The First Presidency and the Quorum of the Twelve Apostles have established the Teachings of Presidents of the Church series to help you draw closer to your Heavenly Father and deepen your restored gospel of Jesus Christ. As the Church adds volumes to this series, you will build a collection of gospel reference books for your home. The volumes in this series are designed to be used for Sunday instruction. They can also help you prepare other lessons or talks and answer questions about Church doctrine. This book features the teachings of President Ezra Taft Benson, who served the Church of Jesus Christ of Latter-day Saints from November 10, 1985, to May 30, 1994.

Bestseller del New York Times e già tradotto in 15 lingue, *In principio era il Sesso* (Sex at Dawn) è il più potente attacco al concetto di matrimonio vibrato tramite un volume. Per quanto le spiegazioni dei filosofi si siano affannate a ricondurre il matrimonio alle prime forme sociali e addirittura alle relazioni nei gruppi di scimmie antropomorfe, le loro conclusioni restano basate su fraintendimenti di fatti grossolani. Ryan e Jethà decostruiscono le teorie di Darwin, Hobbes, Malthus, Hrdy, S. Goldberg, Morgan, Pinker, Chagnon e altri con l'arma dell'ironia e con argomentazioni ineccepibili. Non contenti di un "standard" (di Sarah Blaffer Hrdy) che prevede la coppia esclusiva basata sullo scambio: la donna in cambio di carne (cibo) e di protezione per i figli dà all'uomo la certezza (con la fedeltà) che i figli metteranno in campo un vero e proprio armamentario di dati su tribù del presente e del passato la cui sessualità non ripercorre lo schema predetto.

Mr Blue: Memoirs of a Renegade

Adolescence Without End

Madrid, stadio Santiago Bernabeu, 11 luglio 1982: Dino Zoff, capitano quarantenne dell'Italia del calcio, alza la Coppa del mondo. Gli azzurri hanno vinto il loro terzo campionato mondiale. Il più leggendario, quello di Maradona, Zico, Boniek, Platini, Rummenigge. Quarant'anni dopo, in occasione del suo ottantesimo compleanno, Zoff ricorda e racconta quei giorni, quell'avventura e quei personaggi mitici, dal «vecio» condottiero Enzo Bearzot al presidente partigiano Sandro Pertini, suo compagno in una memorabile partita a scopone sull'aereo di ritorno dai Mondiali; dall'urlo selvaggio e liberatorio di Marco Tardelli, quando il centrocampista segna il secondo gol nella finale contro la Germania, ai sorrisi infiniti di Paolo Rossi, dall'esempio di serietà e classe di Gaetano Scirea al discusso silenzio stampa che ebbe proprio in Dino Zoff l'unico portavoce: il paradosso del friulano taciturno. E poi tanti altri protagonisti indimenticabili, calciatori di un gruppo formidabile (Conti, Cabrini, Gentile, Antognoni, Oriali, Altobelli...) e scrittori che raccontarono in diretta quei momenti (Gianni Brera, Mario Soldati, Giovanni Arpino). Un viaggio sentimentale e umano nei gloriosi giorni spagnoli e nella carriera di uno dei più grandi atleti della storia del nostro sport, un gigante del Novecento non solo calcistico. Un viaggio che ripercorre anche il tempo e i sogni di milioni di italiani che ricordano quei giorni come i più belli della loro vita.

This is the first English translation of a controversial Japanese best seller that made the public aware of the social problem of hikikomori, or "withdrawal"—a phenomenon estimated to involve approximately one million Japanese adolescents and young adults. Drawing on his own clinical experience with hikikomori patients, Saito Tamaki creates a working definition of social withdrawal and explains its development.

In this exciting book Mike Spick shows how the Luftwaffe's leading fighter pilots were able to outscore their allied counterparts so effectively and completely during the Second World War. When the records of the Jagdflieger pilots became available after the war, they were initially greeted with incredulity _ the highest claim was for 352 kills, and more than 100 pilots had recorded more than 100 victories. However postwar research proved that these claims had in fact been made in good faith and confirmation had only been given after rigorous checking. To discover the secret of this success, aviation history expert Mike Spick examines the exploits of these aces and sets out the context in which it took place. Every major theater is covered in detail including the conditions peculiar to each: climate, relative numerical and qualitative strengths, the presence or absence of radar and other measures, and the relative merits of the planes being flown. He focuses on the methods and tactics used by individual aces and uses firsthand sources wherever possible to put the reader right alongside the pilot in the cockpit.

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

Edward Bunker's life is beyond the imaginings of most fiction writers. He was born in Hollywood, California, the son of a stagehand and Busby Berkeley chorus girl, whose early divorce propelled him into a series of boarding homes and military schools. From the age of five he repeatedly ran away, roaming the city streets at night. A proud character, combined with an IQ of 152, resulted in a series of altercations with the authorities. He became the youngest ever inmate of San Quentin at the age of seventeen, and there he learned survival skills and faced down the toughest prisoners in the system. He was befriended by Mrs Louise Wallis, a former star of the silent screen and wife of movie mogul, Hal Wallis, who produced films starring Bogart, Cagney, Edward G. Robinson and George Raft. She introduced Bunker to her circle of friends, including Jack Dempsey, Tennessee Williams, Aldous Huxley and William Randolph Hearst, whose guest he was at San Simeon. A parole violation resulted in a spell crossing America as a fugitive on the FBI's most wanted list. His eventual capture led to Folsom prison. Encouraged by the example of Dostoevsky, Cervantes and Caryl Chessman, and by the kindness of Mrs Wallis, he determined to write his way out of prison. Bunker's first published novel, No Beast So Fierce, viewed by many including Quentin Tarantino as the finest crime novel ever written, changed his fortunes. It was filmed as Straight Time, starring Dustin Hoffman. He has written three other novels, The Animal Factory, Little Boy Blue and Dog Eat Dog, (all published by No Exit) admired by writers as diverse as William Styron and James Ellroy. He received an Oscar nomination for the screenplay of Runaway Train, and has appeared in a score of films, most notably his legendary role as Mr Blue in Reservoir Dogs. This blistering narrative is a memoir like no other.

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.
