The Perfect Score Project is an indispensable guide to acing the SAT – as well as the affecting story of a single mom's quest to light a fire under her teenage son. It all began as an attempt by Debbie Stier to help her high-school age son, Ethan, who would shortly be studying for the SAT. Aware that Ethan was a typical teenager (i.e., completely uninterested in any test) and that a mind-boggling menu of test-prep options existed, she decided – on his behalf -- to sample as many as she could to create the perfect SAT test-prep recipe. Debbie's quest turned out to be an exercise in both hilarity and heartbreak as she took the SAT seven times in one year and in-between "went to school" on standardized testing. Here, she reveals why the SAT has become so important, the cottage industries it has spawned, what really works in preparing for the test and what is a waste of time. Both a toolbox of fresh tips and an amusing snapshot of parental love and wisdom colliding with teenage apathy, The Perfect Score Project rivets. In the book Debbie does it all: wrestles with Kaplan and Princeton Review, enrolls in Kumon, navigates Khanacademy.org, meets regularly with a prep grammar coach, takes a battery of intelligence tests, and even catches free lessons from the world's most prestigious (and expensive) test prep company. Along the way she answers the questions that plague every test-prep rookie, including: "When do I start?..." "Do the brand-name test prep services really deliver?..." "Which should I go with: a tutor, an SAT class, or self study?..." "Does test location really matter?" – "How do I find the right tutor?..." "How do SAT scores affect merit aid?..." and "What's the one thing I need to know?" The Perfect Score Project's combination of charm, authority, and unexpected poignancy makes it one of the most compulsively readable guides to SAT test prep ever – and a book that will make you think hard about what really matters.

*** What is the standard view of history is completely wrong? * What if science and writing developed from an advanced prehistoric civilization in the British Isles? * What is written evidence in the Dead Sea Scrolls records megalithic history and provides the plans for a machine that could rebuild civilization following a global catastrophe? * And what if Jesus and his brother James were practitioners of megalithic astronomy? In UREL'S MACHINE Knight & Lomas offer powerful new evidence that our planet was hit by seven mountain-sized lumps of comet, creating a series of giant waves that ripped across the globe. Putting together the latest findings of leading geologists with their own sensational new archaeological discoveries, they show how a civilisation emerged and was able to build an international network of sophisticated astronomical observatories which provided accurate calendars, could measure the diameter of the planet and accurately predict comet impacts years in advance. The revelation that this is the true purpose of the great megalithic sites in Western Europe, built long before the Egyptian pyramids.**

'Borman approaches her topic with huge enthusiasm and a keen eye for entertaining...this is a very human story of a remarkable family, full of vignettes that sit long in the mind.' Dan Jones, The Sunday Times 'Tracy Borman's eye for detail is impressive; the book is packed with fascinating courtly minutiae... this is a wonderful book.' The Times 'Borman is an authoritative and engaging writer, good at prising out those humanising details that make the past alive to us.' The Observer 'Fascinating, detailed account of the everyday reality of the royals... This is a book of rich scholarship.' Daily Mail ' Tracy Borman's passion for the Tudor period shines forth from the pages of this fascinatingly detailed book, which vividly illuminates what went on behind the scenes at the Tudor court.' Alison Weir 'I do not live in a corner. A thousand eyes see all I do.' Elizabeth I The Tudor monarchs were constantly surrounded by an army of attendants, courtiers and ministers. Even in their most private moments, they were accompanied by a servant specifically appointed for the task. A groom of the stool would stand patiently by as Henry VIII performed his daily purges, and when Elizabeth I retired for the evening, one of her female servants would sleep at the end of her bed. These attendants knew the truth behind the glamorous exterior. They saw the tears shed by Henry VII upon the death of his son Arthur. They knew the tragic secret behind 'Bloody' Mary's phantom pregnancies. And they saw the 'crooked carcass' beneath Elizabeth 's carefully applied makeup, gowns and accessories. It is the accounts of these eyewitnesses, as well as a rich array of other contemporary sources that historian Tracy Borman has examined more closely than ever before. With new insights and discoveries, and in the same way that she brilliantly illuminated the real Thomas Cromwell - The Private Life of the Tudors will reveal previously unexamined details about the characters we think we know so well.

Everyone wants: High schoolers to graduate well-prepared for jobs. Improved STEM literacy. Greater achievement for inner-city children. Happiness for all children. So why are liberals spending billions of dollars working against those goals? In Race to the Bottom, Luke Roisiak uncovers the shocking reason why American education is failing: Powerful special interest groups are using our kids as guinea pigs in vast ideological experiments. These groups' initiatives aren't focused on making children smarter—but on implementing a radical agenda, no matter the effect on academic standards. Nonprofits pump billions into initiatives meant to redress racial inequities. Rather than fixing the problem, districts with a big gap between white and black test scores hire consultants who claim the tests are meaningless because they are "racist." These consultants' judgments allow school districts to ignore their own failures—ultimately hurting minority students and perpetuating racism. That is just one example. Drawing on his years in investigative journalism, Roisiak did a deep dive into school files, financial records, and parents' stories. What he found is that nonprofit influence has crept into the educational bureaucracy all over America. Corrupt school boards and quick diversity consultants abound. Teachers drawing government pay claim it's unsafe to return to in-person school, but "double duty" teaching in-person private classes. And amid all this focus on money and equity, academic standards are crumbling, which hurts. American kids in ways we'll be suffering for decades. Race to the Bottom is the first comprehensive exposé of the way radical ideology and self-serving administrators are destroying academic quality in America's K-12 schools. Rigorous and deeply researched, this is essential reading for anyone who cares about the future of our kids.

A young royal from the far north is sent south for a political marriage in an empire reminiscent of Imperial China. Her brothers are dead, her armies and their war mammals long defeated and caged behind their borders. Alone and sometimes reviled, she must choose her allies carefully. Rabbit, a handmaiden, sold by her parents to the palace for the lack of five baskets of dye, betrays the emperor's lonely new wife and gets more than she bargained for. At once feminist high fantasy and an indictment of monarchy, this evocative debut follows the rise of the empress In-yo, who has few resources and few friends. What makes us who we are? What combination of memory, history, biology, experience, and that ineluctable thing called the soul defines us? In the spring of 2016, through a genealogy website to which she had whimsically submitted her DNA for analysis, Dani Shapiro received the stunning news that her father was not her biological father. She woke up one morning and her entire history—the life she had lived—crumbled beneath her. Inheritance is a book about secrets—secrets within families, kept out of shame or self-protectiveness; secrets we keep from one another in the name of love. It is the story of a woman's urgent quest to unlock the story of her own identity, a story that has been scrupulously hidden from her for more than fifty years, years she has spent writing brilliantly, and compulsively, on themes of identity and family history. It is a book about the extraordinary moment we live in—a moment in which science and technology have outpaced not only medical ethics but also the capacities of the human heart to contend with the consequences of what we discover.

England's Tudor monarchs—Henry VII, Henry VIII, Edward VI, Mary I, and Elizabeth I—are perhaps the most celebrated and fascinating of all royal families in history. Their love affairs, their political triumphs, and their overturning of the religious order are the subject of countless works of popular scholarship. But for all we know about Henry's quest for male heirs, or Elizabeth's purported virginity, the private lives of the Tudors remain largely beyond our grasp. In The Private Lives of the Tudors, Tracy Borman dives deep behind the public face of the monarchs, showing us what their lives were like beyond the stage of court. Drawing on the accounts of those closest to them, Borman examines Tudor life in fine detail. What did the monarchs eat? What clothes did they wear, and how were they designed, bought, and cared for? How did they practice their faith? And in earlher moments, who did they love, and how did they love, and how did they give birth to the all-important heirs? Delving into their education, upbringing, sexual lives, and into the kitchens, bathrooms, schoolrooms, and bedrooms of court, Borman charts out the course of the entire Tudor dynasty, surfacing new and fascinating insights into these celebrated figures.
