Anarchist, journalist, drama critic, advocate of birth control and free love, Emma Goldman was the most famous—and notorious—woman in the early twentieth century. This abridged version of her two-volume autobiography takes her from her birthplace in czarist Russia to the socialist enclaves of Manhattan's Lower East Side. Against a dramatic backdrop of political argument, show trials, imprisonment, and tempestuous romances, Goldman chronicles the epoch that she helped shape: the reform movements of the Progressive Era, the early years of and later disillusionment with Lenin's Bolshevik experiment, and more. Sounding a call still heard today, *Living My Life* is a riveting account of political ferment and ideological turbulence. First time in Penguin Classics Condensed to half the length of Goldman's original work, this edition is accessible to those interested in the activist and her extraordinary era

Foreword by Bill Gates LinkedIn cofounder, legendary investor, and host of the award-winning *Masters of Scale* podcast reveals the secret to starting and scaling massively valuable companies. What entrepreneur or founder doesn't aspire to build the next Amazon, Facebook, or Airbnb? Yet those who actually manage to do so are exceedingly rare. So what separates the startups that get disrupted and disappear from the ones who grow to become global giants? The secret is blitzscaling: a set of techniques for scaling up at a dizzying pace that blows competitors out of the water. The objective of Blitzscaling is not to go from zero to one, but from one to one billion—as quickly as possible. When growing at a breakneck pace, getting to next level requires very different strategies from those that got you to where you are today. In a book inspired by their popular class at Stanford Business School, Hoffman and Yeh reveal how to navigate the necessary shifts and weather the unique challenges that arise at each stage of a company's life cycle, such as: how to design business models for igniting and sustaining relentless growth; strategies for hiring and managing; how the role of the founder and company culture must evolve as the business matures, and more. Whether your business has ten employees or ten thousand, Blitzscaling is the essential playbook for winning in a world where speed is the only competitive advantage that matters.

If you're ready to live as a diehard fly fisherman in the land of the midnight sun, you'd better be prepared to weather several long months of midnight. Set against the backdrop of a life spent in the latitudes of the Far North, follow the author as he casts about in search of arctic grayling, rainbow trout, and the ultimate truths in life. The author's existential pursuit of a "drag-free drift" borrows from the analogous concept in fly fishing, where one's line is mended as necessary to facilitate the fly's natural flow with the current. This book is targeted primarily towards the North American fly fisherman, and those around the world interested in experiencing the wilds of Alaska.

Die tiefe Wirtschaftskrise in Folge der Corona-Pandemie stellt Kubas Sozialismus vor eine ungeahnte Belastungsprobe. Die Regierung in Havanna hat eine grundlegende Reform von Wirtschaft, Institutionengefüge und Sozialsystem auf die Agenda gesetzt. Der Band vereint Beiträge führender internationaler Experten und von der Insel selbst, die aus unterschiedlichen Perspektiven die Herausforderungen analysieren, vor denen Kuba heute steht.

Doctor Felix Hoffmann is furious when an infusion pump mysteriously fails, nearly killing his eighty-two-year-old patient. But his

anger quickly turns to suspicion when he learns the patient's posh apartment is for sale — without the patient's knowledge. Together with his vivacious girlfriend, Celine, Felix discovers that someone at the hospital has concocted a deadly scheme to fleece geriatric patients and then hasten their deaths. Turns out he didn't save his patient from an equipment failure — he saved him from murder. When a suspicious accident turns the daring doctor into a patient at his own hospital, Felix must fight for his life while tracking down the killer. Can he unravel the scheme before the killer makes his rounds?

A succinct survey of Western popular music since the advent of sound recordings. Exhaustive in its coverage of musical genres and styles, including chapters on jazz, the blues, country & western, the Tin Pan Alley pop tradition, R&B, 1950s rock 'n' roll (and countless offshoots such as rockabilly, doo-wop, novelty songs, instrumentals, girl groups, teen idol), the British Invasion, the American Renaissance (most notably, soul, the California Sound, and folk rock), and the seemingly infinite variety of hybrids occurring since the late 1960s: progressive rock, disco, punk/new wave, alternative rock, rap/hip-hop, and much more. Representative recordings are noted for each discussed style. The author taught a University pop music survey course over the past 20 years.

A passionate natural history of extinct and endangered bird species from around the world.

From the bestselling author of *The Dovekeepers* comes a love story about one of history's most captivating 'invisible' women: Rachel, the mother of Impressionist painter Camille Pissarro. Growing up on the idyllic island of St Thomas in the early 1800s, Rachel dreams of life in faraway Paris. Rachel's mother, a pillar of their tight-knit refugee community of Jews who escaped the European Inquisition, has never forgiven her daughter for refusing to live by the rules. But Rachel's fate is not in her own hands: in order to secure the future of her father's business, she is married off to a widower with three children. When her husband dies suddenly and his handsome nephew Frédéric arrives from France to settle the estate, Rachel seizes control of her life, beginning a defiant, passionate love affair that sparks a scandal affecting her entire family, including her favourite son, Camille Pissarro, who will one day become a founder member of the Impressionists and one of history's greatest artists. Set in a world of lush, exquisite beauty, *The Marriage of Opposites* shows Alice Hoffman at the height of her considerable powers. The marriage of Rachel and Frédéric is an unforgettable story of an extraordinary woman and her forbidden love. Praise for Alice Hoffman's *The Dovekeepers*: 'Beautiful, harrowing . . . A major contribution to twenty-first-century literature' Toni Morrison 'Hoffman reminds us every sentence that words have the power to transport us to alternate worlds, to heal a broken heart, and to tie us irrevocably to the people we love' Jodi Picoult 'A book as monumental as its subject, magical, moving . . . A genuine masterpiece' Daily Mail

E. T. A. Hoffmann is seen as a pioneer of both Romanticism and fantasy literature, and his novella, Mademoiselle de Scudéri: A Tale from the Times of Louis XIV is often cited as the first ever detective story. Hoffman's story 'The Sandman' provided both the inspiration for Léo Delibes's ballet Coppélia, and the basis for a highly influential essay by Sigmund Freud, called 'The Uncanny'. Indeed, Freud referred to Hoffman as the "unrivalled master of the uncanny in literature." Many of the demonic and thriller stories, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

A New York Times and Sunday Times bestseller | A New York Times Book Review Editors' Choice Named a best book of the year by The Economist | Financial Times | New Statesman | The Telegraph "[Putin's People] will surely now become the definitive account of the rise of Putin and Putinism." —Anne Applebaum, The Atlantic "This riveting, immaculately researched book is arguably the best single volume written about Putin, the people around him and perhaps even about contemporary Russia itself in the past three decades." —Peter Frankopan, Financial Times *Interference in American elections. The sponsorship of extremist politics in Europe. War in Ukraine. In recent years, Vladimir Putin's Russia has waged a concerted campaign to expand its influence and undermine Western institutions. But how and why did all this come about, and who has orchestrated it? In Putin's People, the investigative journalist and former Moscow correspondent Catherine Belton reveals the untold story of how Vladimir Putin and the small group of KGB men surrounding him rose to power and looted their country. Delving deep into the workings of Putin's Kremlin, Belton accesses key inside players to reveal how Putin replaced the freewheeling tycoons of the Yeltsin era with a new generation of loyal oligarchs, who in turn subverted Russia's economy and legal system and extended the Kremlin's reach into the United States and Europe. The result is a chilling and revelatory exposé of the KGB's revanche—a story that begins in the murk of the Soviet collapse, when networks of operatives were able to siphon billions of dollars out of state enterprises and move their spoils into the West. Putin and his allies subsequently completed the agenda, reasserting Russian power while taking control of the economy for themselves, suppressing independent voices, and launching covert influence operations abroad. Ranging from Moscow and London to Switzerland and Brooklyn's Brighton Beach—and assembling a colorful cast of characters to match—Putin's People is the definitive account of how hopes for the new Russia went astray, with stark consequences for its inhabitants and, increasingly, the world.*

There are many challenges that children with Asperger's syndrome (AS) will have to overcome to reach their highest potential. In order to help them progress in constructive ways, those who care for and about these children often need to make changes too, sometimes difficult ones. Stuck provides a roadmap for understanding and addressing the complexities of AS, especially the presence of obsessive-compulsive behaviors (OCBs) that so frequently complicate basic functioning for both the child and others involved in their lives. The more knowledge and skills that caregivers can gain about these issues the better. Whether you are a parent, an educator, or a healthcare professional that wants to increase their awareness about Asperger's syndrome and obsessive-compulsive behaviors, you can benefit from the useful concepts and practical, action-oriented activities presented throughout this book.

In this revised edition, the author analyzes the new adversaries, motivations, and tactics of global terrorism that have emerged in recent years, focusing specifically on how Al Qaeda has changed since 9/11; the reasons behind its resiliency, resonance, and longevity; and its successful use of the Internet and videotapes to build public support and gain new recruits. He broadens the discussion by evaluating the potential repercussions of the Iraqi insurgency, the use of suicide bombers, terrorist exploitation of new communications media, and the likelihood of a chemical, biological, radiological, or nuclear terrorist strike. Looking at the U.S., he reconsiders the Timothy McVeigh case and the threats posed by American Christian white supremacists and abortion opponents as well as those posed by militant environmentalists and animal rights activists. He argues that the attacks on the World Trade Center fundamentally transformed the West's view of the terrorist threat.

The "explosive" (The New York Times) bestseller—now with a new introduction by the author When Hitler's Pope, the shocking story of Pope Pius XII that "redefined the history of the twentieth century" (The Washington Post) was originally published, it sparked a firestorm of controversy both inside and outside the Catholic Church. Now, award-winning journalist John Cornwell has revisited this seminal work of history with a new introduction that both answers his critics and reaffirms his overall thesis that Pius XII, now scheduled to be canonized by the Vatican, weakened the Catholic Church with his endorsement of Hitler—and sealed the fate of the Jews in Europe.

During the 17th and 18th century musicians' mobilities and migrations are essential for the European music history and the cultural exchange of music. Adopting viewpoints that reflect different methodological approaches and diversified research cultures, the book presents studies on central scopes, strategies and artistic outcomes of mobile and migratory musicians as well as on the transfer of music. By looking at elite and non-elite musicians and their everyday mobilities to major and minor centers of music production and practice, new biographical patterns and new stylistic paradigms in the European East, West and South emerge.

America's most advanced military unit rebels against the very government it's trying to protect in this pulse-pounding military thriller chock-full of suspense, adventure, and high-tech weaponry. Following their success in crushing an Iranian threat, General Patrick McLanahan's new "Aerospace Battle Force" has grown into a full-fledged task force, based on the Armstrong Space Station. But the program has its critics, including Russia, the United Nations, and the American press. Newly elected, President Joseph Gardner directs congress to cut off funding for this provocative force and dismisses McLanahan. What no one knows is that the Russians have blackmailed Gardner—the first step in a nefarious plan to control the world's oil supplies . With the ABF decommissioned, Russia deploys troops and warships into Turkmenistan, Iran, and the Persian Gulf. But McLanahan and his forces refuse to allow the Russian aggression to stand. Defying the civilian chain of command he orders the ABF to strike their forces. The president orders McLanahan's immediate arrest. But before authorities can throw him in jail, they have to find him. Located at one of the most secure bases, with an arsenal of the world's most sophisticated air weapons, he has control of the Aerospace Battle Force and the Armstrong Space Station. Army, Marine Corps, and FBI units converge on the base, but they are easily held off—for now. In a race against time, McLanahan must outmaneuver his own countrymen, and defeat the Russians, and expose the truth . . .

It ' s been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

It's been 101 days since Felix Hoffmann's girlfriend, Celine, left Berlin in a humanitarian convoy carrying aid to Kurdish northern Iraq. Now her coffin returns home. With the Iraq War all but begun, the story coming from Baghdad is that the young woman orchestrated the very bomb attack that killed her. But a devastated Felix, doctor at South Berlin Hospital, cannot believe that Celine would willingly participate

in such an act, and certain clues--as well as questioning from German, Iraqi, and American agencies--raise the good doctor's suspicions. A cryptic e-mail propels Felix to seek out the truth of what really happened to his lover. He discovers that part of the transported "humanitarian aid" was not actually humanitarian at all, leading him to believe that Celine's fateful mission bore a far more dangerous purpose...and a far different outcome. And when the truth surfaces, Felix must fight for his life--or become another casualty of war. This full-color text and practical clinical reference provides comprehensive information on herbal remedies for both large and small animal species. Key coverage includes clinical uses of medicinal plants, specific information on how to formulate herbal remedies, a systems-based review of plant-based medicine, and in-depth information on the different animal species--dog, cat, avian and exotic, equine, food animal, and poultry.

Can we trust our senses to tell us the truth? Challenging leading scientific theories that claim that our senses report back objective reality, cognitive scientist Donald Hoffman argues that while we should take our perceptions seriously, we should not take them literally. How can it be possible that the world we see is not objective reality? And how can our senses be useful if they are not communicating the truth?

Hoffman grapples with these questions and more over the course of this eye-opening work. Ever since Homo sapiens has walked the earth, natural selection has favored perception that hides the truth and guides us toward useful action, shaping our senses to keep us alive and reproducing. We observe a speeding car and do not walk in front of it; we see mold growing on bread and do not eat it. These impressions, though, are not objective reality. Just like a file icon on a desktop screen is a useful symbol rather than a genuine representation of what a computer file looks like, the objects we see every day are merely icons, allowing us to navigate the world safely and with ease. The real-world implications for this discovery are huge. From examining why fashion designers create clothes that give the illusion of a more "attractive" body shape to studying how companies use color to elicit specific emotions in consumers, and even dismantling the very notion that spacetime is objective reality, *The Case Against Reality* dares us to question everything we thought we knew about the world we see.

Dr. Felix Hoffmann is about to head home after a grueling night shift when he hears the words "This gun is loaded!" Hoffmann, long accustomed to helping others on the verge of death, suddenly finds himself — along with several colleagues and patients — at the mercy of a deranged blind kidnapper in the ICU. Deploying his own distinctive brand of diplomacy — and his characteristic acerbic wit — Hoffmann tries to convince the man to end the standoff while he still can. As the hot summer days tick by and the tension builds toward the shocking climax, Hoffmann is forced to reconsider who is friend and who is foe. The question becomes not only whether he can save the lives of all involved, but what this crisis reveals about the people he thought he knew best.

Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition — these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives brought by the book's European and American contributors — in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.
