The work reviews issues concerning the protection of folklore through the intellectual property legal system, then explores two main issues in the protection of Chinese folklore. The first issue is the influence of Chinese traditional culture on the Chinese intellectual property legal system and Chinese society. The second concerns the deficiencies of the Chinese intellectual proerty system with regard to folklore. Both issues are examined through a survey on the weak public recognition of intellectual property law and folklore in Chinese society. The book also reveals the practical issues that have arisen in Southwest China through case studies. After analysing these issues, the work designs a model law specifically for folklore and also provides suggestions for how the current intellectual property legal system could establish a comprehensive legal protection system for folklore. Furthermore, the work shows that its proposed model law is effective in practice by resolving the issues in the case studies presented.

Folk art is now widely recognized as an integral part of the modern Chinese cultural heritage, but in the early twentieth century, awareness of folk art as a distinct category in the visual arts was new. Internationally, intellectuals in different countries used folk arts to affirm national identity and cultural continuity in the midst of the changes of the modern era. In China, artists, critics and educators likewise saw folk art as a potentially valuable resource: perhaps it could be a fresh source of cultural inspiration and energy, representing the authentic voice of the people in contrast to what could be seen as the limited and elitist classical tradition. At the same time, many Chinese intellectuals also saw folk art as a problem: they believed that folk art, as it was, promoted superstitious and backward ideas that were incompatible with modernization and progress. In either case, folk art was too important to be left in the hands of the folk: educated artists and researchers felt a responsibility intervene, to reform folk art and create new popular art forms that would better serve the needs of the modern nation. In the early 1930s, folk art began to figure in the debates on social role of art and artists that were waged in the pages of the Chinese press, the first major exhibition of folk art was held in Hangzhou, and the new print movement claimed the print as a popular artistic medium while, for the most part, declaring its distance from contemporary folk printmaking practices. During the war against Japan, from 1937 to 1945, educated artists deployed imagery and styles drawn from folk art in morale-boosting propaganda images, but worried that this work fell short of true artistic accomplishment and pandering to outmoded tastes. The questions raised in interaction with folk art during this pivotal period, questions about heritage, about the social position of art, and the exercise of cultural authority continue to resonate into the present day.

Trimming, piercing, slicing, snipping: just a few of the many words that relate to the idea of cutting. In this volume Jean-Charles Trebbi explores the traditional techniques of paper cutting, before examining current manifestations of this art form, including the contemporary materials and technologies it uses and the types of artistic expression it offers. The Art of Cutting is a collection of artworks that have been created using a variety of cutting techniques. The author explores traditional techniques that are still very much alive worldwide, and he analyses the current aspects of the art of cutting, in which different materials and technologies lead to new forms of artistic expression. This book presents a selection of artists who revisit and work with traditional techniques, as well as those who adopt contemporary approaches. From paper to ceramics, food design and architecture, The Art of Cutting offers a stunning and diverse universe that is waiting to be discovered. AUTHOR: Born in Paris, Charles Trebbi is an urban architect, designer, artist and writer. A Renaissance man who specialises in the infinite possibilities of folding, cutting and assembling using paper, cardboard, textiles and even wood and metal, he creates his own art books, which are often inspired often by urban spaces and architecture, and produces completely original structures with pop-up and cutting techniques.

This is the first book to explore color history in Asia. Color is a natural phenomenon and a fundamental element of the universe, and offers a medium to communicate with others globally. It is a language of signals, such as traffic lights, signs or symbols, and an essential part of society. Color attracts people's attention and transmits important information. As such, color language denotes all of the activities of human history, and has been associated with changes in society, economic development, and dynasties replacing the old with the new. The book brings together many elements of Chinese history with reference to the topic of 'color' and has evolved from the authors' respective interests in art and design, teaching and research, consultancy and publishing. The topic will be of increasing importance in the future as a consequence of China's increasing influence in the sphere of global culture. For practitioners of art and design, the book will be a valuable resource; for the general public, interested in the development of Chinese aesthetics over the centuries, it will provide a new perspective complimentary to existing studies about art, design and the history of th region.
