A revealing "personality profile" self-test and Littauer's insightful advice help readers better understand themselves and others. A best-seller.

The rest of your life lies ahead of you. Do you want to spend it fighting your body and worrying about things you can't change? Or do you want to live your life to its fullest by combining age, experience, and creativity to develop a new vision for your body and self? Women in midlife face many changes, such as children growing up, returning to the workforce, or retiring from it. Then there are the physical changes: crow's-feet, saggy arms, an expanding waistline. The transformations within us and around us can leave us feeling anxious, ineffective, and out of control, especially in a culture that defines midlife as the beginning of a decline. It's easy to look at our lives and ourselves and wish we could turn back the clock, but it doesn't have to be that way. Midlife is a time of opportunity to renew, grow strong, set new goals, and redefine who you are. Change Your Mind, Change Your Body: Feeling Good About Your Body and Self After 40 gives you the tools you need to utilize your wisdom and experiences to shape a new vision of who you are and what you want your life to look like -- right now. Learn how to: • Cope with the physical and mental changes that midlife brings • Revamp ideas of what is sexy and desirable • Turn fears of aging into tools for positive growth • Develop a positive, realistic body image • Embrace who you are and who you will become • Set weight and exercise goals you can really achieve • Help our daughters create a positive self-image You have the power to renegotiate your relationship with your body, yourself, and the world around you, and Change Your Mind, Change Your Body will help you discover and use it.

Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis.Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations.This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online.Table of Contents: Preface / Sentiment Analysis: A Fascinating Problem / The Problem of Sentiment Analysis / Document Sentiment Classification / Sentence Subjectivity and Sentiment Classification / Aspect-Based Sentiment Analysis / Sentiment Lexicon Generation / Opinion Summarization / Analysis of Comparative Opinions / Opinion Search and Retrieval / Opinion Spam Detection / Quality of Reviews / Concluding Remarks / Bibliography / Author Biography

Jakarta based Andreas Harsono is one of the most knowledgeable, experienced, high-profile and courageous of reporters and commentators on contemporary Indonesian society. Race, Islam and Power: Ethnic and Religious Violence in Post-Suharto Indonesia is the result of Harsono's fifteen year project to document how, in post-Suharto Indonesia, race and religion have come to be increasingly prevalent within the nation's politics. From its westernmost island of Sabang to its easternmost city of Merauke in West Papua, from Miangas Island in the north, near the Philippines border, to Ndana Island, close to the coast of Australia, Harsono reveals the particular cultural identities and localised political dynamics of this internally complex and riven nation. This informed personal travelogue is essential reading for Indonesia watchers and anyone seeking a better understanding of contemporary Indonesia. A passionate seeker of human rights protections, civil liberties, democracy, media freedom, multiculturalism and environmental protection, Harsono reminds us that Indonesians 'still have not found the light at the end of the tunnel'.

One of The Globe & Mail's Top 10 Business books of the Year! Rethink Everything You Know About Leadership Strengths "A must-read for anyone wanting to positively stand out in an organization or for leaders wanting to raise the overall performance of the organization." -- Cindy Brinkley, Vice President, Global Human Resources, General Motors "Zenger Folkman's findings related to companion behaviors is exciting. It enhances what's been presented in prior books and makes extraordinary leadership seem like an achievable goal. I would recommend this book to anyone committed to the journey." -- Pam Mabry, Director, Human Resources, The Boeing Company "The authors take the groundbreaking concept of driving leadership effectiveness by building our strengths to a whole new level of practical implementation, providing us with a brilliantly clear road map. I have found this body of work to be absolutely invaluable . . . I cannot imagine a person in a leadership role today who would not find value from reading this book cover to cover." -- Loren M. Starr, Senior Managing Director and Chief Financial Officer, Invesco Ltd. How to Be Exceptional is a milestone in the emerging business case for evidence-based management. Building on two decades of earlier research, the authors brilliantly lay out a simple, concrete, scientifically validated model for achieving consistently superior business results through leadership. . . . Its magic is its simplicity, pragmatism, and focus." -- Eric Severson, Senior Vice President, Talent, Gap Inc. "How to Be Exceptional is the best book on professional development I have read in decades. It reinforces the emerging wisdom that the path to greatness is really about building profound strengths, rather than through relentlessly focusing on one's weaknesses. This is a great road map for any leader seeking to optimize their growth and impact." -- Michael A. Peel, Yale University, Vice President, Human Resources and Administration

Fooled by Randomness is a standalone book in Nassim Nicholas Taleb ' s landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don ' t understand. The other books in the series are The Black Swan, Antifragile, Skin in the Game, and The Bed of Procrustes. Fooled by Randomness is the word-of-mouth sensation that will change the way you think about business and the world. Nassim Nicholas Taleb – veteran trader, renowned risk expert, polymathic scholar, erudite raconteur, and New York Times bestselling author of The Black Swan – has written a modern classic that turns on its head what we believe about luck and skill. This book is about luck – or more precisely, about how we perceive and deal with luck in life and business. Set against the backdrop of the most conspicuous forum in which luck is mistaken for skill – the world of trading – Fooled by Randomness provides captivating insight into one of the least understood factors in all our lives. Writing in an entertaining narrative style, the author tackles major intellectual issues related to the underestimation of the influence of happenstance on our lives. The book is populated with an array of characters, some of whom have grasped, in their own way, the significance of chance: the baseball legend Yogi Berra; the philosopher of knowledge Karl Popper; the ancient world ' s wisest man, Solon; the modern financier George Soros; and the Greek voyager Odysseus. We also meet the fictional Nero, who seems to understand the role of randomness in his professional life but falls victim to his own superstitious foolishness. However, the most recognizable character of all remains unnamed – the lucky fool who happens to be in the right place at the right time – he embodies the " survival of the least fit. " Such individuals attract devoted followers who believe in their guru ' s insights and methods. But no one can replicate what is obtained by chance. Are we capable of distinguishing the fortunate charlatan from the genuine visionary? Must we always try to uncover nonexistent messages in random events? It may be impossible to guard ourselves against the vagaries of the goddess Fortuna, but after reading Fooled by Randomness we can be a little better prepared. Named by Fortune One of the Smartest Books of All Time A Financial Times Best Business Book of the Year

Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren ' t taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald ' s, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven ' t changed in more than three hundred years. In Learn to Earn, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. Nassim Nicholas Taleb's landmark Incerto series is an investigation of luck, uncertainty, probability, opacity, human error, risk, disorder, and decision-making in a world we don't understand, in nonoverlapping and standalone books. All four volumes—Antifragile, The Black Swan, Fooled by Randomness, and the expanded edition of The Bed of Procrustes, updated with more than 50 percent new material—are now together in one ebook bundle. ANTIFRAGILE "Startling . . . richly crammed with insights, stories, fine phrases and intriguing asides."—The Wall Street Journal Just as human bones get stronger when subjected to stress and tension, many things in life benefit from disorder, volatility, and turmoil. What Taleb has identified and calls "antifragile" is that category of things that not only gain from chaos but need it in order to survive and flourish. The resilient resists shocks and stays the same; the antifragile gets better and better. What is crucial is that the antifragile loves errors, as it incurs small harm and large benefits from them. Spanning politics, urban planning, war, personal finance, economic systems, and medicine in an interdisciplinary and erudite style, Antifragile is a blueprint for living in a Black Swan world. THE BLACK SWAN "[A book] that altered modern thinking."—The Times (London) A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random and more predictable. The astonishing success of Google was a black swan; so was 9/11. In this groundbreaking and prophetic book, Taleb shows that black swan events underlie almost everything about our world, from the rise of religions to events in our own personal lives, and yet we—especially the experts—are blind to them. FOOLED BY RANDOMNESS "[Fooled by Randomness] is to conventional Wall Street wisdom approximately what Martin Luther's ninety-five theses were to the Catholic Church."—Malcolm Gladwell, The New Yorker Are we capable of distinguishing the fortunate charlatan from the genuine visionary? Must we always try to uncover nonexistent messages in random events? Fooled by Randomness is about luck: more precisely, about how we perceive luck in our personal and professional experiences. Set against the backdrop of the most conspicuous forum in which luck is mistaken for skill—the markets—Fooled by Randomness is an irreverent, eye-opening, and endlessly entertaining exploration of one of the least understood forces in our lives. THE BED OF PROCRUSTES "Taleb's crystalline nuggets of thought stand alone like esoteric poems."—Financial Times This collection of aphorisms and meditations expresses Taleb's major ideas in ways you least expect. The Bed of Procrustes takes its title from Greek mythology: the story of a man who made his visitors fit his bed to perfection by either stretching them or cutting their limbs. With a rare combination of pointed wit and potent wisdom, Taleb plows through human illusions, contrasting the classical views of courage, elegance, and erudition against the modern diseases of nerdiness, philistinism, and phoniness.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

Leprosy is a scary disease. Most people have a serious aversion to losing their sense of touch and growing numb and unable to feel another's touch, or even sensing hot and cold temperatures. They have an aversion to losing fingers, toes, and noses. They have an aversion to losing their eyesight, their ability to walk or to pick up a penny, and even their ability to have a sexual relationship. Hopefully, you don't have the physical disease of Leprosy. Did you know, though, that you might have "Spiritual Leprosy?" Your lifestyle may be creating numbness to the activities that are unacceptable to family, to friends, and to God. You are living a life that has become self-serving, addictive, and destructive to the extent that those in your life want nothing more to do with you. You're becoming immobile and non-functional in life because of a slavery to sin that has overtaken you. You are dying and may not even realize it yet. At one point in our lives, we are all leprous. ICOMM: Interpersonal Concepts and Competencies, provides an integrated approach to the study of interpersonal communication. This accessibly written but authoritative text emphasizes the development of communication competencies, including skills, understanding of the theory and research that contextualizes the skills to make them relevant to learning, and the motivation to put the skills into practice. While incorporating many traditional intrapersonal and interpersonal topics found in current texts, the book is distinctive in that it offers a skills-based approach that is grounded in solid theory and research. Students will find that the text is written in a personal and friendly manner, stressing concepts, skills, and applications that should be an important part of their daily lives.

Newtonian mechanics : dynamics of a point mass (1001-1108) - Dynamics of a system of point masses (1109-1144) - Dynamics of rigid bodies (1145-1223) - Dynamics of deformable bodies (1224-1272) - Analytical mechanics : Lagrange's equations (2001-2027) - Small oscillations (2028-2067) - Hamilton's canonical equations (2068-2084) - Special relativity (3001-3054).

This textbook covers all the standard introductory topics in classical mechanics, including Newton's laws, oscillations, energy, momentum, angular momentum, planetary motion, and special relativity. It also explores more advanced topics, such as normal modes, the Lagrangian method, gyroscopic motion, fictitious forces, 4-vectors, and general relativity. It contains more than 250 problems with detailed solutions so students can easily check their understanding of the topic. There are also over 350 unworked exercises which are ideal for homework assignments. Password protected solutions are available to instructors at www.cambridge.org/9780521876223. The vast number of problems alone makes it an ideal supplementary text for all levels of undergraduate physics courses in classical mechanics. Remarks are scattered throughout the text, discussing issues that are often glossed over in other textbooks, and it is thoroughly illustrated with more than 600 figures to help demonstrate key concepts.

The first version of this Source Book argued the case for a "National Integrity System", an holistic approach to transparency and accountability and embracing a range of accountability "pillars", democratic, judicial, media and civil society. The expression has since passed into common usage in development circles, and the argument for an holistic approach to anti-corruption efforts has similarly achieved a widespread consensus. The fight against corruption is not wholly a moral one, in the sense that it is a struggle against the intrinsic "evil" of corruption. Certainly there is a moral element - and one which cuts across al major religions and societies throughout the world. But the compelling reason for the struggle is the suffering and deprivation corruption brings to whole societies, and to the world's most poor. It is concern for the latter, rather than a distaste for the corrupt and their deeds, that rightly drives the global movement against corruption.
