Journalist Mark Manning's Midwestern hometown closes ranks against him when his nephew is suspected of murder For Mark Manning, running the local paper in his Wisconsin hometown is a refreshing change from his life as a hard-charging reporter for the Chicago Journal. Together with his partner, architect Neil Waite, he's settling into scenic, sleepy Dumont, whose inhabitants have welcomed them into their fold. Until Manning's nephew becomes the prime suspect in a murder case. Teenagers Thad Quatrain and Jason Thrush alternated the lead role in the community theatre's production of Teen Play. Now Jason lies dead in his bedroom, the victim of mushroom poisoning. Amid rumors that Thad threatened to kill Jason, the town begins to turn against him. As a sweltering summer draws to an end, a shocking revelation has tempers seething—and threatening to boil over. A novel about sexual identity, desire, and the lies we tell ourselves, *Boy Toy* explores the secret passions that war within the human heart. *Boy Toy* is the fifth book in Michael Craft's Mark Manning series, which begins with *Flight Dreams and Eye Contact*.

Research on children and childhood in ancient Greece is a field in its infancy. This book proposes a new interdisciplinary approach called Developmental Childhood Archaeology. In essence it is an archaeological study based on a collection of material relation to childhood in ancient Attica, dating back to 480-300 B.C. That is, various types of toys, iconographic evidence of children on vases and graves steles, primary written sources on children's lives, and the view on children in the Greek Classical period.

Surrealism and the Culture of Childhood

Public Relations Worktext

A wide-ranging look at surrealist and postsurrealist engagements with the culture and imagery of childhood We all have memories of the object-world of childhood. For many of us, playthings and images from those days continue to resonate. Rereading a swathe of modern and contemporary artistic production through the lens of its engagement with childhood, this book blends in-depth art historical analysis with sustained theoretical exploration of topics such as surrealist temporality, toys, play, nostalgia, memory, and 20th-century constructions of the child. The result is an entirely new approach to the surrealist tradition via its engagement with "childish things." Providing what the author describes as a "long history of surrealism," this book plots a trajectory from surrealism itself to the art of the 1980s and 1990s, through to the present day. It addresses a range of figures from Marcel Duchamp, Giorgio de Chirico, Max Ernst, Hans Bellmer, Joseph Cornell, and Helen Levitt, at one end of the spectrum, to Louise Bourgeois, Eduardo Paolozzi, Claes Oldenburg, Susan Hiller, Martin Sharp, Helen Chadwick, Mike Kelley, and Jeff Koons, at the other.

— *Public Relations Worktext*

This anthology examines *Love's Labours Lost* from a variety of perspectives and through a wide range of materials. Selections discuss the play in terms of historical context, dating, and sources; character analysis; comic elements and verbal conceits; evidence of authorship; performance analysis; and feminist interpretations. Alongside theater reviews, production photographs, and critical commentary, the volume also includes essays written by practicing theater artists who have worked on the play. An index by name, literary work, and concept rounds out this valuable resource.

"A bit like the great movie *Toy Story* and a bit like the wonderful Kate DiCamillo book *The Miraculous Journey of Edward Tulane*. This is a great family book." —*The Washington Post* on *Toys Go Out*, the companion to *Toy Dance Party* Here is the second book in the highly acclaimed *Toys* trilogy, which includes the companion books *Toys Go Out* and *Toys Come Home* and chronicles the unforgettable adventures of three brave and loving toys. Lumphy, Stingray, and Plastic are back! And this time the three extraordinary friends find that their little girl has left for winter vacation and taken a box of dominoes, a stegosaurus puzzle, and two Barbie dolls—but not them. Could she have forgotten them? As the girl starts to grow up, the three best friends must join together to brave a blizzard, save the toy mice from the vacuum, and make sure that they'll always have the little girl's love. (And they still have time to throw an all-out dance party with the washing machine!) "Poignant and compelling, this sequel sparkles." —*Kirkus Reviews*, Starred

Bringing together contributors from dance, theatre, visual studies and art history, *Perform, Repeat, Record* addresses the conundrum of how live art is positioned within history. Set apart from other art forms in that it may never be performed in precisely the same way twice, ephemeral artwork exists both at the time of its staging and long after in the memories of its spectators and their testimonies, as well as in material objects, visual media and text. These multiple occurrences and iterations offer new critical possibilities for thinking and writing the histories of performance. Among the artists, theorists and historians who contributed to this volume are Marina Abramovic, Guillermo Gómez-Peña, Rebecca Schneider, Boris Groys, Jane Blocker, Carolee Schneemann, Tehching Hsieh, Orlan, Tilda Swinton and Jean-Luc Nancy.

The first computer-generated animated feature film, *Toy Story* (1995) sustains a dynamic vitality that proved instantly appealing to audiences of all ages. Like the great Pop Artists, Pixar Studios affirmed the energy of modern commercial popular culture and, in doing so, created a distinctive alternative to the usual Disney formula. Tom Kemper traces the film's genesis, production history and reception to demonstrate how its postmodern mishmash of pop culture icons and references represented a fascinating departure from Disney's fine arts style and fairytale naturalism. By foregrounding the way in which *Toy Story* flipped the conventional relationship between films and their ancillary merchandising by taking consumer products as its very subject, Kemper provides an illuminating, revisionist exploration of this groundbreaking classic.

This is a cradle-to-grave biography of Mickey Walker, former welterweight (1922–1926) and middleweight champion (1926–1931) of the world, one of the greatest fighters in ring history. He fought at a time when boxing was a major sport with only eight championships, and he held two of them over a nine-year period. He fought at a time when each weight division was jammed with good fighters, and he fought them all from welterweight up to heavyweight, frequently being outweighed 20 to 30 pounds. Walker was also a great personality who loved life and lived it to the fullest. He was married seven times to four different women, and he cavorted with movie stars and mobsters. When his boxing career ended in 1935, Walker ran saloons in various locations and eventually became an artist of some standing. He died in 1981 at age 79.

Although the volume draws on specific First Nation experiences, it covers a wide range of topics of concern to Inuit, Metis, and other indigenous peoples.

Dance on its Own Terms: Histories and Methodologies anthologizes a wide range of subjects examined from dance-centered methodologies: modes of research that are emergent, based in relevant systems of movement analysis, use primary sources, and rely on critical, informed observation of movement. The anthology fills a gap in current scholarship by emphasizing dance history and core disciplinary knowledge rather than theories imported from disciplines outside dance. Individual chapters serve as case studies that are further organized into three categories of significant dance activity: performance and reconstruction, pedagogy and choreographic process, and notational and other written forms that analyze and document dance. The breadth of the content reflects the richness and vibrancy of the dance field; each deeply informed examination serves as a window opening onto the larger world of dance. Conceptually, each chapter also raises concerns and questions that point to broadly inclusive methodological applications. Engaging and insightful, *Dance on its Own Terms* represents a major contribution to research on dance.

In recent decades, dance has become a vehicle for querying assumptions about what it means to be embodied, in turn illuminating intersections among the political, the social, the aesthetic, and the phenomenological. The *Oxford Handbook of Dance and Politics* edited by internationally lauded scholars Rebekah Kowal, Gerald Siegmund, and the late Randy Martin presents a compendium of newly-commissioned chapters that address the interdisciplinary and global scope of dance theory – its political philosophy, social movements, and approaches to bodily difference such as disability, postcolonial, and critical race and queer studies. In six sections 30 of the most prestigious dance scholars in the US and Europe track the political economy of dance and analyze the political dimensions of choreography, of writing history, and of embodied phenomena in general. Employing years of intimate knowledge of dance and its cultural phenomenology, scholars urge readers to re-think dominant cultural codes, their usages, and the meaning they produce and theorize ways dance may help to re-signify and to re-negotiate established cultural practices and their inherent power relations. This handbook poses ever-present questions about dance politics—which aspects or effects of a dance can be considered political? What possibilities and understandings of politics are disclosed through dance? How does a particular dance articulate or undermine forces of authority? How might dance relate to emancipation or bondage of the body? Where and how can dance articulate social movements, represent or challenge political institutions, or offer insight into habits of labor and leisure? The handbook opens its critical terms in two directions. First, it offers an elaborated understanding of how dance achieves its politics. Second, it illustrates how notions of the political are themselves expanded when viewed from the perspective of dance, thus addressing both the relationship between the politics in dance and the politics of dance. Using the most sophisticated theoretical frameworks and engaging with the problematics that come from philosophy, social science, history, and the humanities, chapters explore the affinities, affiliations, concepts, and critiques that are inherent in the act of dance, and questions about matters political that dance makes legible.

In this work the author studies the role of toy characters in works ranging from older classics such as Pinocchio and Winnie the Pooh to modern texts such as *The Mouse* and his Child and the comic strip Calvin and Hobbes science fiction with robots and cyborgs.

Steve Beresford's polymathic activities have formed a prism for the UK improv scene since the 1970s. He is internationally known as a free improviser on piano, toy piano and electronics, composer for film and TV, and raconteur and Dadaist visionary. His resumé is filled with collaborations with hundreds of musicians and other artists, including such leading improvisers as Derek Bailey, Evan Parker, and John Cage. Performances of works by John Cage and Christian Marclay. In this book, Beresford is heard in his own words through first-hand interviews with the author. Beresford provides compelling insight into an extensive range of topics, displaying the broad cultural context in which music is embedded. The volume combines chronological and thematic chapters, with topics covering improvisation and collaboration between art, entertainment and popular culture; the audience for free improvisation; writing music for films; recording improvised music in the studio; and teaching improvisation. It places Beresford in the context of improvised and related musics – jazz, free jazz, free improvisation – in which there is growing interest. The linear narrative is broken up by 'interventions' or short pieces by collaborators.

Anne Green Gilbert's Brain-Compatible Dance Education, Second Edition, strikes the perfect balance between hard science and practicality, making it an ideal resource for dance educators working with dancers of all ages and abilities. Gilbert presents the latest brain research and its implications for dance educators and dancers. She makes the research findings accessible and easy to digest, always connecting the science to the teaching and learning that takes place in classrooms and studios.

What begins with an unlikely collection of unrelated phenomena—mechanical dolls, weather, atoms, lyric poetry—blossoms in the course of Toy Medium into a subtle and persuasive meditation on one of Western philosophy's biggest puzzles: the relation of mind and matter. What is the role of the imagination in defining material substance? In a dazzling study of the poetics of materialist philosophy and of the materialism of lyric poetry, Daniel Tiffany traces the historical conjunction of matter and metaphor through a remarkable range of topics: automata in classical antiquity and the eighteenth century; Kepler's treatise on snowflakes; animal magnetism; fireworks and cloud-chamber photographs; the origins of the microscope as a philosophical toy and its bearing on the figure of the virtuoso. At critical junctures in modern Western culture, Tiffany finds uncanny parallels between the metaphors of science and visions of material substance rooted in popular culture and lyric poetry. When Americans mamboed in the kitchen, waltzed in the living room, polkaed in the pavilion, and tangoed at the club; with glorious, full-color record cover art. In midcentury America, eager dancers mamboed in the kitchen, waltzed in the living room, Watusied at the nightclub, and polkaed in the pavilion, instructed (and inspired) by dance records. Glorious, full-color record covers encouraged them:

Let's Cha Cha Cha, Dance and Stay Young, Dancing in the Street!, Limbo Party, High Society Twist. In Designed for Dancing, vinyl record aficionados and collectors Janet Borgerson and Jonathan Schroeder examine dance records of the 1950s and 1960s as expressions of midcentury culture, identity, fantasy, and desire. Borgerson and Schroeder begin with the record covers—memorable and striking, but largely designed and created by now-forgotten photographers, scenographers, and illustrators—which were central to the way records were conceived, produced, and promoted. Dancing allowed people to sample aspirational lifestyles, whether at the Plaza or in a smoky Parisian café, and to affirm ancestral identities with Irish, Polish, or Greek folk dancing. Dance records featuring ethnic music of variable authenticity and appropriateness invited consumers to dance in the footsteps of the Other with “hot” Latin music, Afro-Caribbean rhythms, and Hawaiian hulas. Bought at a local supermarket, department store, or record shop, and listened to in the privacy of home, midcentury dance records offered instruction in how to dance, how to dress, how to date, and how to discover cool new music—lessons for harmonizing with the rest of postwar America.
