Chemical additives are used to enhance the properties of many industrial products. Since their release into the environment is a potential risk for man and nature, their fate and behavior have been investigated in the framework of the European Union-funded project RISKCYCLE. The results are presented in two volumes, Global Risk-Based Management of Chemical Additives I: Production, Usage and Environmental Occurrence and Global Risk-Based Management of Chemical Additives II: Risk-Based Assessment and Management Strategies. This book is the second of the two volumes and features two main parts. In the first part, experts in the field discuss different models related to the assessment of the potential risks posed by chemical additives and analyze their benefits and drawbacks. In the second part, specific case studies in which the models have been applied are presented and the reliability of the models is evaluated. This volume is an invaluable source of information for scientists and governmental agencies dealing with the risk assessment of chemicals on a global scale.

In this sweeping re-investigation of Canadian legal history, Harring shows that Canada has historically dispossessed Aboriginal peoples of even the most basic civil rights.

He took everything from me, now it's my turn and what my husband isn't expecting, is that I play on BLOOD I was his second choice, his biggest mistake. I never wanted things to turn out the way they did, but they did. Now my choice is limited. Join him, or end him. What will I choose? The clock is ticking, my friend's life is hanging on a thread and I, Aliyana Capello am the only one who can save him. But at what cost?I love my husband, but sometimes love is not enough, sometimes there are more important moves that need to be made. It is unfortunate that some would need to fall so I, the Queen of Killers can take my place and lead them all.Once all is done, I will need to confess. So I am going to start by saying forgive me.The final part of Secrets of the Famiglia, tells all.This is an enemy to lovers book, read at your own risk, no promises of a happy ending, but I guarantee you, this story will blow your mind.

In How to Super Tune and Modify Holley Carburetors, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance application.

Everyone dreams of tropical escape. But what happens when you escape for too long? Imagine spending 24 hours a day with your spouse in 31 not-so-square feet . . . for years; crossing the Pacific Ocean on two gallons of fuel; and tossing spaghetti marinara around your living room, then cleaning it up while bouncing like ice in a martini shaker. Tightwads on the Loose tells the story of Wendy and Garth, lured to sea by the promise of adventure. They buy a 31-foot boat that fits their budget better than it fits Garth's large frame and set sail for an open-ended voyage, never imagining they'd be gone seven years, or cover 34,000 miles at the pace of a fast walk. They live without most "necessities" and learn that teamwork and a sense of humor matter most as they face endless "character-building opportunities." They make a long-anticipated visit to the island where Garth had been shipwrecked as a teenager, only to find it had become a penal colony. An electronic catastrophe in the Solomon Islands leaves them without navigation equipment, which forces them to trade their free-wheeling lifestyle for one that seems straight out of a '60s sitcom: jobs at a U.S. Army base in the Marshall Islands. In Asia, they dodge typhoons and ships that threaten to turn their home into kindling. Finally they endure a grueling 49-day nonstop ocean crossing. None of this prepares them for their arrival "home" to a post-9/11 America which leaves them wondering what had changed more, them or the world. Tightwads on the Loose offers a fun read to the armchair adventurer – or anyone afflicted with wanderlust.

This book deals with the role of international standards for corporate governance in the context of corporate social responsibility. Based on the fundamentals of moral theory, the book examines governance and CSR in general, addressing questions such as: Is "good governance" not affected by moral concerns? How do the principles and practices of CSR standards adhere to or conflict with insights from business ethics and moral theory? To what extent do the standards and governance models provide normative guidance? Do the standards and governance guidelines provide an adequate means of benchmarking and auditing? Are these standards a help or a hindrance to stakeholder engagement and transparency? The book provides insightful and thought-provoking answers to these and many other important questions concerning CSR standards, and offers a valuable resource for practitioners, academics and students at business schools and other institutions.

A collection of 24 stories written by talented authors. No two writers are the same, but they have one thing in common: they are storytellers at heart and their deepest desire is to be heard. Writing the Dream shares the stories of twenty-four Australian writers, from emerging to established authors. Some are traditionally published, while others have taken the self-publishing route. Some have faced rejection after rejection, while others have had a dream path. But, while their writing journeys are different, all of them strive to create, entertain, inspire and inform. And all of them have unique and creative voices that deserve to be heard.

With contributors including Anna Jacobs, Juliet Marillier, Natasha Lester, Jenn J McLeod, and a host of other talented writers, the stories in Writing the Dream are set to strike an inspirational chord in every hopeful writer's heart.

The instant New York Times bestseller, now available in paperback and featuring a new afterword from the author—the insider's guide to the Facebook/Cambridge Analytica scandal, the inner workings of the tech world, and who really runs Silicon Valley "Incisive.... The most fun business book I have read this year....

Clearly there will be people who hate this book — which is probably one of the things that makes it such a great read.” — Andrew Ross Sorkin, New York Times Imagine a chimpanzee rampaging through a datacenter powering everything from Google to Facebook. Infrastructure engineers use a software version of this “chaos monkey” to test online services’ robustness—their ability to survive random failure and correct mistakes before they actually occur. Tech entrepreneurs are society's chaos monkeys. One of Silicon Valley's most audacious chaos monkeys is Antonio Garcia Martinez. After stints on Wall Street and as CEO of his own startup, Garcia Martinez joined Facebook's nascent advertising team. Forced out in the wake of an internal product war over the future of the company's monetization strategy, Garcia Martinez eventually landed at rival Twitter. In Chaos Monkeys, this gleeful contrarian unravels the chaotic evolution of social media and online marketing and reveals how it is invading our lives and shaping our future.

For a woman considering the cruising lifestyle, the questions are endless. What is cruising really like? Can I do it? Will I like it? will it be horrible, or wonderful? Longtime sailor and circumnavigator Diana Jessie provides advice to women contemplating short-term cruising or long-term voyaging. She gives unique insights into a plethora of women's concerns, including: Why We Go . . . Cruising Roles and Relationships . . . The Right Boat . . . What Do I Need to Learn? . . . If My Partner Falls Overboard, How Do I Rescue Him? . . . Learning for Independence . . . Fearing the Weather Ahead . . . Isn't It Dangerous Out There? . . . Medical Preparation and Planning . . . Children On Board . . . Family Issues and Events . . . Staying in Touch . . . Career Planning and Employment . . . Bathing, Hair Care, Skin Care, Clothing . . . Sex at Sea . . . Provisioning for Cruising To provide a broad perspective, Diana Jessie includes the opinions of noted women cruisers, including: Barbara Merritt, contributing editor of "Cruising World" magazine; Lin Pardey, longtime cruiser and author of several cruising books; Dawn Riley, noted America's Cup and Whitbread sailor; Patience Wales, two-time circumnavigator and editor of "SAIL" magazine; plus seventeen other women, from novices to world-renowned sailors.

Ronney is an introverted young woman with a disgraceful appearance. She lives humbly in one of the poorest neighborhoods of Sheryl Valley, a town corrupted by the mafia in Southern California. With no diploma, she works hard in her parents' restaurant and provides voice-overs for children's animated movies during the weekend. In accordance with a long-standing family tradition, Ronney's twenty-fifth birthday celebration comes with a dare from her cousins: she must knock on the front door of the infamous Khan household. The Khans' reputation proceeds them, rumored to be in association with the mafia. But when Ronney knocks on the door, before she has the chance to run, the Khan family matriarch, Camilia, takes an interest in Ronney. Ronney's lack of conventional beauty and disinterest in fashion draws Camilia in, leading her to offer Ronney the position of personal assistant to her eldest son, Yeraz, with a substantial salary at stake. It's an offer Ronney cannot refuse. To keep her job, Ronney's task is simple: do not fall in love with Yeraz. "Easy," she thinks. But what if destiny decides otherwise? Ugly Ronneyis a romance in which the heroes enter the gallery of legendary lovers.

The story of Chesapeake pirates and patriots begins with a land dispute and ends with the untimely death of an oyster dredger at the hands of the Maryland Oyster Navy. From the golden age of piracy to Confederate privateers and oyster pirates, the maritime communities of the Chesapeake Bay are intimately tied to a fascinating history of intrigue, plunder and illicit commerce raiding. Author Jamie L.R. Goodall introduces infamous men like Edward "Blackbeard" Teach and "Black Sam" Bellamy, as well as lesser-known local figures like Gus Price and Berkeley Muse, whose tales of piracy are legendary from the harbor of Baltimore to the shores of Cape Charles.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: | physical principles of various material handling systems; | considerations in selecting technically efficient and environmentally friendly equipment; | best practices in upgrading and optimizing existing bulk material handling facilities; | strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

You might think stress-free navigation sounds like an impossible paradox. But it need not be. All boaters, whether under sail or under power, need to be able to navigate safely on the water – both to keep themselves and their crew out of trouble and to avoid endangering others. Yet navigation has often been presented almost as a black art – complicated, full of tricky maths, and with alien concepts to get your head around. Step in 'Mr Stress-Free': having in his previous books presented techniques for sailing and motorboating in an accessible, manageable fashion, Duncan Wells now turns his attention to navigation. He makes concepts easy to understand and the practice of navigation perfectly achievable for all – with minimum stress. The book covers the basic introductory elements clearly and simply for novices, and progresses through more advanced techniques for experienced navigators, so that there is something for everyone, whatever their skill level. Diagrams, quick-reference tables and flowcharts, explanatory step-by-step photographs, box features, top tips and QR codes – giving access to explanatory videos – are all features that have been much appreciated by readers of Duncan's other top-selling titles.

Most people know that there are 70 million Baby Boomers in America today...but what is less known is that there are approximately 100 million people in America being just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.
