, legislative, and judicial power; independent administrative authority and discretion; and the relation of administrative law to statutory law. His analysis of France's divided versus our unified executive, the two presidents' exceptional powers, and their influence on the legislative process provides particularly fresh insights into how the two constitutional traditions promote and inhibit the capacity for administrative action. Rohr shows that French administrative institutions are much more thoroughly developed than their American counterparts due to recurrent presidential and constitutional crises. Without such a strong public administration, daily life in France would likely be extremely unstable if not quite chaotic. The proper role of the French institutions, he suggests, is largely determined by their relationship to elected officials whereas their American counterparts are essentially shaped by the constitutional order. A model for

future comparative work in constitutional law and public administration, Rohr's study should help us see that the constitutional path we've pursued wasn't the only possibility—and why we've chosen that route nevertheless. As such, it should have great appeal for students, teachers, and practitioners in U.S. and French law, politics, and public administration.

Investigates pre-colonial West and West Central African women's lives prior to European arrival to recover the cultural traditions and religious practices that helped enslaved women combat violence and oppression.

Has politics reached breaking point? Rather than defending liberalism or abandoning it, how

can a socially just and ecological alternative be built? Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi. This book explores Polanyi's theory that social disruptions result from the attempt to run society according to the rules of the market. Drawing on these ideas, it outlines pathways towards an alternative future that overcome weaknesses in Marxism. Linking the ecological, political and socio-economic crises, Kirby identifies that an alternative socio-ecological model is emerging, consistent with the insights of Polanyi. Karl Polanyi and the Contemporary Political Crisis is an urgent intervention into key debates on the future of politics, on the low-carbon transition, on automation and on the emerging world order.

Blackness, as a concept, is extremely fluid: it can refer to cultural and ethnic identity, socio-political status, an aesthetic and embodied way of being, a social and political

consciousness, or a diasporic kinship. It is used as a description of skin color ranging from the palest cream to the richest chocolate; as a marker of enslavement, marginalization, criminality, filth, or evil; or as a symbol of pride, beauty, elegance, strength, and depth. Despite the fact that it is elusive and difficult to define, blackness serves as one of the most potent and unifying domains of identity. God and Blackness offers an ethnographic study of blackness as it is understood within a specific community—that of the First Afrikan Church, a middle-class Afrocentric congregation in Atlanta, Georgia. Drawing on nearly two years of participant observation and in-depth interviews, Andrea C. Abrams examines how this community has employed Afrocentrism and Black theology as a means of negotiating the unreconciled natures of thoughts and ideals that are part of being both black and American. Specifically, Abrams examines the ways in which First Afrikan’s construction of community is influenced by shared understandings of blackness, and probes the means through which individuals negotiate the tensions created by competing

constructions of their black identity. Although Afrocentrism operates as the focal point of this discussion, the book examines questions of political identity, religious expression and gender dynamics through the lens of a unique black church.

Fills a gap in scholarship on an increasingly important field within Political Science. Comparative Politics, the discipline devoted to the politics of other countries or peoples, has been steadily gaining prominence as a field of study, allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit.

Instant Wall Street Journal Bestseller! Congratulations, you're a manager! After you pop the champagne, accept the shiny new title, and step into this thrilling next chapter of your career, the truth descends like a fog: you don't really know what you're doing. That's exactly how Julie Zhuo felt when she became a rookie manager at the age of 25. She stared at a long list of

logistics--from hiring to firing, from meeting to messaging, from planning to pitching--and faced a thousand questions and uncertainties. How was she supposed to spin teamwork into value? How could she be a good steward of her reports' careers? What was the secret to leading with confidence in new and unexpected situations? Now, having managed dozens of teams spanning tens to hundreds of people, Julie knows the most important lesson of all: great managers are made, not born. If you care enough to be reading this, then you care enough to be a great manager. The Making of a Manager is a modern field guide packed everyday examples and transformative insights, including: * How to tell a great manager from an average manager (illustrations included) * When you should look past an awkward interview and hire someone anyway * How to build trust with your reports through not being a boss * Where to look when you lose faith and lack the answers Whether you're new to the job, a veteran leader, or looking to be promoted, this is the handbook you need to be the kind of manager you wish you had.

Handbook of Research on the Changing Role of College and University Leadership

Participating in the Management Process

Higher education has changed significantly over the past 50 years, and the individuals who provide leadership for these institutions has similarly changed. The pathway to the college presidency, once the domain of academic administration, has diversified as an increasing number of development officers, student affairs and enrollment management professionals, and even politicians have become common in the role. It is important to understand who the presidents are in the current environment and the challenges they face. Challenges such as dealing with the COVID-19 pandemic, enrollment shortfalls,

Title IX, and athletic scandals have risen to the forefront and have contributed to the issues and role of college and university leadership. The Handbook of Research on the Changing Role of College and University Leadership provides important research on the topic of college and university leadership, especially focusing on the changing role of the college president. The chapters discuss college leadership as it is now and how it will evolve into the future. Topics included are the role of the president at various types of universities, their involvement within university functions and activities, and the duties they must carry out and challenges they face. This book is ideal for professionals and researchers working in higher education, including faculty members who specialize in education, public administration, the social sciences, and management, along with teachers, administrators, teacher educators, practitioners, researchers, academicians, and students who are interested in college and university leadership and how this role is transforming.

The essays in Marriage Proposals envision a variety of scenarios in which adults would continue to join themselves together seeking permanent companionship and sustenance, linking sexual intimacy to a long commitment, usually caring for each other, and building new families. What would disappear are the legal consequences associated with marriage. No joint income tax return; no

immigration privileges like the “ fiancée visa ” or the right to bring in a husband or wife; no special statuses for prison visits or hospital decisions; no prerogative to remain silent in court by claiming “ confidential marital communications ” ; no pension entitlements; no marital benefits and detriments regarding criminal or civil liability. The anthology makes a unique contribution amid the two marriage furors of the day: same-sex marriage and the Bush Administration's “ marriage movement ” (that marrying is good and more marriages would be better for society). Abolishing the legal category of marriage is the only policy suggestion in current American discourse that speaks to both causes. Activists on both sides of the same-sex marriage fight, along with marriage movement partisans, all seek improvement through law reform. Marriage Proposals gives them a viable reform—abolition of marriage as a legal status—for fighting battles in the courtroom and the streets. Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill, New Jersey, USA The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and

Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. Gearge Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

The President performs many roles, but one role of increasing importance over time is that of chief manager of the economy. In the era of the modern presidency, there has been a growing institutionalization of the executive

branch's management of the economy. Presidents approach economic management differently depending upon their personalities, management style, and their time within both the crisis and the administration. Three case studies will be used to explore the differences and similarities in presidential actions during times of economic crisis. These case studies will examine the presidencies of Franklin D. Roosevelt, Richard M. Nixon, and William J. Clinton. The different methods and policy actions taken by these presidents are described as change oriented economic policy, electoral gain economic policy, and preemptive economic policy. This research will examine these methods to determine : how did each president approach economic policy, were their approaches similar to a domestic policy or foreign policy, and what factors influence these approaches.

The Role of President

The president of the United States' job is complex and has evolved throughout history. This informative text provides a clear understanding of how a person becomes president and their many responsibilities after their inauguration. Readers learn about how the president gets elected, their various roles, the power they have and how that is balanced with other branches of government, and controversies and hardships a president may face during their time in office. Full-color photographs, fact-filled sidebars, and informational graphic organizers enhance knowledge of this social studies curriculum topic and challenge readers to think critically about this important political position.

Utilizing a new and original framework for examining the role of intellectuals in countries transitioning to democracy, Bozóki analyses the rise and fall of dissident intellectuals in Hungary in the late 20th century. He shows how that framework is applicable to other countries too as he forensically examines their activities. Bozóki argues that the Hungarian intellectuals did not become a 'New Class'. By rolling transition, he means an incremental, non-violent, elite driven political transformation which is based on the rotation of agency, and it results in a new regime. This is led mainly by different groups of intellectuals who do not construct a vanguard movement but create an open network which might transform itself

into different political parties. Their roles changed from dissidents to reformers, to movement organizers and negotiators through the periods of dissidence, open network building, roundtable negotiations, parliamentary activities, and new movement politics. Through the prism of political sociology, the author focuses on the following questions: Who were the dissident intellectuals and what did they want? Under what conditions do intellectuals rebel and what are the patterns of their protest? This book will be of interest to students, researchers, and public intellectuals around the world aiming to promote human rights and democracy. Hailed by the New Yorker as "a superlative study of a president and his presidency," Lou Cannon's President Reagan remains the definitive account of our most significant presidency in the last fifty years. Ronald Wilson Reagan, the first actor to be elected president, turned in the performance of a lifetime. But that performance concealed the complexities of the man, baffling most who came in contact with him. Who was the man behind the makeup? Only Lou Cannon, who covered Reagan through his political career, can tell us. The keenest Reagan-watcher of them all, he has been the only author to reveal the nature of a man both shrewd and oblivious. Based on hundreds of interviews with the president, the First Lady, and hundreds of the administration's major figures, President Reagan takes us behind the scenes of the Oval Office. Cannon leads us through

all of Reagan's roles, from the affable cowboy to the self-styled family man; from the politician who denounced big government to the president who created the largest peace-time deficit; from the statesman who reviled the Soviet government to the Great Communicator who helped end the cold war.

Modern constitutionalism has put a lot of hopes in parliaments but there is some consensus that these hopes have not been entirely fulfilled. At the same time, the role of parliaments in contemporary democracies continues to evolve as parliaments are faced with new challenges. How should they react to the new forms of executive and administrative action? Should they play a role in upholding judicial independence, although the latter is frequently seen as independence from parliament as well as the executive? How should they contribute to the protection of fundamental rights? The book aims at providing some answers to these questions by first setting the historic scene, giving a comparative overview of the modern history of a selection of major European deliberative institutions (UK, France, Germany and the European Parliament). The book then looks at themes around the doctrine of separation of powers, especially aspects of the relationship between parliament and the executive power and parliaments' role and attitude regarding the judiciary with a special focus on the independence of the judiciary in a comparative perspective.

In spite of the existence of statistics and numerical data on various aspects of African American life, including housing, earnings, assets, unemployment, household violence, teen pregnancy and encounters with the criminal justice system, social science literature on how racism affects the everyday interactions of African American families is limited. How does racism come home to and affect African American families? If a father in an African American family is denied employment on the basis of his race or a wife is demeaned at work by racist slurs, how is their family life affected? Given the lack of social science literature responding to these questions, this volume turns to an alternative source in order to address them: literature. Engaging with novels written by African American authors, it explores their rich depictions of African American family life, showing how these can contribute to our sociological knowledge and making the case for the novel as an object and source of social research. As such, it will appeal to scholars and students

of the sociology of the family, race and ethnicity, cultural studies and literature.

Sound management principles can help ensure that early childhood programs provide sound services to children and families. This document contains three training modules detailing fundamental management concepts to help Head Start staff and parents provide quality services. Module 1, "What is Management?" helps participants recognize how they use basic management functions in their personal lives and in interactions with Head Start staff, parents, and children,

and includes activities to assess management skills. Module 2, "Everyone Plays a Role," links the concept of shared values with the process of teamwork and a comprehensive team approach to service delivery to allow participants to identify their own values and determine their roles in achieving the program's mission. Module 3, "Quality Is a Priority," helps participants understand the importance of quality and demonstrates how quality depends on shared Head Start values and the team process. Each module includes outcomes, key concepts, and background information that support the learning outcomes. Also, each module contains an opening activity related to the preface scenario so participants can apply key concepts to Head Start. The modules can be used sequentially, and the trainer can select and customize topics to match program needs. Various training formats are used: workshop activities, coaching activities, individualized follow-up activities related to each module, and continuing professional development activities. The final section of the guide is an annotated

list of 41 print, organizational, and electronic resources.

This is Volume 2 of a 3-volume study, *Asian Development Experience*, which is expected to contribute to research as well as policy-making in Asia and elsewhere. An earlier version of this study was supported by the Japan-ASEAN Solidarity Fund. *Governance in Asia Revisited* investigates the "missing link", the complicated realities of the relations between governance and development through case studies of ASEAN countries. Its main objective is to explore a theoretical framework to overcome the limitation of mainstream approaches by employing case studies on decentralization, crisis management, corporate governance and foreign aid management of both public and private entities. From the beginning of the 1990s onwards, the international aid community has increasingly stressed that "good governance" together with democracy and protection of basic human rights is indispensable for sustainable economic development. The terms, however, are complex, broad, and

vague. They largely refer to discipline of government, institution, capacity of public sector. While a wide variety of empirical studies has been done on the relations between good governance and development, it is still unclear how t

Have you mastered the 5 roles of the ideal leader? Good leaders know that professional expertise isn't everything. You have to know how to use that expertise effectively, and you'll do that by having the most crucial leadership skills. But leadership skills are often neglected during training, in school, and even at work. Instead, the focus is almost entirely on basic professional skills, leaving essential leadership training far behind. Due to this lack of training, many managers fail to deal with their team in an ideal manner; as a result, they experience internal conflicts, a lack of team motivation, and mediocre communication on a daily basis. So where does a professional go to learn the leadership skills that really help move the needle?

World Criminal Justice Systems, Ninth Edition, provides an understanding of major world criminal justice systems by discussing and comparing the systems of six of the world's countries -- each representative of a different type of legal system. An additional chapter on Islamic law uses three examples to illustrate the range of practice within Sharia. Political, historical, organizational, procedural, and critical issues confronting the justice systems are explained and analyzed. Each chapter contains material on government, police, judiciary, law, corrections, juvenile justice, and other critical issues. The ninth edition features an introduction directing students to the resources they need to understand comparative criminal justice theory and methodology. The chapter on Russia includes consideration of the turmoil in post-Soviet successor states, and the final chapter on Islamic law examines the current status of criminal

justice systems in the Middle East.

The SEND Code of Practice (2015) has reinforced the requirement that all teachers must meet the needs of all learners. This topical book provides practical, tried and tested strategies and resources that will support teachers in making history lessons accessible and exciting for all pupils, including those with special needs. The authors draw on a wealth of experience to share their understanding of special educational needs and disabilities and show how the history teacher can reduce or remove any barriers to learning. Offering strategies that are specific to the context of history teaching, this fully revised edition will enable teachers to:

- Make history education accessible and engaging to pupils of all abilities
- Create an inclusive classroom environment that responds to the emotional needs of the class and nurtures a culture of learning
- Develop inclusive practical demonstration and role play techniques to aid conceptual understanding
- Set assessment objectives
- Deploy in-class support effectively

An invaluable tool for continuing professional development, this text will be essential for teachers (and their teaching assistants) seeking guidance specific to teaching history to all pupils, regardless of their individual needs. This book will also be of interest to SENDCOs, senior management teams and ITT providers. In addition to practical activities and supporting material contained in the book, there are also free online resources for readers to download and use in the preparation of successful, inclusive lessons for all pupils.

First published in 1967, this book looks at what the role of a headteacher should be, challenging the traditional views of the head and the authoritarian structure of schools. Contributors explore new concepts of the head's role in school and authors include both theorists and headteachers coming from various backgrounds including those that are historical, philosophical, sociological, and practical. The book also benefits from some more down-to-earth musings by heads on the job. The collection as a whole offers a stimulating variety of views on a subject which is of importance to all teachers, as well as those concerned with management and decision making. Although first published some time ago, it explores issues that are ever present today.
