Version 3.6

This book is for all people who are forced to use UNIX. It is a humorous book—pure entertainment—that maintains that UNIX is a computer virus with a user interface. It features letters from the thousands posted on the Internet's "UNIX-Haters" mailing list. It is not a computer handbook, tutorial, or reference. It is a self-help book that will let readers know they are not alone.

Updated to include new material on the World Wide Web, Java, and HTML, this book provides a gentle introduction to UNIX, using a tutorial approach to make it suitable for classroom use or for self-paced study.
