In the last quarter of the twentieth century, urban colleges and universities found themselves enveloped by the poverty, crime, and physical decline that afflicted American cities. Some institutions turned inward, trying to insulate themselves rather than address the problems in their own backyards. Others attempted to develop better community relations, though changes were hard to sustain. Spurred by an unprecedented crime wave in 1996, University of Pennsylvania President Judith Rodin knew that the time for urgent action had arrived, and she set a new course of proactive community engagement for her university. Her dedication to the revitalization of West Philadelphia was guided by her role not only as president but also as a woman and a mother with a deep affection for her hometown. The goal was to build capacity back into a severely distressed inner-city neighborhood—educational capacity, retail capacity, quality-of-life capacity, and especially economic capacity—guided by the belief that "town and gown" could unite as one richly diverse community. Cities rely on their academic institutions as stable places of employment, cultural centers, civic partners, and concentrated populations of consumers for local business and services. And a competitive university demands a vibrant neighborhood to meet the needs of its faculty, staff, and students. In keeping with their mission, urban universities are uniquely positioned to lead their communities in revitalization efforts, yet this effort requires resolute persistence. During Rodin's administration (1994-2004), the Chronicle of Higher Education referred to Penn's progress as a "national model of constructive town-gown interaction and partnership." This book narrates the challenges, frustrations, and successes of Penn's campaign, and its prospects for long-term change.

Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. The only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers. As laser technology is becoming increasingly important in our high-tech environment, many of the technicians and engineers who install, operate, and maintain these devices have had little, if any, formal training in the field of electro-optics. This can result in less efficient usage of these important tools. *Introduction to Laser Technology, Fourth Edition* provides readers with a good understanding of what a laser is and what it can and cannot do. It explains what types of laser to use for different purposes and how a laser can be modified to improve its performance in a given application. With a unique combination of clarity and technical depth, the book explains the characteristics and important applications of lasers worldwide and discusses light and optics, the fundamental elements of lasers, and laser modification. In addition to new problems, the Fourth Edition includes new and expanded chapter material on: Material and wavelength Diode Laser Arrays Quasi-phase matching Fiber lasers Thin-disk and slab lasers Ultrafast fiber lasers Raman lasers Quasi-phase matching Optically pumped semiconductor lasers. *Introduction to Laser Technology, Fourth Edition* is an excellent book for students, technicians, engineers, and other professionals seeking a fuller, more formal introduction to the field of laser technology.

It's a Tuesday morning in Brooklyn---a perfect September day. Wendy is heading to school, eager to make plans with her best friend, worried about how she looks, mad at her mother for not letting her visit her father in California, impatient with her little brother and with the almost too-loving concern of her jazz musician stepfather. She's out the door to catch the bus. An hour later comes the news: A plane has crashed into the World Trade Center---her mother's office building.

Through the eyes of thirteen-year-old Wendy, we gain entrance to the world rarely shown by those who documented the events of that one terrible day: a family's slow and terrible realization that Wendy's mother has died, and their struggle to go on with their lives in the face of such a crushing loss. Absent for years, Wendy's real father shows up without warning. He takes her back with him to California, where she re-invents her life: Wendy now lives more or less on her own in a one-room apartment with a TV set and not much else. Wendy's new circle now includes her father's cactus-grower girlfriend, newly reconnected with the son she gave up for adoption twenty years before; a sad and tender bookstore owner who introduces her to the voice of Anne Frank and to his autistic son; and a homeless skateboarder, on a mission to find his long-lost brother. Over the winter and spring that follow, Wendy moves between the alternately painful and reassuring memories of her mother and the revelations that come with growing to know her real father for the first time. Pulled between her old life in Brooklyn and a new one 3,000 miles away, our heroine is faced with a world where the usual rules no longer apply but eventually discovers a strength and capacity for compassion and survival that she never knew she possessed. At the core of the story is Wendy's deep connection with her little brother, back in New York, who is grieving the loss of their mother without her. This is a story about the ties of siblings, about children who lose their parents, parents who lose their children, and the unexpected ways they sometimes find one another again. Set against the backdrop of global and personal tragedy, and written in a style alternately wry and heartbreaking, *The Usual Rules* is an unexpectedly hopeful story of healing and forgiveness that will offer readers, young and old alike, a picture of how, out of the rubble, a family rebuilds its life.

Three teenage girls share their stories about life as students, as young women with disabilities, and as minorities in a male-dominated special education school culture.

"The Ballot or the Bullet" is the title of a public speech by human rights activist Malcolm X. In the speech, which was delivered on April 3, 1964, at Cory Methodist Church in Cleveland, Ohio, Malcolm X advised African Americans to judiciously exercise their right to vote, but he cautioned that if the government continued to prevent African Americans from attaining full equality, it might be necessary for them to take up arms. It was ranked 7th in the top 100 American speeches of the 20th century by 137 leading scholars of American public address. "It's time for us to submerge our differences and realize that it is best for us to first see that we have the same problem, a common problem - a problem that will make you catch hell whether you're a Baptist, or a Methodist, or a Muslim, or a nationalist. Whether you're educated or illiterate, whether you live on the boulevard or in the alley, you're going to catch hell just like I am." Malcolm X
