Campaigns on the Cutting Edge, 2nd Edition

Helping students make sense of how and why campaigns are changing, this thoroughly updated second edition focuses on evaluating current trends and assesses how campaigns are making cutting-edge changes—on the presidential, congressional and, gubernatorial levels.

Developed in the classroom by two of the most prominent researchers in the field, Feenstra and Taylor's

International Economics is a modern textbook for a modern

audience. Most international economics textbooks emphasize theory and the economies of advanced countries. Feenstra and Taylor's text anchors theoretical coverage to empirical evidence throughout, while reflecting the realities of the global economy by covering emerging markets and developing countries (India, China, Southeast Asia). The new edition has been thoroughly updated, including the latest on the Eurozone crisis.

Believing deeply that the gospel touched every aspect of a person's life, Peter Cartwright was a man who held fast to his principles, resulting in a life of itinerant preaching and thirty years of political quarrels with Abraham Lincoln. Peter Cartwright, Legendary Frontier Preacher is the first full-length biography of this most famous of the early nineteenth-century Methodist circuit-riding preachers. Robert Bray tells the full story of the long relationship between Cartwright and Lincoln, including their political campaigns against each other, their social antagonisms, and their radical disagreements on the Christian religion, as well as their shared views on slavery and the central fact of their being "self-made." In addition, the biography examines in close detail Cartwright's instrumental role in Methodism's bitter "divorce" of 1844, in which the southern conferences seceded in a remarkable prefiguration of the United States a decade later. Finally, Peter Cartwright attempts to place the man in his appropriate national context: as a potent "man of words" on the frontier, a self-authorizing "legend in his own time," and, surprisingly, an enduring western literary figure.

This fully updated and expanded new edition continues to provide the most readable, concise, and easy-to-follow introduction to thermal physics. While maintaining the style of the original work, the book now covers statistical mechanics and incorporates worked examples systematically throughout the text. It also includes more problems and essential updates, such as discussions on superconductivity, magnetism, Bose-Einstein condensation, and climate change. Anyone needing to acquire an intuitive understanding of thermodynamics from first principles will find this third edition indispensable. Andrew Rex is professor of

physics at the University of Puget Sound in Tacoma, Washington. He is author of several textbooks and the popular science book, **Commonly Asked Questions in Physics**.

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

Here is the new, completely updated and expanded edition of the indispensable handbook used throughout the hospitality industry since *The Laws of Innkeepers* first appeared in 1972. Containing all the legal information essential to the successful operation of modern hotels, motels, inns, bed-and-breakfasts, clubs, restaurants, and resorts, the book has been extensively revised by John E. H. Sherry to accommodate the far-reaching changes that have occurred since the publication of the revised edition in 1981. Sherry, a practicing lawyer and professor of hotel administration, carries over from the highly praised earlier editions detailed information on the rights and responsibilities of host and guest alike. He cites actual cases—ranging from the amusing and the bizarre to the tragic—as examples, and spells out in precise and readily understandable terms exactly what state and federal law says. Broadening the scope of the book to keep up with recent legal developments, the author includes many new case decisions and summaries from various jurisdictions. Three chapters devoted to employment law, environmental law and land use, and catastrophic risk liability are among the highlights of the new material. These new sections present recent rulings and case law on such timely topics as age, disability, and AIDS discrimination, as well as sexual harassment; government regulation of toxic and hazardous substances and hotel and resort development; and acts of God and the Public Enemy and terrorism.

- One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University “ Extraordinary . . . an act of courage and self-invention. ” —The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA ’ S FAVORITE BOOKS OF THE YEAR • BILL GATES ’ S HOLIDAY READING LIST • FINALIST: National Book Critics Circle ’ s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara ’ s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she ’ d traveled too far, if there was still a way home. “ Beautiful and propulsive . . .
