How can other subjects in the primary curriculum enhance the teaching and learning of primary science? The key argument in the book is that children's learning is enriched through both discrete subject teaching and cross-curricular approaches to the curriculum and that children become more effective learners when they make links between the different subjects. This book gives helpful insights into why making effective cross-curricular links enriches science and discusses when and how to make effective and authentic links between science and other subjects. Each chapter tackles a particular subject and considers how it can enhance science learning through a variety of approaches and a wealth of ideas for the classroom. Written in a clear, accessible and informative style, this book: Includes contributions from a range of expert practitioners Provides a good balance between theory and practice Includes practical advice and tasks to help develop your confidence and skill in cross-curricular teaching Is illustrated with examples of pupils' voice This book is ideal for students, teachers and schools who wish to adopt a cross-curricular approach to teaching and enhance their primary science curriculum.

Contributors: Alison Brade, Mark Hamill, Sharon Harris, Shelagh Hendry, Alison Hermon, Pat Hughes, Arthur Kelly, Liz Lawrence and Cliff Porter. "Let this book take you by the hand and guide you skilfully past the pitfalls of cross-curricular teaching in primary science whilst enjoy the celebration of creative and effective links between science and other subjects. It is full of practical suggestions for cross-curricular work but it never loses sight of the need for clear

learning goals. Rooted in the principles of collaborative learning, this book inspires and informs. Anne Goldsworthy, Independent Science Consultant "This important book explores a practical framework for cross curricular teaching of science through a closely referenced theoretical rationale. There are a range of open ended tasks that illustrate the rich learning opportunities can be planned for when expert subject knowledge combines with a pedagogy for enquiry. This is an essential read for all teachers inspired to tailor the curriculum to the needs and interests of their children." Alison Peacock, Headteacher of The Wroxham School and Transformative Learning Alliance, Network Leader for the Cambridge Primary Review "I enjoyed this book sharing insights into cross curricular approaches to primary science. The authors have successfully demonstrated how they have put theory into practice. There are many useful activities clearly outlined for use in the classroom based on the authors' own experiences. The reader will gain sound knowledge and understanding of how and why cross curricular approaches can enhance primary science through worked examples. My particular favourite was the History of Bread. I will certainly recommend this book to my students." Kathy Schofield, Senior Lecturer Primary Science, Manchester Metropolitan University, UK "These ideas have given me the confidence that cross-curricular approaches can enrich scientific provision rather than dilute it." (Primary School Teacher)

"A sweet story that could be used as a springboard to discussion of the pitfalls of making snap judgments about pets — or people." — School Library Journal Norman the goldfish isn't what this little boy had in mind. He wanted a different kind of pet — one that could run and catch, or chase string and climb trees, a soft furry pet to sleep on his

bed at night. Definitely not Norman. But when he tries to trade Norman for a "good pet," things don't go as he planned. Could it be that Norman is a better pet than he thought? With wry humor and lighthearted affection, author Kelly Bennett and illustrator Noah Z. Jones tell an unexpected — and positively fishy — tale about finding the good in something you didn't know you wanted.

From the founders of #Kinderchat, this book provides a comprehensive, friendly guide to teaching in the early childhood classroom. Organized around the same core topics as #Kinderchat, conversational yet authoritative chapters cover everything a novice teacher needs to know, from setting up your classroom to establishing routines and engaging with parents. Learn how to effectively incorporate play, meet the needs of diverse learners, and cover curriculum like a pro. With helpful tips for working with a range of program structures, this is a must-have read for anyone new to the kindergarten or pre-K classroom.

Texas Wonders is designed to foster a love of reading in all children. Through exploration of texts and daily development of their skills as readers, writers, speakers, and active listeners, students experience the power of literacy. Our focus on teaching the whole child, and every child, prepares students to be lifelong learners and critical thinkers.

Concise and focused, the Wonders Reading/Writing Workshop is a powerful instructional tool that provides students with systematic support for the close reading of complex text. Introduce the week's concept with video, photograph, interactive graphic organizers, and more. Teach through mini lessons that reinforce comprehension strategies and skills, genre, and vocabulary. Model elements of close reading with shared, short-text reads of high interest and grade-level rigor.

The Committee for Children, Schools and Families recommends major changes to the nature and management of the national curriculum. In its current form the national curriculum essentially accounts for all the available teaching time, and the Committee would like to see a cap placed so that less than half that time is prescribed centrally. A slimmed-down national curriculum designed much more from the learner's perspective, setting out the learning that they have a right to

access, is recommended. Parents should be provided with a copy of the national curriculum so that they can take on a greater role in overseeing the curriculum that their child experiences. The Committee is not convinced by the proposed Programmes of Study for the primary curriculum put forward in the interim report of the Rose Review (available at <http://publications.teachernet.gov.uk>), which seem unnecessarily complex, takes a similar view on the new secondary curriculum and is concerned at some of the Early Learning Goals specified in the Early Years Foundation Stage (there should be more emphasis at this stage on developing speaking, listening and social skills). All schools should have the freedoms in curriculum matters enjoyed by Academies, and should not be pressured to follow the non-statutory National Strategies guidance. The report also stresses the importance of empowering professional teachers rather than the current approach of prescription and direction. The coherence and continuity in the curriculum is another concern, with a history of piecemeal creation and amendment to frameworks from 0 to 19. The Committee recommends an independent curriculum authority be established to review and then keep the curriculum refreshed.

Collins International Primary English offers full coverage of the Cambridge Primary English curriculum framework (0058) from 2020 within a six-level, multi-component course, which has been carefully developed to meet the needs of teachers and students in the international market.

Diddy Disciples is a creative and playful new worship and Bible storytelling resource for babies, toddlers and young children. Diddy Disciples aims to encourage participation, discipleship and leadership from children's earliest years, using storytelling, singing, colour, repetition, art and lots and lots of movement! Peer-learning is actively encouraged with many opportunities for young children to learn from each other. Groups are invited to build their own Diddy Disciples sessions, choosing from different options. Leaders can use the material to create a service to follow the pattern of their church's Sunday worship, a simple midweek baby and toddler singing session, or
