This reimagining of the Robin Hood legend tells the story of the young boy behind the bandit hero's rise to fame. Will Shackley is the son of a lord, and though just thirteen, he's led a charmed, protected life and is the heir to Shackley House, while his father is away on the Third Crusade with King Richard the Lionheart. But with King Richard's absence, the winds of treason are blowing across England, and soon Shackley House becomes caught up in a dangerous power struggle that drives Will out of the only home he's ever known. Alone, he flees into the dangerous Sherwood Forest, where he joins an elusive gang of bandits readers will immediately recognize. How Will helps a drunkard named Rob become one of the most feared and revered criminals in history is a swashbuckling ride perfect for anyone who loves heroes, villains, and adventure. Public Examinations Examined

Betrayal in the City

Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Moses, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.

An anthology designed for the enjoyment and instruction of students from junior-secondary school onwards. The poems focus on aspects central to African life and culture: lover, identity, death, village life, separation, power and freedom. Guidance for teachers is included.

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations.

"This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London

"This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning

"I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great

interest and will serve to further improve public examinations.†? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and use in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Saharan Africa.

This textbook covers in one volume all topics required in the pure mathematics section of single subject A-Level Mathematics syllabuses in the UK, as well as a significant part of the work required by those studying for Further Mathematics and for A-Level

How can the United States meet demands for agricultural production while solving the broader range of environmental problems attributed to farming practices? National policymakers who try to answer this question confront difficult trade-offs. This book offers four specific strategies that can serve as the basis for a national policy to protect soil and water quality while maintaining U.S. agricultural productivity and competitiveness. Timely and comprehensive, the volume has important implications for the Clean Air Act and the 1995 farm bill. Advocating a systems approach, the committee recommends specific farm practices and new approaches to prevention of soil degradation and water pollution for environmental agencies. The volume details methods of evaluating soil management systems and offers a wealth of information on improved management of nitrogen, phosphorus, manure, pesticides, sediments, salt, and trace elements.

Landscape analysis of nonpoint source pollution is also detailed. Drawing together research findings, survey results, case examples, the volume will be of interest to federal, state, and local policymakers; state and local environmental agricultural officials and other environmental and agricultural specialists; scientists involved in soil and water issues; researchers; and agricultural producers.

Written by highly experienced authors, Cambridge IGCSE Chemistry Workbook provides complete support for the IGCSE Chemistry syllabus offered by CIE. This book contains exercises that provide clear progression to students as they go along. A wide variety of questions develop all the skills needed to succeed in the IGCSE Chemistry examination. Simple and clear language makes this book accessible to a range of abilities. This workbook is fully endorsed by CIE and is intended to be used alongside the Cambridge IGCSE Chemistry Coursebook. A Teacher's Resource CD-ROM is also available.

Each topic is treated from the beginning, without assuming prior knowledge. Each chapter starts with an opening section covering an application. These help students to understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and revision. Checkpoints in each chapter test students' understanding and support their private study. A selection of questions are included at the end of each chapter, many from past examination papers. Suggested answers are provided in the Answers Key.

This book includes Monday to Friday lessons for each day of a 36-week school year and short daily lessons.

The Monday to Thursday lessons include two sentences to edit, including corrections in punctuation, capitalization, spelling, grammar, and vocabulary and three items practicing a variety of language and reading skills. Friday practice cycles through five formats: language usage, identifying and correcting mistakes, combining sentences, choosing reference materials and figurative speech (similes, metaphors). The pages are

reproducible and the book includes a skills list and answer keys.

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

As teachers we often tend to expect other countries to teach chemistry in much the same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world: *Teaching Chemistry around the World*. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand – due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving – we have to learn from each others' educational systems.

Cambridge Low Price Editions are reprints of internationally respected books from Cambridge University Press. The text has been completely revised and updated to provide comprehensive coverage of all the major biology syllabuses at Advanced level. It is also suitable for first-year students in higher education. It contains: clearly written up-to-date information appropriate to the new Advanced level biology syllabuses, new material covering microbiology and biotechnology, the applications of genetics, and human health and disease, a variety of questions throughout the text, carefully selected and clearly presented practical investigations in many of the units, appendices providing basic information and techniques relating to the relevant areas of the physical sciences and mathematics (e.g. biological chemistry and statistics)

Quantitative Chemical Analysis

Introduction to Biology

Senior Secondary Physics

The aim of this study was to determine if there were gender differences in the performance of Chemistry practical skills among senior six girls and boys in selected mixed secondary schools in Kampala District from February to March 2004. The study participants were drawn from five mixed secondary schools in the district. A total of fifty students participated, half of them girls and the other half boys. A cross sectional descriptive research design was used involving both quantitative and qualitative research strategies. The instruments of data collection were a Chemistry practical test (Quantitative analysis), student questionnaires and in-depth interviews. Questionnaires were filled out by all students and forty randomly selected students were interviewed by the researcher. The following were the findings: 1. There were no statistical significant differences between girls and boys in their ability to manipulate the apparatus/equipment, take observation, report/record results correctly, and compute/interpret/analyze results during the Chemistry practical. 2. Both female and male students perceived interpreting/analyzing results to be the most difficult skill to perform, whereas manipulation of apparatus/equipment was perceived to be the easy skill to perform during Chemistry practical by both gender. 3. Girls had a poor self-confidence in their ability to perform Chemistry practical, as most of them (90%) believed that boys are better than them. Although girls performed slightly better than boys overall, the skills in which boys performed slightly better than girls in recording/reporting results correctly, and computing/interpreting/analyzing results, contributed a higher percentage in the assessment of Chemistry practical examinations by the UNEB examiners. Hence, it may be the reason why boys perform better than girls in UNEB Chemistry practical examinations, and in 'A' Level Chemistry examinations generally. The recommendations were that Chemistry teachers in 'O' Level should make sure that students are taught mole concept, volumetric analysis and Ionic Chemistry, and balancing equations

early enough so that both girls and boys are able to compute/interpret/analyze results. Also, further research should be done on gender and Chemistry practical skill performance, considering qualitative analysis practical for both 'O' and 'A' Level, so that more knowledge is gained about the effect of gender on performance of Chemistry practical skills.

Biology For You has been updated to offer comprehensive coverage of the revised GCSE specifications. It can be used with either mixed ability or streamed sets and higher tier materials are clearly marked.

Dealing with mechanics and the solving of mechanical problems with the help of pure mathematics, this A-Level text introduces at an early stage an appreciation of the properties of vectors. Throughout the book problems are solved using vector methods where appropriate, and many worked examples are provided to illustrate each main development of a topic. A set of straightforward problems follows each section, and a selection of more challenging questions appears in the miscellaneous exercises at the end of most chapters, with multiple-choice questions on most topics.

Fully updated and matched to the Cambridge syllabus, this stretching Student Book is trusted by teachers around the world to support advanced understanding and achievement at IGCSE. The popular, stretching approach will help students to reach their full potential. Written by experienced authors, this updated edition is full of engaging content with up-to-date examples to cover all aspects of the Cambridge syllabus. The step-by-step approach will lead students through the course in a logical learning order building knowledge and practical skills with regular questions and practical activities. Extension material will stretch the highest ability students and prepare them to take the next step in their learning. Practice exam questions will consolidate student understanding and prepare them for exam success. You will also receive free access to extra support online, including practice exam questions, revision checklists and advice on how to prepare for an examination.

Take control of your mind and start your CBT journey to achieving happiness! If, despite your best efforts, you always seem to find yourself acting on impulses related to depression, anxiety, insecurity, or fears associated with phobias, then your actions might not be to blame. It might just be your thoughts.. The good news is that anxiety, guilt, pessimism, procrastination, low self-esteem, and other 'black holes' of depression can be cured without drugs. If you are looking for a way to change your thoughts directly, then Cognitive Behavioral Therapy: is the book you have been waiting for. This book equips you with the most effective techniques for overcoming depression, anxiety, and intrusive thoughts. These are long-term solutions that have stood the test of time and are scientifically proven. Built on a solid foundation of neurological and behavioral research, CBT is an approach almost anyone can use for promoting greater mental health and improving quality of life. CBT illuminates the links between thoughts, emotions, behaviors, and physical health and uses those connections to develop concrete plans for self-improvement. Inside you will find: Behind the scenes of cognitive behavioral therapy - how it really works Going beyond the basics - how cognitive behavioral therapy can help you Narrowing it down - identifying your condition for effective treatment Reasons cognitive behavioral therapy solves the problem - for good Innovative CBT Techniques you can apply in your everyday life How cognitive behavioral therapy was developed - and why it is the future The most difficult conditions overcome - and how this is achieved Practical examples and applications of cognitive behavioral therapy As well as realistic, simple and workable steps to examine your own problems - a case study to show how cognitive behavioral therapy actually works, definitions and types of therapy - identifying the vicious cycle, hypnotherapy and isolating emotional threats. Before you know it, you could be changing your thought patterns for the better and improving every aspect of your life as a result. So, what are you waiting for? Grab your copy today, take control of your mind and start your journey to achieve happiness!
