How can excellence in the teaching of research methods be encouraged and ensured? This question has become increasingly important following the adoption of research methodology as a core part of many postgraduate and undergraduate courses. There has, however, been little discussion about the aims and methods of teaching the subject. In this volume; a number of authors from a variety of countries and disciplines employ their knowledge and experience towards the development of a 'pedagogical culture' in research methods. Their aim is to establish the extent of common concerns and challenges and to demonstrate ways in which these are being met. Intended to provide both a stimulus and source materials for the development of a more substantial and systematic literature in the field, the book will be of great interest to all those teaching research methods courses within social science disciplines.

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.).

South African National Bibliography

"DSSSB Trained Graduate Teacher Social Science Written Exam" has been designed to give the complete coverage of the syllabus as per the exam pattern. The syllabus in this book is divided into 6 Units and further into chapters that help learners to understand each concept of each subject easily. Theories and MCQs have been provided in the book in a Chapter wise manner in which every concept, doubt and query can be cleared simultaneously without putting any extra efforts moreover due to this benefit candidates can do revision hand-to-hand. The level of the questions are according to the latest test pattern in this book. Solutions provided in this book is written in a lucid form which is easy to understand by students and help them to learn the answer writing skills.

Inclusive education presupposes an all-inclusive approach where all learners are taught in regular classrooms, regardless of background, disability or social context. While there has been much debate, indications are that inclusive education has been gaining momentum. The book is divided into six coherent sections that address the how of inclusive education both inside and outside of the classroom.

One is always struck by the brilliant work of George Sefa Dei but nothing so far has demonstrated his pedagogical leadership as much as the current project. With a sense of purpose so pure and so thoroughly intellectual, Dei shows why he must be credited with continuing the motivation and action for justice in education. He has produced in this powerful volume, Teaching Africa, the same type of close reasoning that has given him credibility in the anti-racist struggle in education. Sustaining the case for the democratization of education and the revising of the pedagogical method to include Indigenous knowledge are the twin pillars of his style. A key component of this new science of pedagogy is the crusade against any form of hegemonic education where one group of people assumes that they are the masters of everyone else. Whether this happens in South Africa, Canada, United States, India, Iraq, Brazil, or China, Dei's insights suggest that this hegemony of education in pluralistic and multi-ethnic societies is a false construction. We live pre-eminently in a world of co-cultures, not cultures and sub-cultures, and once we understand this difference, we will have a better approach to education and equity in the human condition.

"A valuable resource [with] useful ideas about how to . . . enhance student engagement with the continent, and expand Africa's presence within the curriculum." —Stephen Volz, Kenyon College Teaching Africa introduces innovative strategies for teaching about Africa. The contributors address misperceptions about Africa and Africans, incorporate the latest technologies of teaching and learning, and give practical advice for creating successful lesson plans, classroom activities, and study abroad programs. Teachers in the humanities, sciences, and social sciences will find helpful hints and tips on how to bridge the knowledge gap and motivate understanding of Africa in a globalizing world.

Study & master economic and management sciences grade 8 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in economic and management sciences.

The Internet has become one of the most efficient and useful ways to obtain information on a particular subject.

Geography Resources in the Electronic Age provides basic information on how to navigate the Web and helps students to quickly identify the appropriate geography resources. Approximately 500 reliable sites listed alphabetically by topic are

reviewed. Each site review provides details about the best (and worst) features, specific grade range, and how to use the site for research. Geography Resources in the Electronic Age saves students, teachers, and librarians time in finding the Web's best geography resources. Topics are chosen based on the national geography curriculum, and the Web sites are reviewed by a geographer. Expanded coverage offers information specifically for educators, resources for special needs students, a list of museum and organization Web sites, and information on careers in geography.

Social Sciences for the New Nation

An International Examination of the Influence of Context on Science Curricula Development and Implementation

Traces the history of connections between Holocaust memory and the discourse of anti-racism.

This book explores the plethora of social-justice issues facing teacher education and development in Africa. Using both theoretical and practical perspectives, it considers the need for teacher education to be transformational and address conventional pedagogy as well as the rights of all citizens. The edited volume focuses on a wide range of relevant aspects, such as decolonization, economic models, environmental and multilingual and multicultural aspects of education. Evidence-based chapters cover strategies used to support preservice and in-service teachers on how best to tackle issues of social justice through induction activities, pedagogy and discipline content, involving local communities and the role of technology, including the use of open educational resources. The principles underlying these strategies are being used in the Covid-19 pandemic and will be equally relevant in the post-Covid-19 world. This book will be of great interest for academics, researchers and postgraduate students in the fields of teacher education, African education, educational policy, international education and comparative education.

South African Human Sciences Research Networking Directory

This book gives a voice to debates surrounding social science research ethics in Africa and brings them together in a coherent form to assist readers in being at the forefront of the discussions. The book gives an overview of the importance of research ethics in social sciences, as well as articulating the African influence on the subject matter. Subsequently it looks into specific frameworks and tools that researchers can apply in the process of doing research. Last but not least it also takes an in-depth look at traditional ethical issues pertaining to research in social sciences, through the lens of the African continent. This is the first book on social science research ethics in an African context and an indispensable resource for researchers, students, policy makers and research institutions in or interested in African research ethics.

Digitalization is not only a new research subject for political science, but a transformative force for the discipline in terms of teaching and learning as well as research methods and publishing. This volume provides the first account of the influence of digitalization on the discipline of political science including contributions from 20 different countries. It presents a regional stocktaking of the challenges and opportunities of digitalization in most world regions.

Teacher education is vital for the realization of a nation's development aspirations. The conception, incubation and delivery of any national development policy, as well as the reform and implementation of extant policies, are driven by the quality of teachers and their products within a functional educational system. Indeed, national and global models of development, including the millennium development goals revolve round the frames of quality education, beginning with teacher education. It is therefore important to have functional teacher education systems in Africa to help its citizens explore the networking of the world as a global village. This is achievable through a systematic mobilization of national resources and visible commitment to the development of a modernized cadre of scientific and technological manpower. This book, *Teacher Education Systems in Africa in the Digital Era* is a rich exposition of theories and praxes essential for the development of teacher education in Africa. The book has immense benefits for teachers, teacher trainers, funding agencies, other stakeholders and policy makers.

This scholarly book is the third volume in an NWU book series on self-directed learning and is devoted to self-directed learning research and its impact on educational practice. The importance of self-directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised. The target audience does not only consist of scholars in the field of self-directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors. The book contributes to the discourse on creating dispositions towards self-directed learning among all learners and adds to the latest body of scholarship in terms of self-directed learning. Although from different perspectives, all chapters in the book are closely linked together around self-directed learning as a central theme, following on the work done in Volume 1 of this series (*Self-Directed Learning for the 21st Century: Implications for Higher Education*) to form a rich knowledge bank of work on self-directed learning.

Continuing Professional Teacher Development in Sub-Saharan Africa explores the prospects that the on-going continuous professional development (CPD) of teachers working in schools offers for meaningful change, particularly towards improving the quality of educational provision for the majority of the continent's children. By reflecting on teacher professional development efforts and their place in broader education reforms, the book highlights the challenges of teacher CPD in these education contexts - contexts strongly shaped by endemic poverty, under-development and social upheaval. The collection draws together examples of innovation and resilience, and the valuing of teachers as critical role players, enabled and empowered through their on-going development as education professionals. Drawing together a wealth of experience, the volume identifies the policy and research implications for the future of CPD across the continent, providing important lessons that can be integrated into a post-2015 development agenda for Africa.

Teaching Humanities & Social Sciences

Teaching Humanities and Social Sciences, 7e prepares teachers to develop and implement programs in the humanities and social sciences learning area from F-10. It successfully blends theory with practical approaches to provide a basis for teaching that is engaging, inquiry-based and relevant to students' lives. Using Version 8.1 of the Australian Curriculum, the text discusses the new structure of the humanities and social sciences learning area. Chapters on history, geography, civics and citizenship, and economics and business discuss the nature of these subjects and how to teach them to achieve the greatest benefit for students, both as sub-strands within the Year F-6/7 HASS subject and as distinct Year 7-10 subjects. Throughout, the book maintains its highly respected philosophical and practical orientation, including a commitment to deep learning in a context of critical inquiry. With the aid of this valuable text, teachers can assist primary, middle and secondary students to become active and informed citizens who contribute to a just, democratic and sustainable future.

Education and International Development provides an introduction to the debates on education and international development, giving an overview of the history, influential theories, key concepts, areas of achievement and emerging trends in policy and practice. Written by leading academics from Canada, India, Netherlands, South Africa, UK, USA, and New Zealand, this second edition has been fully updated in light of recent changes in the field, such as the introduction of the Sustainable Development Goals and the increased focus on environmental sustainability and equality. The book includes three new chapters on private providers, decolonisation and learning outcomes as well as a range of pedagogical features including key concept boxes, biographies of influential thinkers and practitioners, further reading lists, questions for reflection and debate, and case studies from around the developing world.
