This is the first book
to apply the
Clausewitzian

Trinity of 'passion,
chance, and reason'
to the experience of
real war. It explores

the depth and
validity of the
concept against the

thought to epitomise
a post-

In doing so it
demonstrates the
timeless message of
the Trinity, but also
ties the Trinitarian

idea back into

Clausewitz's political
argument. Intended
to build on the
existing corpus of
scholarship, this
book differs from the
existing literature in
two ways. By
applying the Trinity
to the wars of
former Yugoslavia
1991-1995, it

explores war at its

assessing the

embroiled in
dynamic competition
perpetuated by their
own interaction.
Providing valuable

insights into the complexities of real war fuelled by passion, undermined by chance, and shaped by reason, it is the first study to bridge the Clausewitzian world of theory with real experience. Examining each part of the triad

separately, the book
explores the
multiple
manifestations of
hostility and chance,
before then
assessing the
influence of these
elements on the
policies of the
belligerents as the
war evolved.
