This is the long-awaited update on the bestselling book that offers a practical, accessible reference manual for faculty in any discipline. This new edition contains up-to-date information on technology as well as expanding on the ideas and strategies presented in the first edition. It includes more than sixty-one chapters designed to improve the teaching of beginning, mid-career, or senior faculty members. The topics cover both traditional tasks of teaching as well as broader concerns, such as diversity and inclusion in the classroom and technology in educational settings. The book reports on research into teaching conversation strategies as a means of developing communicative competence. The introductory chapter defines key terms and positions this book's aims and arguments. The next four chapters each describe a different study examining the teaching of conversation strategies in a different way: a learner corpus investigation of strategies used by both learners and users of English as a lingua franca; a materials evaluation study based on the responses of teachers in a variety of contexts; an experimental study in an ESL context, comparing the effects of teaching conversation strategies to a control group receiving no instruction; and finally a qualitative diary and interview study in an EFL context. The author concludes by discussing the implications of these studies for teachers and researchers.

Tailor-made for the revised First Certificate in English examination, this course offers graded practice, advice and guidance, equipping students with the skills and language ability needed to tackle each task type with confidence.

For teachers of English to young learners. It offers you discussion, discovery activities, and real-life examples from classrooms around the world.

Made up of eight volumes, the Encyclopedia of Language and Education is the first attempt at providing an overview of the subject.

"The growth in English language teaching worldwide and the related increase in teacher training programmes of all kinds highlight the need for greater accountability in the assessment of teachers. The need for formal summative assessment has taken on greater importance in training programmes and requires procedures which do not always sit easily with the development process, while transparency of assessment procedures is also increasingly demanded by the candidates themselves. This edited volume discusses key issues in assessing language teachers' professional skills and knowledge and provides case study illustrations of how teacher knowledge and teaching skills are assessed at pre-service and in-service levels within the framework of the Cambridge English Teaching Qualifications. The volume provides: - discussion of ways in which the changing nature of English language teaching has impacted on teacher education and assessment - examples of specific assessment procedures for both teaching knowledge and practical classroom skills - accounts of the ways in which the Cambridge English Teaching Qualifications have been integrated into and adapted for local contexts. This is the first volume of its kind wholly dedicated to language teacher assessment and as such will be of interest to language teachers and teacher educators as well as to researchers and postgraduate students"--

Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent. This book relates the practice of English language teaching directly to the African context. As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning, it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa, both at primary and secondary level. It is intended to be a practical guide, so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa. If there is a bias in this book, it is towards the needs of teachers working in low-resource, isolated contexts in Africa, as these teachers are so often neglected by literature on teaching methodology.

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Crole, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

One man’s fortune holds the key to a nation’s fate in this sensational debut novel set in 18th-century Sweden. The Stockholm Octavo by Karen Engelmann transports readers to a colorful Scandinavian world of intrigue and magic in a dazzling golden age of high art, music, and opulent fashion. A masterwork of historical fiction in the vein of Patrick Suskind’s classic novel, Perfume, Karen Engelmann’s The Stockholm Octavo is mysterious and romantic—as magical and enthralling as The Night Circus by Erin Morgenstern—and features a brilliant and unforgettable cast of extraordinary characters.

This is an updated version of ‘the teacher training course for teachers and trainee teachers preparing for the Cambridge ESOL Teaching Knowledge Test (TKT) Modules 1, 2 and 3 or other initial teacher training qualifications.

This practical handbook for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique, as language and content learning happen simultaneously. The efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged hood on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields insights into learners’ abilities, but more importantly, how these insights are used to promote learning. The contributors to the volume together build the understanding of classroom-based assessment as cyclic, of teaching, learning, and assessment as inter-related, and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and researchers, enable reflection of classroom assessment practices, and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume, in turn, will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.
