

Viva Voce In Biochemistry Theory And Practical

Presented as case studies, this book provides students with up to date, logical coverage of basic biochemistry with normal and abnormal aspects of physiological chemistry. Each section features case studies discussing different disorders and conditions in topics including chemistry and metabolism of carbohydrates, lipids, amino acids, proteins and nucleotides, as well as vitamins, minerals, hormones, diet and detoxification. Each case is presented in a problem-solving approach, describing the history, clinical manifestations and laboratory findings of the disease, assisted by detailed illustrations. The final sections offer normal laboratory reference values and case studies and answers for self assessment. Key points Case studies presented in problem solving approach covering history, clinical manifestations and laboratory findings of biochemistry of different diseases and conditions Separate sections dedicated to AIDS, cancer, molecular biology, organ function tests and water and electrolyte imbalance Includes normal laboratory reference values and case studies for self assessment

Over the next 2 years around 50 titles will be published, covering a comprehensive range of disciplines within medicine and health sciences. In a handy 152mm x 122mm size, and between 250-350 pages, these pocket atlases will contain up-to-the-minute information on their subject, which has been compiled, distilled and updated from prior

work by each author. Each mini-atlas will also contain a free CD-ROM or DVD-ROM with material to accompany and complement the text. The "Anshan Gold Standard Mini Atlas Series" will appeal to everyone involved in medicine and health sciences, from undergraduates to private practitioners, from medical professionals and academics. The full series will develop into an outstanding resource for any medical library, and each individual title will be a great value-for-money addition to a personal collection, for use as a portable reference for work or home. The first books will publish in February 2007, with a consistent flow of additional titles each month throughout 2007.

The idea of writing this book of VIVA VOCE/ORALS IN BIOCHEMISTRY is that, it should be much helpful to the MBBS and M.Sc. (Medical Science) students and postgraduate students for the preparation of examination. Though it is not a textbook of Medical Biochemistry, it is framed in the form of questions and answers in a simplified way. The book will definitely help the students for the preparation of

their examinations. This book is also aimed at the level of general practitioners, clinicians and medical students and technicians for applying the knowledge of clinical biochemistry in the clinical side, as much emphasis is given in the clinical biochemistry. The list of clinical biochemistry topics include interpretation of laboratory data and biochemical features of some clinical diseases like metabolic syndrome, diabetes mellitus, anaemias, jaundice, porphyrias and the disturbances of electrolyte and acid base balance.

information. Form more than two decades, faculty and students have praised LIR Biochemistry's matchless illustrations that make critical concepts come to life. The seventh edition of this book is a comprehensive guide to biochemistry for medical students. Divided into six sections, the book examines in depth topics relating to chemical basics of life, metabolism, clinical and applied biochemistry, nutrition, molecular biology and hormones. New chapters have been added to this edition and each chapter includes clinical case studies to help students understand clinical relevance. A 274-page free booklet of revision exercises (9789350906378), providing essay questions, short notes, viva voce and multiple choice questions is included to help students in their exam preparation. Free online access to additional clinical cases, key concepts and an image bank is also provided. Key points Fully updated, new edition providing students with comprehensive guide to biochemistry Includes a free booklet of revision exercises and free online access Highly illustrated with nearly 1500 figures, images, tables and illustrations Previous edition published in 2010 A Case Oriented Approach Towards Biochemistry

The second edition of this book is thoroughly revised as per guidelines of National Medical Commission in accordance with the competency-based curriculum of Biochemistry. The questions not only test the knowledge but also incorporate the clinical/applied aspects of biochemistry which are so important to help the students to think out of the box. . Uniquely presented in question-answer format covering all categories of questions that are expected in a university exam, in concise manner for rapid revision. . Covers questions which can be asked in different way (different questions by same answers), this helps students to write answers for these questions in exams. . Answers

presented in bullet points supported with tables, boxes, and figures, helps students to frame answers to questions and replicate the same in exams. . Complex/Key information is summarized in tables helps in quick revision during exams and also breaks monotony text. . Applied aspects provided at appropriate places in colored boxes, adds more clarity to the answer provided. . Recapitulation of points to ponder at the end of text for quick revision. . Prepares students for both theory and viva voce. . Reorganized topics in the same order as presented in new curriculum. . Insight into the biochemistry CBME curriculum with respect to Attitude, Ethics and Communication (AETCOM), Early Clinical Exposure (ECE), and self-directed learning in order to help in the making of the Indian Medical Graduate. . Ensured coverage of all competency codes integrated within the text as per new competency-based undergraduate curriculum. . Inclusion of 250 multiple-choice questions, and 500 short questions and viva voce for self-assessment of the topics studied. . Insertion of clinical cases along with answers to clinical cases at the end of the book to help understand the biochemical basis of disease and its management.

Viva in Biochemistry

Practicals and Viva in Medical Biochemistry

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

The second edition of the hugely popular The Clinical Anaesthesia Viva Book builds on the success of the first by providing a thorough review of short and long case questions typically given to Final FRCA

viva candidates. An introductory chapter gives invaluable practical advice on preparation for the viva. This is followed by almost 100 short cases and 25 long cases, all based on viva questions posed at recent examinations. Answers have been constructed from a combination of popular textbooks, recent publications and the extensive practical experience of the authors. Short further reading lists are provided for more in-depth preparation. Written by a team of expert consultants and senior trainees with (successful!) experience of the Final FRCA, this second edition of The Clinical Anaesthesia Viva Book, is a must-have for anyone preparing for the Final FRCA viva.
