

The Traditional Bowyers Bible Volume 3

Shooting the Stickbow is the first comprehensive treatise on shooting modern recurves and longbows! It answers questions most asked by new archers and delves into topics not often considered, but critical to precision shooting for experienced authors. Topics include: equipment choices - bows, arrow, strings, shooting tabs and gloves, armguards, sights and stabilizers and necessary accessories shooting form - anchoring, shoulder alignment, back tension, breathing, variations in technique and more tuning - methods of visual, paper, bare shaft, walk-back and group tuning are described and compared aiming - six methods of aiming are fully compared and contrasted, including "instinctive" aiming physical and mental aspects of becoming a proficient archer - functional anatomy for the archer and how it relates to proper form and efficient shooting; techniques are given to optimize the archer's focus, confidence and how to prepare for the big event transitioning to Olympic archery - how to turn basic skills into reaching the gold at 70 meters teaching and coaching - how to find a good instructor or coach and how to approach teaching both new and experienced shooters archery history - dating back from the 1960s and 70s; what's changed and what hasn't Visit us at www.shootingthestickbow.com

Making a longbow in only two days? No sweat! In their two-day workshops, the bowmakers team of Kunst-Griff introduced many enthusiastic beginners to the basics of making a wooden longbow--demonstrating each action step by step, in a comprehensible and clear way. This compact book, now in color, brings their workshop to you! Covering basic topics like ideal wood selection and the individual parts of a longbow, as well as more advanced construction like tillering, leather grips, bow stringers, Flemish splices and bowyer's knots in detail, this guide provides you with the basics to get started with the fascinating hobby of bow making.

For anyone interested in the bow as a hunting tool, it is an endless fascination.

These volumes offer the combined experience of many bowmakers. In three indispensable volumes, the experts reveal their secrets and techniques, complete with important and entertaining historical highlights, hundreds of photographs and illustrations, and practical advice.

Teaching the Bow to Bend

Many archers and bowhunters are surprised to learn that a wooden bow, whose ancestry dates back thousands of years, will shoot an arrow as effectively as most modern bows. Never before have such detailed bow-making instructions been available to the home craftsman on how to bring such history alive.

• Now in full color, updated and revised throughout • Information on choosing a bow, setting up the bow and arrows, selecting tackle, and ordering a custom bow • Practical advice on storing and transporting bows and gear safely • The history of the bow and arrow and stories of the fathers of traditional archery • Includes a glossary of archery terms and advice for teaching beginning bowshooters

This is the first of a two-volume bible commentary covering the Psalms and examining the role of these biblical poems throughout Jewish and Christian history. Provides a fascinating introduction to the literary, historical, and theological background of psalmody Examines the psalms through liturgy and prayer, study and preaching, translation and imitation, and musical composition and artistic illustration

Includes illustrations of significant psalms, helpful maps, and an extensive bibliography; an expanded bibliography to accompany the book is also available at www.wiley.com/go/gillingham A forthcoming second volume is planned, which will take an alternative psalm-by-psalm approach Now available in paperback, and published in the innovative reception-history series, Blackwell Bible Commentaries

"An overview of one of the largest and most comprehensive collections of European and non-European archery-related materials in the world. This book presents color photos and descriptions of some 300 items - including bows, arrows, quivers, and thumb rings- that represent traditional archery techniques, practices, and customs from around the world"--Provided by publisher.

In this book you will find easy-to-follow instructions for making your own American Longbow from scratch, and advice on how to shoot it. It will take you through the entire process of building a

bow, from design to construction. In addition, it explores both the philosophical and concrete reasons why making your own bow will add to the story of your good life. If you've ever thought about making your own bow, this book is a good place to start.

Expert bowhunter and archery traditionalist Dan Bertalan has compiled the most complete bowmaking text available today. By traveling coast to coast and consulting America's top bowmakers, he has gathered the best information on how to build your own recurve longbow, improve your hunting skills, care properly for a bow, and more. Including descriptive photographs, diagrams, a complete glossary of terms, and reviews of particular bows that include draw/force measurements and hand-shot arrow speeds, this illuminating book will provide hunters, collectors, and others with invaluable insight into this specialized world. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

The Traditional Bowyer's Bible series includes three essential volumes filled with history, humor, and practical advice. Invaluable information for anyone interested in the age-old lure of archery.

What I Wish I'd Known When I Started

"The notorious Soviet Gulag gets a radical reinterpretation in this remarkable work of cutting-edge history. By examining the history of Vorkuta, an Arctic coal-mining outpost established in the 1930s as a prison camp complex, Alan Barenberg's insightful study tests the idea that the Gulag was an 'archipelago' separated from Soviet society at large"--Cover.

Author Brian J. Sorrells shares his time-tested training program for developing shooting skill and provides guidance on all aspects of traditional archery, from choosing arrow shafts to entering your first tournament.

Jim Hamm (co-author, editor, and publisher of The Traditional Bowyer's Bible series) shares the secrets he's learned from a lifetime of bowmaking. Veteran bowyers and newcomers alike will appreciate his invaluable insights.

"Hunting with the Bow & Arrow" by Saxton T. Pope. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Volume 4

Stone Age Skills for the 21st Century

Experienced bow builders and practical archaeologists describe the history, evolution and construction of European style longbows in this new and engaging book. For the beginner, clear, uncomplicated instructions are offered, including descriptions of construction techniques, tools, materials, and shooting styles. For more advanced bowyers there are tips on choosing wood and adhesive, and explanations of the evolution/adaptation of bow design, including precise dimensions for replicating special historic bow types, from Stone Age bows to modern laminated longbows. This book also offers comprehensive instructions on how to properly test your newly built longbow and constructing arrows. Chuck it all and live in a cave? No way! Adopt some Stone Age skills? Absolutely! This information-packed book doesn't just talk, it shows you ways to bring the best of our environment into your life. The relevant skills and ideas in EARTH KNACK will not only have you creating objects, but will also give you a new sense of self-fulfillment and self-worth.

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

Psalms Through the Centuries

Wood Fever

How to Make One, and Its Place in a Good Life

Bows & Arrows of the Native Americans

The Sacred Books of China

A complete step-by-step guide to Native American bows and arrows, including information on how to build and care for wooden bows, sinew-backed bows, composite bows, strings, arrows, and quivers. Enlightening and entertaining, this book has easy-to-follow instructions for the reader who plans to make and use his own bow, and offers good reading for the armchair archer.

The second volume in The Traditional Bowyer's Bible series covers ancient European bows, Eastern Woodland bows, recurves, strings, steel points, quivers, and much more.

Thrilling stories about hunting wildcat, buffalo, mountain sheep, wild boar, alligator, deer and small game with a bow and arrow.

The Traditional Bowyer's Bible is a remarkably in-depth analysis of the wooden bow from its construction to its correct use by leading experts in the field. The emphasis here is on the history of these weapons and methods for building them from scratch, just as they were made before the advent of firearms. Invaluable information for anyone interested in the age-old lure of archery.

The Backyard Bowyer

Some young people today are indifferent about the Christian faith because they don't identify with anyone in Scripture or in their church. Others are excited about the faith and hungry for role models to show them how to pursue their ideals. *Extreme Faith*, a book created for the Extreme for Jesus line, addresses both needs. *Extreme Faith* is a collection of fresh, youth-oriented character studies that show readers what a difference young people made in Bible times. This book devotes a chapter to each character profile, telling stories of amazing Bible characters such as Isaac, Esther, and Josiah in detail and showing how today's youth can follow their examples and make a difference in their world. Includes snapshot profiles of modern young people whose lives are extreme for Jesus.

With over 300 step-by-step pictures, the *Backyard Bowyer* is geared for the beginning bowyer, backyard hobbyist, and anyone who has ever pondered building a wooden bow. Easy to read and follow steps go down to even the smallest detail in the design and construction of basic archery bows. Learn to craft fine wooden bows without huge investment in equipment and materials, and without being bound by location and limited workspace. Learn to construct: A classic target flat bow, an English Longbow suitable for hunting, and even your own strings and arrows for traditional and primitive archery.

With combined experience totally over a century, the authors have constructed thousand of wooden bows. Every facet of the process is thoroughly explained, making construction easy even for the first-time bowyer.

The *Rip Curl Story* is the remarkable tale of two young surfers - Doug 'Claw' Warbrick and Brian Singer - who pursued an audacious dream to make a living in pursuit of the ultimate ride. The brand they built, Rip Curl, not only satisfied their own surf wanderlust, but also inspired countless others, riding the wave of the global youth revolution of the late '60s. Rip Curl's mantra became 'the Search': the pursuit of new waves on distant shores, new thrills - skiing, snowboarding, windsurfing - and better equipment to elevate the experience. Along the way they supported the careers of many of the world's great surfers - from Midget Farrelly to Michael Peterson, Tom Curren to Damien Hardman, Pam Burridge to Stephanie Gilmore, and of course Tyler Wright and Mick Fanning. Bestselling surf writer Tim Baker tells this implausible story in an irresistible series of ripping yarns, offering rich life lessons, a maverick business primer and a wild ride of adventure, good times and outlandish ambitions spectacularly realised. The *Rip Curl Story* will make you want to surf more, travel further, follow through on that great business idea and pursue your own Search.

Making a Longbow

50 years of perfect surf, international business, wild characters and the search for the ultimate ride

First edition published under title, *Deerskins into buckskins: how to tan with natural materials; a field guide for hunters and gatherers*, c1997.

Experience lifelong pleasure in making wooden bows! This full-color book explains how you can do that with local wood types and simple everyday tools and techniques. *Wood Fever* is a comprehensive guide, packed with illustrations, schematics, and background information. Step-by-Step it guides you through the basic process of transforming trees and boards into beautiful solid wooden bows

(selfbows). All steps are illustrated with more than 360 full-color pictures and drawings. In a clear and easy to understand fashion, you will learn all about: Design and performance Wood selection Splitting logs and preparing boards Drying wood Making bow staves and raw bows Tillerling Finishing Maintenance Strings and Arrows Because Wood Fever is also loaded with background information it allows you to make your very own choices in the bow-making process. And there is much to choose! Once you know how, you will be able to make excellent bows from almost any type of wood. There truly is a bow in every tree. So, go out there, find some wood, grab some tools, and experience the same thrills as your ancestors did 10,000 years ago. Imagine: there you are, holding a piece of wood you've worked yourself, shooting feathered sticks, which close in on their goal with a whirring sound - and then hit it with a satisfying thwack. Big chance that you will never be the same again: you've got wood fever. About the author: For almost 20 years, Jan van der Veen has been making, designing, and repairing wooden bows. Through bow-building workshops and his website he also helped hundreds of bow enthusiasts to get started in the ancient craft of Bowery. This hand book is the culmination of these many years of hands-on experience. Wood Fever contains the essence of bow making.

I can't really explain my attraction to the bow and arrow. I can't explain the pull of a camp fire either, or the ocean, or the open hills where you can see forever. It's just there. These things are in all of us I think, some vestige of our primitive past buried so deep in our genome as to be inseparable from what it is to be human. What we think of as civilization is a new experiment in the eyes of Father Time. Experts say that humans have been around for some fifty thousand years. We've been carrying the bow for maybe five thousand (atlatls and spears before that), and pushing the plow for maybe two thousand. We have been hunters forever. We are built to run, to pursue big game on the open savannas, to kill and eat them. With the dwindling of the Pleistocene mega fauna, mammoths and such, the bow became more important and indeed helped to make us who we are today. It still holds that attraction, same as the hearth. When I was a kid I would make crude bows from green plum branches, big at one end and small at the other. A discarded hay string would serve as a bowstring. My arrows were fat and unfletched and would scarcely fly more than a few yards, usually tumbling over in midair. The small creatures around our home were plenty safe. When I was about 12 or so my brother brought me two old Ben Person recurves he'd found at a yard sale. One was a short bow, probably no more than 48 inches and the other was more of a standard size. They both drew about 50 lbs if I recall. That fall happened to be a good year for cottontails around our little farm and I spent countless hours walking the fields and shooting at them as they busted from underfoot. Although I'd get several shots a day I never did hit one on the fly but I remember that fall fondly nonetheless. The pleasure of jumping rabbits and seeing the feathered shaft streaking toward them was a thrill I've never forgotten. I made my first "real" bow when I was in high school, after getting a copy of the Traditional Bowyers Bible in the mail (more on this in a moment). My first bow, a decrowned mulberry flatbow, broke within about 10 shots. The second held together quite well and is probably still around somewhere and capable of shooting an arrow, though it would probably draw about 70lbs. When I first started making bows I used the woods I had close at hand; mulberry, common persimmon, red maple, white cedar, etc. I'd probably made more than a dozen bows of various woods before I ever saw a piece of Osage. People often ask me where they can find a bow stave and, invariably, I tell them to use what they have close by. No matter where you live, you'll have something near that will make a bow. Go cut it down and get started. This book is an attempt to share some of what I've learned over my years of bow making. The Traditional Bowyers Bible series, as mentioned earlier, is still a great source of information. Why write another book on making wood bows you might ask? The simple answer is that there are so many ways of doing and explaining things. There are still unanswered questions and we'll cover many of them here. We will cover all of the most frequently asked questions, and lay out a simple plan that should guide you through the entire process, from finding a stave to stringing your bow and shooting your first arrow. Some of what you'll find here, you'll find nowhere else.

Along with Sun Tzu's The Art of War, The Book of Five Rings is considered to be one of the most insightful texts on the subtle arts of confrontation and victory to emerge from Asia. It analyzes the process of struggle and mastery over conflict that underlies every level of human interaction. For Musashi, the way of the martial arts was a mastery of the mind rather than simply technical prowess-and it is this path to mastery that is the core teaching in The Book of Five Rings. This brilliant manifesto is written not only for martial artists but for anyone who wants to apply the timeless principles of this text to their life.
