Extinction is one of the first works to focus specifically on fiction's engagements with human driven extinction.

Drawing together a diverse group of scholars and approaches, this volume pairs

established voices
in the field with
emerging scholars
and traditionally
recognized climate
fiction ('cli-fi') with
texts and media
typically not
associated with

is a volume that
both engages with

and furthers
existing work on
Anthropocene
fiction as well as
laying groundwork
for the budding
subfield of
extinction fiction.
This volume takes
up the collective
insistence on the
centrality of story

studies. In various
and disparate

ways, each
chapter engages
with the stories we
tell about

extinction, about
the extinction of
animal and plant
life, and about the
extinction of
human life itself.

Answering the call
