*This book will appeal particularly to busy priests who are anxious to review quickly the teaching from Tradition, from the Bible, and from reason on any particular point of doctrine. It will be specially useful to students who desire to revise rapidly, in the vernacular, the tracts which they are presenting for examination. It makes available for educated laymen a scientific exposition of the whole field of Catholic teaching. Finally, Dr. Ott's work will be invaluable for use as a text-book by those priests whose duty it is to present to students, in a systematic way, the teaching of the Catholic Church. This is a theological manual, which gives the doctrines of the Faith and the level of Theological Certainty they enjoy. This will be useful for any Catholic who wishes to have a deeper appreciation of the Catholic Faith. Straightforward answers to all the arguments against Tradition The popular bestseller Where is That in the Bible? showed the Scriptural basis for often-questioned Catholic doctrines. Now the same author tackles the other half of the divine revelation. When someone accuses the Catholic Church of adding man-made doctrinal aberrations that go against Scripture, this is the book to reach for. When non-Catholics dispute the Church's teachings, they often distort the facts. This book clears away the distortions and explains what the Church has always taught about hot topics like Mary, praying for the dead, and indulgences. It also explains the difference between Tradition with a capital T and the many traditions that are simply customary. In fact, those doctrines that outsiders most often dispute are the very doctrines that, properly understood, bring people home to the Church. Share this book with a non-Catholic friend. You might be surprised by the results.*

In The Complete Life of Krishna, Vanamali, a leading Krishna expert from a long line of prominent Krishna devotees, provides the first book in English or Sanskrit to cover the complete range of the avatar's life. Drawing from the Bhagavad Purana, the Bhagavad Gita, the Mahabharata, and India's sacred oral tradition, Vanamali shares stories from Krishna's birth in a dungeon and early days as a merry trickster in Vrindavana, through his time as divine ruler at Dwaraka, to his final powerful acts as the hero Arjuna's charioteer and guru in the Kurukshetra war. She explains how Krishna became a mahayogi, the greatest of all yogis, and attained complete mastery over himself and nature. By integratng the hero-child with the mahayogi, the playful lover with the divine ruler, Vanamali shows how the stories of Krishna's life are expressed with such simplicity and humor that they enable anyone--man, woman, or child--to see the wisdom of his teachings. This complete biography of the man who was also a god provides a valuable meditative tool allowing Krishna's lessons to illuminate from within.**

*The problem of oral tradition is well known, for without some theory of this medium no history of Jesus would be possible. This study examines Mark 4.1-34 in the light of three distinctive models of orality: Rudolf Bultmann's form-critical method, B. Gerhardsson's 'Memory and Manuscript' theory and the recent contribution of W. Kelber. The form-critically separate units in the text (allegory, parables and aphorisms) are examined on the basis of their attestation in various documents (Mark, Q, Thomas) to determine whether independent versions of these sayings can be identified and what they tell us about the oral phase and Jesus. This analysis suggests that the criteria for authenticity of 'distinctiveness' and 'multiple attestation' need to be re-examined in light of the folkloric understanding of orality.*

*This book identifies the distinguishing features of fundamental theology, as distinct from philosophical theology, natural theology, apologetics, and other similar disciplines. Addressing the potential for confusion about basic Christian claims and beliefs, Gerald O'Collins sets out to relaunch fundamental theology as a discipline by presenting a coherent vision of basic theological questions and positions that lay the ground for work in specific areas of systematic theology. Rethinking Fundamental Theology examines central theological questions: about God, human experience and, specifically, religious experience; the divine revelation coming through the history of Israel and through the life, death and resurrection of Jesus; human faith that responds to revelation; the nature of tradition that transmits the record and reality of revelation; the structure of biblical inspiration and truth, as well as basic issues concerned with the formation of the canon; the founding of the Church with some leadership structures; the relationship between Christ's revelation and the faith of those who follow other religions. O'Collins concludes with some reflections on theological method. Written with the scholarship and accessibility for which O'Collins is known and valued, this book will relaunch fundamental theology as a distinct and necessary discipline in faculties and departments of theology and religious studies around the world.*

*The Soul of the Apostolate was the favorite book of Pope St. Pius X. This book shows how prayer is the soul of every apostolic work and is absolutely critical for apostolic success. Explores all the proved methods of developing and maintaining the interior life amid the bustle of daily activity. This excellent book will help you to understand the economy of salvation, as well as the many dead-ends that we fallen creatures tend to follow. A critically important introduction to the spiritual life! This important book has been recommended by Pope St. Pius X and his successor, Pope Benedict XV. Pope St. Pius X said, "If you desire that God should bless your apostolate and make it fruitful, undertake everything for His glory, saturate yourself and your devoted fellow-workers with the spirit of Jesus Christ, animating yourself and them with an intense interior life. To this end, I can offer you no better guide than The Soul of the Apostolate by Dom Chautard, Cistercian Abbot. I warmly recommend this book to you, as I value it very highly, and have myself made it my bedside book."*

This document's purpose is to spell out the Church's understanding of the nature of revelation--the process whereby God communicates with human beings. It touches upon questions about Scripture, tradition, and the teaching authority of the Church. The major concern of the document is to proclaim a Catholic understanding of the Bible as the "word of God." Key elements include: Trinitarian structure, roles of apostles and bishops, and biblical reading in a historical context.

Father Luigi Gambero, internationally-known expert on early Christianity, presents a comprehensive survey of the development of Marian doctrine and devotion during the first eight centuries. Focusing on the lives and works of over thirty of the most famous Church Fathers and early Christian writers, Fr. Gambero has produced a clear and readable summary of the richness of the patristic age's theological and devotional approach to the Mother of God. The book contains numerous citations from the works of those men who developed the defining Christological and Mariological positions that have constituted the foundational doctrinal teaching of the Church. Each chapter concludes with an extended reading from the works of the patristic authors. A number of these texts have never before been published in English. The thought of the Fathers and early Christian writers continues to fascinate readers today. Their theological acuity and spiritual depth led them faithfully into the mysteries of Sacred Scripture. Their vast experience made them reliable and trustworthy witnesses to the faith of the people of God.

The Havasupai Indians have called the Grand Canyon home for nearly 800 years. This is a book about early Havasupai Indian myths and stories. In 1918-1921 anthropologists Leslie Spier and Erna Gunther hiked to the bottom of the Grand Canyon to learn about, and record, then-living Havasupai culture. In the process they asked two Havasupai leaders and elders for every story they could remember. These 48 stories were translated by native speaker, but for unknown reasons were never published. Spier passed the manuscript on to Havasupai scholar Dr. Robert Euler, who entrusted the stories to his friend and colleague Frank Tikalsky. Tikalskys manuscript includes the Havasupai myths as Spier and Gunther recorded them almost a century ago.

Discusses less-represented and often misunderstood aspects of Western African culture and religion, placing an emphasis on the Yoruba and their Book of Enlightenment to provide coverage of such topics as Yoruba ancestry, oral literature and ethical values.

**Spoken words process knowledge differently from writing. What happens when speech turns into text? In reappraising literary scholars' propensity to trace Jesus' sayings back to the assumed original version, the author argues that in the oral medium each rendition of a saying is the original. Orality works with multiple originals, rather than with single originality. In what may be the most extraordinary thesis of the book, Keller argues that the written speech is related less by evolutionary progression than by contradiction to what preceded it.**

The hypothesis of this dissertation is that the forms and content of the sacred oral traditions of Palestinian Judaism provide an invaluable key to understanding the origin and development of primitive Christian tradition. In Part I Jewish traditions which have grown out of the Pentateuch are discussed. Selected primitive Christian traditions are examined in Part II. A synthesis (Part III) completes the study. Imagine today's top Catholic authors, apologists, and theologians. Now imagine 12 of them collaborating on a book that answers common questions about and challenges to the teachings and doctrines of the Catholic Church. Imagine no more, it's a reality. (How's that for an endorsement?)Catholic for a Reason, edited by Dr. Scott Hahn and Leon J. Suprenant, with the foreword by Archbishop Charles J. Chaput (yes, we're name dropping), will help Catholics and non-Catholics alike develop a better understanding of the Church. Each chapter goes to the heart of its topic, be it Mary, the Eucharist, Baptism, or Purgatory and in a clear, concise and insightful way, presents the teachings of the Church. Those teachings are explained in the light of the relationship of God the Father to us, his creatures.

Here in one volume are two of Birger Gerhardsson's much-debated works on the transmission of tradition in Rabbinic Judaism and early Christianity. In Memory and Manuscript (1961), Gerhardsson explores the way in which Jewish rabbis during the first Christian centuries preserved and passed on their sacred tradition, and he shows how early Christianity is better understood in light of how that tradition developed in Rabbinic Judaism. In Tradition and Transmission in Early Christianity (1964), Gerhardsson further clarifies the discussion and answers criticism of his earlier book. This Biblical Resource Series combined edition corrects and expands Gerhardsson's original works and includes a new preface by the author and a lengthy new foreword by Jacob Neusner that summarizes these works' importance and subsequent influence.

The discovery of a powerful memory technique used by our Neolithic ancestors in their monumental memory placesand how we can use their secrets to train our own minds In ancient, pre-literate cultures across the globe, tribal elders had encyclopedic memories. They could name all the animals and plants across a landscape, identify the stars in the sky, and recite the history of their people. Yet today, most of us struggle to memorize more than a short poem. Using traditional Aboriginal Australian song lines as a starting point, Dr. Lynne Kelly has since identified the powerful memory technique used by our ancestors and indigenous people around the world. In turn, she has then discovered that this ancient memory technique is the secret purpose behind the great prehistoric monuments like Stonehenge, which has puzzled archaeologists for so long. The hinges across northern Europe, the elaborate stone houses of New Mexico, huge animal shapes in Peru, the statues of Easter Island--these all serve as the most effective memory system ever invented by humans. They allowed people in non-literate cultures to memorize the vast amounts of information they needed to survive. But how? For the first time, Dr. Kly unlocks the secret of these monuments and their uses as "memory places" in her fascinating book. Additionally, The Memory Code also explains how we can use this ancient mnemonic technique to train our minds in the tradition of our forebears.

Written in the early 20th century, this biography of Protestant theologian Martin Luther includes illustrations and extracts from Luther's letters. Author Preserved Smith was an American historian who dedicated his life to the study of Luther and the Protestant Reformation. In addition to this volume, he edited collections of Luther's table talk and correspondence. He also wrote a noted biography of Erasmus of Rotterdam, a contemporary and rival of Luther.

This book offers global perspectives from Mediterranean, Asian, Australian, and American cultures on sacred sites and their related stories in regional history. Contemporary society witnesses many travelers visiting sacred sites (temples, mountains, castles, churches, houses) throughout the world. These visits often involve discovery of new historical facts through the origin stories of the associated tribe, region, or nation. The transmission of oral tradition and myth carries on the significant meaning of those religious sites. This volume unveils multi-angle perspectives of symbolic and mystical places. The contributors describe the religio-political experiences of each regional case, and analyze the religiosity of local people as a lens through which readers can re-examine the concept of iconography, syncretism, and materialism. In addition, contributors interpret the growth of new religions as the alternative perspectives of anti-traditional religions. This new approach offers significant insight into comprehending the practical agony and sorrow of regional people in the context of contemporary history.

*Leo Treller's seventeen classic essays trace the creation and spread of song (cantus), sacred and secular, through oral tradition and writing, in the European Middle Ages. The author examines songs in particular - their design, their qualities and character, their expressive meanings, and their adaptation to their communal and ritual roles - and explores the chances for, and the obstacles to, our understanding of traditions that were alive a thousand years ago. Ranging from c. 900 (when the written transmission of medieval songs began) to 1200, Treller shows how the earlier, purely oral traditions can be examined only through the lens of what has been captured in writing, and focuses on the invention and uses of writing systems for representing these oral traditions. Each of these seminal influential essays has been revised to take account of recent developments, and is prefaced with a new introduction to highlight the historical issues. The accompanying CD contains performances of much of the music discussed.*

In his final book, the late Arthur Hatto analyzes the Khanty epic tradition in Siberia on the basis of eighteen texts of Khanty oral heroic epic poems recorded and edited by a succession of Hungarian and Russian scholars in the nineteenth and twentieth centuries. The book examines the world view of an indigenous culture as reconstructed from its own words, demonstrates a flexible outline for organising an analytical dossier of the genre of oral heroic epic poetry in a specific culture, and presents an abundance of new information to compare with better-known heroic epics. Consisting of main sections on the Cosmos, Time, The Seasons, Geography, Spirits, Personae, Warfare, Armour and Weapons, and Men's Handiwork, the book also includes a section of background information on the Khanty people. Marianne Bakró-Nagy contributes specialist knowledge of the Khanty language to the linguistic interpretation of the texts, and there is an afterword by Daniel Prior.

Since the publication of The Sacred Harp tunebook in 1844, families of the rural Deep South have cultivated a tradition of singing that blends written notation with oral traditions and frames them with performance practices and social rituals that first coalesced in colonial New England. Since the latter 20th century, a revival of their traditions has cultivated a network of singing communities spanning the country. Existing scholarship on this Sacred Harp revival has explored the complex transmissions and negotiations of oral tradition, performance practice, and social ritual from traditional Southerners to a more geographically dispersed and ideologically heterogeneous revival community. Far less attention has been given to the role of printed music in shaping this revival. Throughout the Sacred Harp tunebook's centuryandahal existence, singers have composed new tunes to be added through periodic revision, but the modern revival has inspired a dramatic rise in the production of tunes newlycomposed in the book's historical styles, as well as new tunebooks collecting such material. This dissertation will take as its focus this scorecentered activity that has emerged from the Sacred Harp revival. Though singers and scholars alike attribute the greatest importance to immaterial dimensions of this tradition, I will argue that the score's materiality serves to structure the community by continually reinscribing the memories of singers within the very aesthetic materials that comprise their tradition. I will examine how scores have structured, negotiated, and reinvigorated the Sacred Harp community in the 20th century, with particular attention given to the revival era. Scorebased activity has also vastly outpaced the rate at which new material can be absorbed into the Sacred Harp tunebook and therefore Sacred Harp traditions. As a result, singers have organized new forums for the dissemination and compilation of this material. This activity will be explored as evidence of a new development in the Sacred Harp revival in which primarily revival singers are now using scores to structure communities and traditions standing apart from The Sacred Harp and its Deep South heritage.

**Faith Comes from What Is Heard: An Introduction to Fundamental Theology informs both the heart and mind as it brings together dogmatic and biblical theology, the Thomistic tradition, the teachings of the Fathers of the Church, and the contemporary Magisterium. Drawing heavily upon the works of St. Thomas Aquinas, Bl. John Henry Newman, Joseph Ratzinger, and St. John Paul II, the author examines the foundations of Catholic theology, or Fundamental Theology, "which is theology's reflection on itself as a discipline, its method, and its foundation in God's Revelation transmitted to us through Scripture and Tradition." Although Faith Comes from What Is Heard is useful for all Catholics who want to understand the foundations of their faith, it is specifically designed to serve as a textbook for courses in Fundamental Theology in seminaries and in graduate and undergraduate programs in theology. It can also serve as a textbook for introductory theology and Scripture courses.
