Training in safe operative birth is a key priority in obstetrics. Around one in five women are dissatisfied with their labour and birth, especially operative birth, often because of poor communication or inadequate technical skills. This can lead to sexual dysfunction and aversion to further pregnancy, as well as increases in complaints and litigation. This book accompanies the Royal College of Obstetricians and Gynaecologists'

aspects. A simple-to-use flowchart is included to guide the reader through the essential steps for a successful operative vaginal birth. Each chapter identifies the key learning points and provides step-by-step instructions for performing each technique.

According to the International Association for Ambulatory Surgery (IAAS), ambulatory surgery should be defined as 'an operation/procedure, excluding an office or outpatient

operation/procedure, where the patient is discharged on the same working day'. The rise of ambulatory surgery has been driven by technological advances that reduce the need for overnight hospital stays, enhanced recovery programmes that advocate early mobilisation, and the need for economic efficiency. Recent experience has shown that redistributing surgical procedures from the inpatient setting to ambulatory centres can be done without impacting

quality. The majority of people requiring urologic surgery are now treated as day/outpatients thus requiring a different level of care from inpatients. Ambulatory Urology and Urogynaecology is the only book that combines urology and urogynaecology focuses on outpatient management. Packed with learning points, practical hints and tips, and boasting an international group of contributing authors, this book is co-edited by

Challenging Concepts in Obstetrics and Gynaecology

This second edition of the innovative text, modelled on the current MRCOG curriculum, provides all the information that is required by the trainee and specialist during training and when preparing for the MRCOG examination. This book is divided into three Parts - General, Obstetrics and Gynaecology. Sub-sections within these major areas are

broadly based upon the elements of the curriculum that are highlighted within the RCOG trainee logbook. To ensure consistency of approach throughout the book, all elements within each Part have been written to a template structure, adherence to which has been strictly enforced by the expert editorial team. Each element opens with an introductory section of 'MRCOG standards', highlighting the 'Theoretical knowledge' and 'Practical skills' relevant to the discussion that follows. Within the discussion, clear sub-divisions of the text under standardized headings ensure ease of reference. Each element concludes with a brief list of key references as an aid to further study. Throughout the clinical elements of the text the supporting evidence for efficacy of the interventions described has been presented according to the guidelines of

the RCOG. Recommendations for medical, surgical, psychological and complementary treatment and diagnostic tests are all subject to this appraisal, a feature unique among obstetrics and gynaecology textbooks at this level. This textbook has established itself as an indispensable guide to the specialty for all trainee obstetricians and gynaecologists in preparation for the MRCOG examination and beyond. Examination Obstetrics & Gynaecology is an accessible rapid reference appropriate for daily use in a busy ward, clinic or surgery. Fully revised and updated, this practical guide is a definitive resource for medical trainees undertaking speciality training. Building on resources developed during the authors' specialist training in Obstetrics & Gynaecology, and refined by practical clinical experience, it provides a summary of

problems and complications could be encountered that challenge even the most experienced ART practitioners. Moreover, patients with complex medical disorders may require ART, presenting further challenges. Assisted Reproduction Techniques will stimulate resourceful thinking in the ART practitioner when faced with these challenges. It outlines various management options, the reasoning behind them, and the evidence on which they are based to enable the practitioner to choose the most suitable solution for the needs of each patient. Written by 122 internationally renowned experts, Assisted Reproduction Techniques follows the patient's journey throughout the whole ART process, with chapters on: Counseling and preparation Ovarian stimulation Oocyte retrieval Embryo transfer The luteal phase The ART

Speciality applications can be one of the most exciting, but yet nerve wracking times in a doctor's career. It is important that interview stations are approached in the correct manner, so that maximum marks can be scored in a timely fashion. Having recently been successful in the Obstetric and Gynaecology ST1 interviews, we gained an understanding of the common questions and scenarios and how best to approach these. This book aims to pass on the knowledge and skills that

Some of the feedback from our 2016 interview course and resources: "Having not previously done any interview practice since getting into medical school, I was nervous (and clueless) about what to expect for my O&G ST1 interview. However, the resources offered on www.obsandgynae.net were the most

comprehensive and useful resource I could've used. It was absolutely fantastic and I could not recommend it enough to prospective applicants for O&G interviews. The scenarios were all extremely realistic and similar to what comes up in the real interviews, and having mock mark schemes really helps when practising with friends." - Priya Paul obtained a training post in Oxford Deanery. "The course was exceptionally well run and organised. The speakers had genuine experience of the interview process and made a real effort to impart all the relevant information. I came away much more confident that I knew what interview preparation

would be helpful and it really helped me to focus my time. I also met some people at the course who were applying to the same deanery and we were able to swap numbers and do interview practice together after the course. I would 100% recommend this course: well organised, well run, excellent quality teaching, amazing value for money and knowing that it was non-profit and going to charity is a massive bonus. So thankful to Neha for organising this and for all the volunteers giving up their weekend to help the next year of potential trainees. I was ranked highly in London and think a lot of that is down to this course and being able to prepare systematically.
