

The Routledge Companion To Arts Marketing

Discussing some of the pivotal questions relating to the complementary fields of theatre and performance studies, this engaging, easy-to-use text is undoubtedly a perfect reference guide for the keen student and passionate theatre-goer alike.

Since the 1990s, in response to dramatic transformations in the worlds of technology and the economy, design - a once relatively definable discipline, complete with a set of sub-disciplines - has become unrecognizable. Consequently, design scholars have begun to address new issues, themes and sub-disciplines such as: sustainable design, design for well-being, empathic design, design activism, design anthropology, and many more. The Routledge Companion to Design Studies charts this new expanded spectrum and embraces the wide range of scholarship relating to design - theoretical, practice-related and historical - that has emerged over the last four decades. Comprised of forty-three newly-commissioned essays, the Companion is organized into the following six sections: Defining Design: Discipline, Process Defining Design: Objects, Spaces Designing Identities: Gender, Sexuality, Age, Nation Designing Society: Empathy, Responsibility, Consumption, the Everyday Design and Politics: Activism, Intervention, Regulation Designing the World: Globalization, Transnationalism, Translation Contributors include both established and emerging scholars and the essays offer an international scope, covering work emanating from, and relating to, design in the United Kingdom, mainland Europe, North America, Asia, Australasia and Africa. This comprehensive collection makes an original and significant contribution to the field of Design Studies.

The Routledge Companion to Performance Philosophy is a volume of especially commissioned critical essays, conversations, collaborative, creative and performative writing mapping the key contexts, debates, methods, discourses and practices in this developing field. Firstly, the collection offers new insights on the fundamental question of how thinking happens: where, when, how and by whom philosophy is performed. Secondly, it provides a plurality of new accounts of performance and performativity – as the production of ideas, bodies and knowledges – in the arts and beyond. Comprising texts written by international artists, philosophers and scholars from multiple disciplines, the essays engage with questions of how performance thinks and how thought is performed in a wide range of philosophies and performances, from the ancient to the contemporary. Concepts and practices from diverse geographical regions and cultural traditions are analysed to draw conclusions about how performance operates across art, philosophy and everyday life. The collection both contributes to and critiques the philosophy of music, dance, theatre and performance, exploring the idea of a philosophy from the arts. It is crucial reading material for those interested in the hierarchy of the relationship between philosophy and the arts, advancing debates on philosophical method, and the relation between Performance and Philosophy more broadly.

There are deep and pervasive disagreements today in universities and colleges, and popular culture in general, over the credibility

and value of belief in God. This has given rise to an urgent need for a balanced, comprehensive, accessible resource book that can inform the public and scholarly debate over theism. While scholars with as diverse interests as Daniel Dennett, Terry Eagleton, Richard Dawkins, Jürgen Habermas, and Rowan Williams have recently contributed books to this debate, "theism" as a concept remains poorly understood and requires a more thorough and systematic analysis than it has so far received in any single volume. The Routledge Companion to Theism addresses this need by investigating theism's history as well as its relationship to inquiry in the sciences, social sciences, and humanities, and to its wider cultural contexts. The contents are not confined within the philosophy of religion or even within the more expansive borders of philosophy. Rather, The Routledge Companion to Theism investigates its subject through the lens of a wide variety of disciplines and explores the ramifications of theism considered as a way of life as well as an intellectual conviction. The five parts of the volume indicate its inclusive scope: I. What is Theism?; II. Theism and Inquiry; III. Theism and the Socio-Political Realm; IV. Theism and Culture; V. Theism as a Way of Life. The result is a well ordered and thorough collection that should provide a wide spectrum of readers with a better understanding of a subject that's much discussed, but frequently misunderstood. As the editors note in their Introduction, while stimulating and informing the contemporary debate, a key aim of the volume is to open new avenues of inquiry into theism and thereby to encourage further research into this vital topic. Comprised of 54 essays by leading scholars in philosophy, history, theology, religious studies, political science, education and sociology, The Routledge Companion to Theism promises to be the most useful, comprehensive resource on an emerging subject of interest for students and scholars.

Landscape is a vital, synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world, such as climate change, social alienation, environmental degradation, loss of biodiversity and destruction of heritage. As a concept, landscape does not respect disciplinary boundaries. Indeed, many academic disciplines have found the concept so important, it has been used as a qualifier that delineates whole sub-disciplines: landscape ecology, landscape planning, landscape archaeology, and so forth. In other cases, landscape studies progress under a broader banner, such as heritage studies or cultural geography. Yet it does not always mean the same thing in all of these contexts. The Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of 'landscape'. The Companion contains thirty-nine original contributions from leading scholars within the field, which have been divided into four parts: Experiencing Landscape; Landscape Culture and Heritage; Landscape, Society and Justice; and Design and Planning for Landscape. Topics covered range from phenomenological approaches to landscape, to the consideration of landscape as a repository of human culture; from ideas of identity and belonging, to issues of power and hegemony; and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis. Each contribution explores the future development of different conceptual and theoretical approaches, as well as recent empirical contributions to knowledge and understanding. Collectively, they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local, national and international policy in relation to landscape. This Companion provides up-to-date critical reviews of state of the art perspectives across this multifaceted field, embracing disciplines such as anthropology, archaeology, cultural studies, geography, landscape planning, landscape architecture, countryside management, forestry, heritage studies, ecology, and fine art. It serves as

an invaluable point of reference for scholars, researchers and graduate students alike, engaging in the field of landscape studies.

The Routledge Companion to the Contemporary Musical is dedicated to the musical's evolving relationship to American culture in the late twentieth and early twenty-first centuries. In the past decade-and-a-half, international scholars from an ever-widening number of disciplines and specializations have been actively contributing to the interdisciplinary field of musical theater studies. Musicals have served not only to mirror the sociopolitical, economic, and cultural tenor of the times, but have helped shape and influence it, in America and across the globe: a genre that may seem, at first glance, light-hearted and escapist serves also as a bold commentary on society. Forty-four essays examine the contemporary musical as an ever-shifting product of an ever-changing culture. This volume sheds new light on the American musical as a thriving, contemporary performing arts genre, one that could have died out in the post-Tin Pan Alley era but instead has managed to remain culturally viable and influential, in part by newly embracing a series of complex contradictions. At present, the American musical is a live, localized, old-fashioned genre that has simultaneously developed into an increasingly globalized, tech-savvy, intensely mediated mass entertainment form. Similarly, as it has become increasingly international in its scope and appeal, the stage musical has also become more firmly rooted to Broadway—the idea, if not

the place—and thus branded as a quintessentially American entertainment.

This multidisciplinary companion offers a comprehensive overview of the global arena of public art. It is organised around four distinct topics: activation, social justice, memory and identity, and ecology, with a final chapter mapping significant works of public and social practice art around the world between 2008 and 2018. The thematic approach brings into view similarities and differences in the recent globalisation of public art practices, while the multidisciplinary emphasis allows for a consideration of the complex outcomes and consequences of such practices, as they engage different disciplines and communities and affect a diversity of audiences beyond the existing 'art world'. The book will highlight an international selection of artist projects that illustrate the themes. This book will be of interest to scholars in contemporary

art, art history, urban studies, and museum studies.

The Routledge Companion to Biology in Art and Architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture. The book presents a diversity of hybrid art-and-science thinking, revealing how science and culture are interwoven. The book situates bioart and bioarchitecture within an expanded field of biology in art, architecture, and design. It proposes an emergent field of biocreativity and outlines its historical and theoretical foundations from the perspective of artists, architects, designers, scientists, historians, and theoreticians. Includes over 150 black and white images.
