X-Ray Equipment Maintenance and Repairs Workbook for Radiographers and Radiological Technologists

Maintain and Repair Your Notebook, Palmtop, Or Pen Computer

The X-ray equipment maintenance and repairs workbook is intended to help and guide staff working with, and responsible for, radiographic equipment and installations in remote institutions where the necessary technical support is not available, to perform routine

maintenance and minor repairs of equipment to avoid break downs. The book can be used for self study and as a checklist for routine maintenance procedures.

In 2005, The Woman at the Washington Zoo was published to major critical acclaim. The late Marjorie Williams possessed ''a special voice, one capable not just of canny political observations but of tenderness and bracing intimacy,'' observed the New York Times Book Review.

Now, in a collection of profiles with the richness of short fiction, Williams limns the personalities that dominated politics and the media during the final years of the twentieth century. In these pages, Clark Clifford grieves ''in his laborious baritone'' a bank

scandal's blow to his re-pu-taaaaaay-shun. Lee Atwater likens himself to Ulysses and pleads, ''tah me to the mast!'' Patricia Duff sheds ''precipitous tears'' over her divorce from Ronald Perelman, resembling afterwards ''a garden refreshed by spring rain.'' Reputation

illuminates our recent past through expertly drawn portraits of powerful - and messily human - figures.

This manual describes version 2.x OpenBoot firmware that is part of the boot PROM in Sun systems. Written for users who want to use the OpenBoot firmware to configure and debug their systems, this manual contains information on how to use the OpenBoot firmware to perform

tasks such as booting the operating system, running diagnostics, modifying system start-up configuration parameters, loading and executing programs, and troubleshooting. It also describes the commands of the OpenBoot Forth interpreter. Topics include an overview of the

user interface: booting and testing your OpenBoot firmware system; setting NVRAM configuration parameters; loading and executing programs from various sources; and debugging with the disassembler, the Forth source-level debugger, and setting breakpoints. Appendices include

setting up a TIP connection using serial ports, building a bootable floppy disk, a list of unsupported commands from earlier OpenBoot systems with workarounds, troubleshooting information, and a Forth word reference.
