Belgium dat is: Nederlandt, ofte Beschrijvinge derselviger provincien ende steden

This open access book examines more than two centuries of societal development using novel historical and statistical approaches. It applies the well-being monitor developed by Statistics Netherlands that has been endorsed by a significant part of the international, statistical community. It features The Netherlands as a case study, which is an especially interesting example; although it was one of the world's richest countries around 1850, extreme poverty and inequality were significant problems of well-being at the time. Monitors of 1850, 1910, 1970 and 2015 depict the changes in three dimensions of well-being: the quality of life 'here and now', 'later' and 'elsewhere'. The analysis of two centuries shows the solutions to the extreme poverty problem and the appearance of new sustainability problems, especially in domestic and foreign ecological systems. The study also reveals the importance of natural capital: soil, air, water and subsoil resources, showing their relation with the social structure of the 'here and now'. Treatment and trade of natural resources also impacted on the quality of life 'later' and 'elsewhere.' Further, the book illustrates the role of natural capital by dividing the capital into three types of raw materials and concomitant material flows: bio-raw materials, mineral and fossil subsoil resources. Additionally, the analysis of the institutional context identifies the key roles of social groups in well-being development. The book ends with an assessment of the solutions and barriers offered by the historical anchoring of the well-being and sustainability issues. This unique analysis of well-being and sustainability and its institutional analysis appeals to historians, statisticians and policy makers.

A Belgian detective stalks a Russian oligarch with ties to Putin in the award-winning first installment of the Amsterdam trilogy. Walter Eekhaut (whose name rhymes with “stakeout”) is a rebellious veteran of the Belgian police force. He’s just been sent to Amsterdam to help the Dutch security service investigate a Russian oligarch with connections to Putin. Some of the Russian’s business is certainly legitimate, but some may well not be. Working with Chief Superintendent Alexandra Dewaal and her team, Eekhaut is about to discover the criminal underworld of a city famous for its permissiveness.

Meanwhile another case draws Eekhaut’s attention: the murder of a young leftist dissident, alleged to have stolen a list of secret donors from an ultra-right-wing political party. The hunt for the killer leads to a knot of black money interests and illegal dealings that pit the Russian mob, Dutch politicians, and shady business leaders against the police. Winner of the Hercule Poirot Award, Absinthe is the first installment in Guido Eekhaut’s Amsterdam trilogy, a modern noir thriller of “tense, up-to-date euro-political intrigue” (Jim Houghton, author of The Hooligan’s Game).

Absinthe

During the last two decades, Dutch citizens have become increasingly worried about a wide variety of public safety problems. Consequently, a new policy domain regarding local public safety has emerged and established itself in the Netherlands. Public expenditure on local safety has grown enormously and traditional problems such as disturbances of local order and petty crime, were soon complemented by newer concerns including drug-related nuisance, domestic violence and organized crime. As Dutch mayors are responsible for providing order in local society, all eyes generally turn

to them when a new problem arises. The national government has granted them various powers to tackle new threats to public safety. However, not all sections of Dutch society are happy with these developments, and a public debate was triggered in which the Dutch mayors were accused of behaving more like local sheriffs, and less in accordance with their traditional role of shepherds of local communities. This research combines national and local studies on the position and role of Dutch mayors in local safety governance between the years 1990 and 2010, and concludes that an ever growing trend of securitizing local issues has fostered an expansion of the mayor's formal position, as well as new actions and roles in daily public safety governance. *** Librarians: ebook available [Subject: Dutch Studies, Public Governance, Criminology]

The American Dream in Crisis

A New York Times bestseller and “a passionate, urgent” (The New Yorker) examination of the growing inequality gap from the bestselling author of *Bowling Alone*: why fewer Americans today have the opportunity for upward mobility. Central to the very idea of America is the principle that we are a nation of opportunity. But over the last quarter century we have seen a disturbing “opportunity gap” emerge. We Americans have always believed that those who have talent and try hard will succeed, but this central tenet of the American Dream seems no longer true or at the least, much less true than it was. In *Our Kids*, Robert Putnam offers a personal and authoritative look at this new American crisis, beginning with the example of his high school class of 1959 in Port Clinton, Ohio. The vast majority of those students went on to lives better than those of their parents. But their children and grandchildren have faced diminishing prospects. Putnam tells the tale of lessening opportunity through poignant life stories of rich, middle class, and poor kids from cities and suburbs across the country, brilliantly blended with the latest social-science research. “A truly masterful volume” (Financial Times), *Our Kids* provides a disturbing account of the American dream that is “thoughtful and persuasive” (The Economist). *Our Kids* offers a rare combination of individual testimony and rigorous evidence: “No one can finish this book and feel complacent about equal opportunity” (The New York Times Book Review).

In this survey, Arthur der Weduwen and Andrew Pettegree have brought together the first 6,000 advertisements placed in Dutch and Flemish newspapers between 1620 and 1675. Provided here in an English translation, and accompanied by seven indices, this work provides for the first time a complete overview of the development of newspaper advertising, highlighting its impact on the Dutch book trade, economy and society.

NOW A HIT NETFLIX ORIGINAL SERIES THE RIVETING SEQUEL TO THE NEW YORK TIMES BESTSELLING YOU “Kepnes hits the mark, cuts deep, and twists the knife.” —Entertainment Weekly “Delicious and insane...The plot may be twisty and scintillating, but it’s Kepnes’s wit and style that keep you coming back.” —Lena Dunham “Hypnotic and scary.” —Stephen King “Obsessed.” —Jessica Knoll, New York Times bestselling author In the compulsively readable sequel to her widely acclaimed debut novel, You, Caroline Kepnes weaves a tale that Booklist calls “the love child of Holden Caulfield and Patrick Bateman.” In Hidden Bodies, the basis for season two of the hit Netflix series, You, Joe Goldberg returns. Joe is no stranger to hiding bodies. In the past ten years, this thirty-something has buried four of them, collateral damage in his quest for love. Now he’s heading west to Los Angeles, the city of second chances, determined to put his past behind him. In Hollywood, Joe blends in effortlessly with the other young upstarts. He eats guac, works in a bookstore, and flirts with a journalist neighbor. But while others seem fixated on their own reflections, Joe can’t stop looking over his shoulder. The problem with hidden bodies is that they don’t always stay that way. They reemerge, like dark thoughts, multiplying and threatening to destroy what Joe wants most: true love. And when he finds it in a darkened room in Soho House, he’s more desperate than ever to keep his secrets buried. He doesn’t want to hurt his new girlfriend—he wants to be with her forever. But if she ever finds out what he’s done, he may not have a choice...

The fear of crime is generally recognized as a social problem around the world. Yet, research has so far lacked to establish a dependable picture of this phenomenon. The present study examines the highly complex allocation of interacting perceptions, for which it provides suitable explanations through a social psychological approach. It aims to discover at what level of psychological distance citizens primarily experience 'the fear of crime' and how they construct it.00The author applies various qualitative and quantitative techniques to conduct this research. For instance, historical discourse analysis, free associative interviewing, Structural Equation Modelling, and photo sorting via Q-methodology. The results show that citizens are determined to keep crime at a safe distance. Even to those who deem that crime is a significant factor in their immediate surroundings, 'the fear of crime' remains a distant and abstract social problem.
