

The Well Of Monte Corbo

The book is a reference guide to James Michener and his work. A general section about Michener relating to his origins in Bucks County is followed by synopses of Michener's books. The focus is on information that does not appear elsewhere and a bit of a tour of Doylestown. Meet a Michener you may not have met before.

Quantum Monte Carlo Simulations of Ultracold Bosons

in a Double Well

We present path integral ground state (PIGS) quantum Monte Carlo calculations for the ground state ($T = 0$) properties of repulsively interacting bosons in a three-dimensional external double well potential over a range of interaction strengths and potential parameters. We focus our calculations on ground state number statistics and the one-body density matrix in order to understand the level of squeezing and fragmentation that the system exhibits as a function of interaction strength, and we compare

our PIGS results to both a standard and an improved two-mode model and a recently-proposed eight-mode model. In general, the various models agree with the PIGS simulations for weak interactions, but the full quantum Monte Carlo treatment is required to correctly predict the amount of squeezing and fragmentation exhibited for strong interactions. One novel and somewhat surprising result from our simulations involves the relationship between squeezing and interaction strength: rather than a monotonic relationship between these quantities, we find

that for certain double well barrier heights the squeezing increases as a function of interaction strength until it reaches a maximum, after which it decreases again. We also see a similar relationship between fragmentation and interaction strength. We propose novel physical mechanisms to account for this behavior.

crossroads of three of the world's most influential religions -- Judaism, Christianity, and Islam. Ranging from prehistoric times up to the early centuries of the rise of Islam, the work covers the civilizations of Syria-Palestine, Mesopotamia, Anatolia, Iran, Arabia, Cyprus, Egypt, and the coastal regions of North and East Africa. It includes 1,125 alphabetically arranged entries on sites, languages, material culture, archaeological methods, organizations and institutions, and major excavators and scholars of the field. This one-of-a-kind, accessibly written reference brings new breadth to the study of archaeology in the biblical world, making it a valuable resource not only to scholars and students of archaeology, but also to

Remains of the Jews studies the rise of Christian Empire in late antiquity (300-550 C.E.) through the dense and complex manner in which Christian authors wrote about Jews in the charged space of the "holy land." The book employs contemporary cultural studies, particularly postcolonial criticism, to read Christian writings about holy land Jews as colonial writings. These writings created a cultural context in which Christians viewed themselves as powerful—and in which, perhaps, Jews were able to construct a posture of resistance to this new Christian Empire. Remains of the Jews reexamines familiar types of

literature—biblical interpretation, histories, sermons, letters—from a new perspective in order to understand how power and resistance shaped religious identities in the later Roman Empire.

its scope, The Oxford Dictionary of the Christian Church is the indispensable one-volume reference work on all aspects of the Christian Church. It contains over 6,000 cross-referenced A-Z entries, and offers unrivalled coverage of all aspects of this vast and often complex subject, from theology; churches and denominations; patristic scholarship; and the bible; to the church calendar and its organization; popes; archbishops; saints; and mystics. In this revision, innumerable small changes have been made to take into

account shifts in scholarly opinion, recent developments, such as the Church of England's new prayer book (Common Worship), RC canonizations, ecumenical advances and mergers, and, where possible, statistics. A number of existing articles have been rewritten to reflect new evidence or understanding, for example the Holy Sepulchre entry, and there are a few new articles, on Desmond Tutu and Padre Pio, for example. Perhaps most significantly, a great number of the bibliographies have been updated.

The ancient Dormition and Assumption traditions are a collection of over sixty different narratives, preserved in nine ancient languages, that commemorate the

end of the Virgin Mary's life. These traditions have long been overlooked by scholars of early Christianity, no doubt largely because this complicated corpus was insufficiently well known. The present study aims to remedy this situation with a detailed analysis of the earliest traditions of Mary's death, including liturgical and archaeological evidence as well as the numerous narrative sources. Several of the most important narratives are translated in appendices, many appearing in English for the first time.

*Excavations in the City of David,
Jerusalem (1995–2010)*

The City of David, more specifically the southeastern hill of first- and second-millennium BCE Jerusalem, has long captivated the imagination of the world. Archaeologists and historians, biblical scholars and clergy, Christians, Muslims, and Jews, and tourists and armchair travelers from every corner of the globe, to say nothing of politicians of

all stripes, look to this small stretch of land in awe, amazement, and anticipation. In the City of David, in the ridge leading down from the Temple Mount, hardly a stone has remained unturned.

Archaeologists have worked at a dizzying pace digging and analyzing. But while preliminary articles abound, there is a grievous lack of final publications of the excavations—a regrettable limitation on the ability to fully integrate vital and critical results into the archaeological reconstruction of ancient Jerusalem. Excavations of the City of David are conducted under the auspices

of the Israel Antiquities Authority. The Authority has now partnered with the Center for the Study of Ancient Jerusalem and its publication arm, the Ancient Jerusalem Publication Series, for the publication of reports that are written and designed for the scholar as well as for the general reader. Excavations in the City of David (APJ 1), is the first volume in this series.

Since the early 4th century, Christian pilgrims and visitors to Judea and Galilee have worshipped at and been inspired by monumental churches erected at sites traditionally connected with the life

and ministry of Jesus of Nazareth. This book examines the history and archaeology of early Christian holy sites and traditions connected with specific places in order to understand them as interpretations of Jesus and to explore them as instantiations of memories of him. Ryan's overarching aim is to construe these places as instantiations of what historian Pierre Nora has called "lieux de mémoires," sites where memory crystallizes and, where possible, to track the course and development of the traditions underlying them from their genesis in the Gospel narratives to their

eventual solidification in the form of pilgrimage sites. So doing will bring rarely considered evidence to the study of early Christian memory, which in turn helps to illuminate the person of Jesus himself in both history and reception.

and denominations; patristic scholarship; and the bible; to the church calendar and its organization; popes; archbishops; other church leaders; saints; and mystics. In this new edition, great efforts have been made to increase and strengthen coverage of non-Anglican denominations (for example non-Western European Christianity), as well as broadening the focus on Christianity and the history of churches in areas beyond Western Europe. In particular, there have been extensive additions with regards to the Christian Church in Asia, Africa, Latin America, North America, and

Significant updates have also been included on topics such as liturgy, Canon Law, recent international developments, non-Anglican missionary activity, and the increasingly important area of moral and pastoral theology, among many others. This book offers new insights into the Memorial of Moses on Mount Nebo, one of the most renowned coenobitic monasteries in the Byzantine period in Arabia. Between 2012 and 2014, the Studium Biblicum Franciscanum

carried out new archaeological investigations in the southern wing of the monastery and in the church. The excavation in the central nave unearthed an empty tomb adorned with alabaster marble, placed on the highest point of the mountain. Starting from the archaeological data, the author critically reflects on the architectural phases of the basilica, how the monastery was run and its daily life. Special attention is also given to pilgrimages to the monastic shrines beyond the River Jordan and their progressive abandonment.

The rich and diverse architectural traditions of the Eastern Mediterranean and adjacent regions are the subject of this book. Representing the visual residues of a "forgotten"

Middle Ages, the social and cultural developments of the Byzantine Empire, the Caucasus, the Balkans, Russia, and the Middle East parallel the more familiar architecture of Western Europe. The book offers an expansive view of the architectural developments of the Byzantine Empire and areas under its cultural influence, as well as the intellectual currents that lie behind their creation. The book alternates chapters that address chronological or regionally-based developments with thematic studies that focus on the larger cultural concerns, as they are expressed in architectural form.
