

## Transfer Stitch Butterflies Bees Bugs

32 pages of unique butterfly, bee and bug designs that can be transferred to fabric and stitched. Are you looking to add colourful hand-made touches to your clothes and accessories? This collection of over 50 insect motifs - from traditional to whimsical - is a must-have source of design ideas for anyone who enjoys stitching. Simply choose a motif from one of the unique and beautiful stitched samplers, transfer it onto your chosen item using the corresponding iron-on transfer sheet, and you're ready to stitch! The book includes: \* 32 stitched samplers, with over 50 embroidered designs to choose from \* 32 reusable iron-on transfer sheets \* Notes on the stitches and threads used to create each motif \* Guidance on materials, equipment and essential embroidery stitches \* inspirational project ideas

An introduction to the hidden worlds of popular insects profiles their habits, habitats, and diets while providing thematic spreads that share additional historical and geographical fun facts.

A beautiful sewing reference guide full of exercises designed to inspire great ideas and motivate readers of all skill levels to create. This inventive book is a treasure trove of over 40 inspiring practical exercises, a rich and creative exploration of fabric and stitch, and a fascinating all-round read. Elizabeth Healey's approach to sewing is that it should be fun, and not like a chore or an exam we need to excel in. Her aim is to simply encourage you to pick up a needle and thread and get sewing! The exercises draw inspiration from around the world: create corded works of art inspired by Milton Glaser's iconic Bob Dylan poster; craft bold embroidered African masks; layer up and cut away to make Mola applique; use bleach and fabric paint to create Aboriginal dreamtime lizards; create knotted works of art inspired by ancient Mayan counting systems; embroider varsity cross-stitch letters; or try out decorative Japanese book binding. Alternatively, try a host of other techniques such as quilting, printing, dyeing, couching tumbled crockery, creating pleats and puckers, and needle lace. Packed with stitch galleries and bursting with slow sewing ideas, the book also contains "behind the stitches" features: illuminating insights into sewing movements such as Boro textiles, Gee's Bend quilting, and Dorset buttons.

Embroider 9 stunning plant and pollinator projects that shine with vibrant colour and life Exquisitely detailed and worked in silk floss thread with tiny size 12 needles, Victoria Matthewson's embroideries are a masterclass in thread painting, and shine with vibrant colour and life. Starting with key stitches and techniques, this inspiring and practical book contains 9 step-by-step embroidery projects. Choose from 9 key plant and pollinator combinations including the dogrose and greenbottle fly, ox-eye daisy and hoverfly, and fennel and seven-spot ladybird. Many people think of bees as being the only pollinators but, in fact, a wide variety of insects help with the pollination of plants, including butterflies, moths, wasps and beetles - all of which make wonderful subjects for embroidery. Each stunning project also contains fascinating entomological insights about each pollinator and its plant, verified by the experts at Buglife charity. The book will suit people with some previous embroidery knowledge, or ambitious beginners.

Spiritual lessons from insect archetypes of the Medicine Wheel • Reveals the sacred wisdom inherent in Honeybee's pollinating, Butterfly's transformation, Spider's weaving, and Earthworm's recycling • Provides experiential practices, such as Shamanic Breathwork journeys, to connect with insect teachers and harness their consciousness-activating patterns • Shows how Dragonfly, Cicada, and Cricket connect us with the Great Star Nations, the depths of Mother Earth, and the music of life Our insect brothers and sisters are some of the most ancient beings and teachers on planet Earth. Their powerful skills of adaptation and their plight, such as the widespread colony collapse facing honeybees, have brought them to the forefront of collective consciousness, as every being on Earth faces a time of incredible transformation. The archetypal energies of these sacred Wisdomkeepers can guide us through this evolutionary time with new pathways of shamanic healing and transformation to realize the highest potential of humanity. Exploring the insect and arachnid archetypes of the Sacred Instar Medicine Wheel, authors Linda Star Wolf and Anna Cariad-Barrett reveal the consciousness-activating patterns

in the pollen flight of Honeybee, the transformative chrysalis of Butterfly, the creative weavings of Spider, and the alchemical recycling of old into new of Earthworm. They show how Dragonfly, Cicada, and Cricket connect us with the Great Star Nations, the depths of Mother Earth, and the music of life. Each chapter includes experiential practices, such as Shamanic Breathwork journeys, to help you embody the strengths of these humble teachers, live within the natural cycles of planet Earth, and discover a higher octave of sacred purpose.
