"TACKY is about the power of pop culture -- like any art, low or high -- to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fifteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we've learned to hate to love -- frosted tips and glosses, Sex and the City, The Cheesecake Factory -- into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact and its entwinement with Rax's millennial coming-of-age: an essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father, who loved the show; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures a personal and generational experience with clarity, humor, and heartfelt honesty"--
'A beautiful read / a perfect primer for an explosive lesbian affair / an essential truth' Lena Dunham 'I have meditated repeatedly on what it was about Finn that had me so dismantled.' A young woman moves from the countryside to the city.Inexplicably, inexorably and immediately, she falls in love with another woman for the first time in her life.Finn is nineteen years older than her, wears men's clothes, has a cocky smirk of a smile - and a long-term girlfriend.With precision, wit and tenderness, Women charts the frenzy and the fall out of love.

Former publisher of Griffith Review Professor Julianne Schultz challenges our notions of what it means to be Australian and asks timely and urgent questions about our national identity. 'Schultz reflects on how we might shake off our fears, our mediocrity and our moral torpor, and rediscover the country we once promised to be' KERRY O'BRIEN 'A penetrating analysis' MELISSA LUCASHENKO 'A triumph of art, politics, literature, history, and the deepest scholarship...A towering achievement.' JENNY HOCKING What is the 'idea of Australia'? What defines the soul of our nation? Are we an egalitarian, generous, outward-looking country? Or is Australia a place that has retreated into silence and denial about the past and become selfish, greedy and insular? A lifetime of watching Australia as a journalist, editor, academic and writer has given Julianne Schultz a unique platform from which to ask and answer these critical questions. The global pandemic gave her time to study the X-ray of our country and the opportunity for perspective and analysis. Schultz came to realise that the idea of Australia is a contest between those who are imaginative, hopeful, altruistic and ambitious, and those who are defensive and inward-looking. She became convinced we need to acknowledge and better understand our past to make sense of our present and build a positive and inclusive future. She suggests what Australia could be: smart, compassionate, engaged, fair and informed. This important, searing and compelling book explains us to ourselves and suggests ways Australia can realise her true potential. Urgent, inspiring and optimistic. The idea of Australia presents the vision we need to fully appreciate our great strengths and crucial challenges. 'Timely, bracing, and ultimately hopeful' YASSMIN ABDEL-MAGIED 'Disruptive, bold and brilliant' CLARE WRIGHT 'A brilliant successor to Donald Horne's 'The Lucky Country' TOM GRIFITHS 'A contemporary classic in the making' CHRISTINE WALLACE 'Utterly compelling, engrossing and extraordinary' ANNE TIERNAN 'A wonderfully enthralling read' ROSLYN ATKINSON 'Subtle, powerful and compelling' GLYN DAVIS 'Essential reading' FRANK BONGIORNO 'A stunning book' ANN CURTHOYS 'A marvellous read' TONY KOCH 'Beautifully written' MATT FOLEY

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs: Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

This popular guide is a must for 2010, when people around the world will be encouraged to discover their place in the universe through the observation of the day and night skies.

Adventure, Risk & Triumph on the Path Less Traveled

2010 Australian Sky Guide

Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and mountain bike racer, Rusch was a normal kid from Chicago who abandoned a predictable life for one of adventure. In her new book Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete-- climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for broke, she shifted her focus to endurance mountain bike racing and rode straight into the record books at a moment when most athletes walk away. Rusch to Glory is more than an epic story of adventure; it is a testament to the rewards of hard work, determination, and resilience on the long road to personal and professional triumph.

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

A journalistic look at the shooting at Marjory Stoneman Douglas High School in Parkland and the fight for gun control--as told by the student reporters for the school's newspaper and TV station. This timely and media-driven approach to the Parkland shooting, as reported by teens in the Journalism and broadcasting programs and in the Marjory Stoneman Douglas newspaper, is an inside look at that tragic day and the events that followed that only they could tell. It showcases how the teens have become media savvy and the skills they have learned and honed--harnessing social media, speaking to the press, and writing effective op-eds. Students will also share specific insight into what it has been like being approached by the press and how that has informed the way they interview their own subjects. "One thing is clear: The Parkland students are smart, media savvy, and here to fight for common sense gun laws." --Hello Giggles

What's the most thing about wanting a sexy NFL football player? Everyone else wants him, too. After catching my boyfriend getting deep-throated by a cage girl, I've learned my lesson -- never date a professional athlete. Never. Besides, I have more important things to worry about, like not blowing my shot to make it as a broadcast reporter. I won't let anything get in my way, not even the new "it boy" of the NFL and my hot-as-hell neighbor. What's the worst thing about getting death glares from his new neighbor? It doesn't make him want her any less. I've worked my ass off to make it to the pros. The last thing I need is the complication of a relationship, especially since my last one was a total train wreck. But I can't stop thinking about the feisty girl next door with the smart mouth. And I'd love nothing more than to show her what to do with that mouth. Friends with benefits might be the best idea he's ever had. Or the worst. KISSING MADELINE, the third book in The Dearest Series, can be read a standalone novel. This new adult romance is recommended for readers 18+ due to mature content.

Surf Like a Girl

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

Whether they're threading a barrel or shredding a swell, these amazing women are making enomous waves in the world of surfing. If you thought surfing was a male-dominated sport, think again. The thirty women surfers profiled in this thrilling collection can rip a wave with the best of them. Hailing from all over the world, each surfer is featured in spectacular photography and with their own inspirational words. There's American professional surfer Lindsay Steinriede on how her father's death has inspired her career; French board shaper Valerie Duprat on how she got her start 'sculpting foam'; Conchita Rossler, founder of Moana Retreat in Portugal, on connecting mind, body, and spirit; and Australian photographer Cait Miers on empowering women. You'll also meet surfers who are over sixty, who surf while pregnant, who captain boats, teach yoga, and make movies. Breathtaking photography captures these women from every angle, on and off the waves, in some of the world's most visually stunning locations. The perfect gift for surfing enthusiasts, this unique compilation of stunning pictures and hard-won wisdom proves that the thrill of catching a wave, riding it, and kicking out belongs to everyone.

Agenda 2021-2030 Exposed

Vaccine Chips & Passports, The Great Reset & The New Normal: Unreported & Real News

Fiction. Women's Studies. Short Stories. Beginning with a story of an ex sex-worker drifting through a small rural town in the south, and ending with a young woman's wedding night, who learns from her new husband what it takes to kill a man, Nash writes across the complications of working class women, rendering their desires with visceral prose and psychologically dissecting the fundamental root that threads her work: craving and the conflicts within.

Imagine a crowded theatre. The lights have just gone down. An expectant silence blankets the audience as the chatter abruptly stops. The show is about to begin. Live performance is storytelling, expression, activism and hope. It is by nature ephemeral, yet its impact can be long-lasting, on audiences and those who work on stage and behind the scenes. Technology lets us record, amplify and broadcast, but it can't replace the possibility and connection that naturally occurs between performers and audiences. Deep in the National Library of Australia's stacks are collections that document those fleeting moments when people came together for a live performance. From a 1796 playbill (the earliest document printed in Australia), to original costume design artwork, to a backstage moment at the ballet captured in an elegant black and white photograph, this book features an array of material that will bring the thrill of live performance to life for the reader.
